Notes:

1. We have started reference to Books like PrAtiSAkhyam, (English Translation and Comments by Mr. W.D Whitney), PAnini's AshtAdhyAyI published by Sindhu Charan Bose (originally by Indian Press Benaras in 1891), translated in English by Shri Chandra Vasu.
2. We are also trying to understand the works of VyAsa SIkshA and PAnini SIkshA with available English translation.

Our Articles will keep undergoing periodical changes with reference our learning and understanding. We request readers to check for new versions uploaded in the www.vedavms.in website.

We note that PrAtiSAkhyA in his work (period much earlier to PAnini) has recorded the difference in application of grammar rules or different opinions of other Saints/Sages before his time. Some rules or differing opinions quoted in his work are great names like vAlmIki, ArtreyA, PauSkarasAdi, PlAkSi, KaundinyA, GautamA, SaityAyana, SamkRutya, UkhyA, KANDamAyanA, AgnivEShyA , PlAksAyanA, HaritA ,SAnkhAyanA,MimAmSA and few other Saints/Sages.

Abbreviations for reference will be used as below:

PrAtiSAkhyA - PS
PAnini's AshtAdhyAyI – PA
VyAsa SIkshA – VSI
PAnini SIkshA – PSI

Version Notes: Version 1.0 dated 28th February 2026

1. This Version replaces the earlier version 0.3 dated 20th February 2019.
2. Some additional examples have been added in Section 6 on prAtisAkyam.
3. Some proofing corrections, format errors have been incorporated.

1 Veda Basics – Visarga

1.1 Introduction:

Visarga is a special **support Vowel** in Sanskrit represented as अः (அ:, ஃ)

(read as **"aha"**); the visarga Support part **" : "** is read as **'ha'**. (half time scale)

The Akshara forms of Visarga letters are derived as with the respective base letters (halants) Visarga is referred technical in pure form as **Visarjanlya.**

(ik, क्, க், க்), (ich, च् ச், ச்) , (it त् த், ற்) , (iT , ट् ட், ட்) ,

(ip प्, ப், ப்) , (il ल्, ல்) , (m म् ம் ம்)

to get these "ka:" , "cha:", "ta:", "Ta:", "pa:" "la:" "ma:".

The Samyukta Akshara forms are derived like **sra:, sva:, bhya: etc.**

Any letter that carries this mAtra form ':' is a Visarga Akshara (letter).
The Visarga in itself has a **mAtra value of half in terms of time scale.**
The Visarga letters are classified as letters of mahapraNa, since there is a distinct flow of air.

The Visarga symbol ':' represents the sounds **'s'** or **'r'** depending on the word that is taken up. Example, नमः stands for नमस् the Visargam stands for 's' (स्,ஸ்,ஸ்) and in सुवः the Visargam stands for 'र' (र्,ர்,ற்) meaning सुवर् .

The **Visarga sound with vowel "अ" "आ" read as 'ha' (in half time scale as normally saying ha)**

इ ई is read as 'hi' , उ ऊ is read as 'hu'

ए is read as 'he' ऐ is read as 'hai' ओ is read as 'ho'

औ is read as 'hau'

In Veda recital, there are specific rules as the how Visarga is treated. If we utter each visarga in its original ha sound, the rendering will not be smooth. So, the sound of the Visarga combines with the following word, based on the **Visarga base vowel sound (like a,aa, e,ee,u,ae, ai,ou) and the letter following the Visarga.**

The examples of Visarga letters are given below.

1.2 Examples of Visarga Letters

The basic Visarga (Support Vowel) - अः

1.2.1 Consonant Visarga Examples:

क् + अः = कः, च् + अः = चः, त् + अः = तः,

ट् + अः = टः, प्+ अः = पः, म् + अः =मः

ल् +अः = लः, व्+अः = वः

க் + அ: = க: , ச் + அ: = ச: , த் + அ: = த:

ட் + அ: = ட: , ப்+ அ: = ப: , ம் + அ: =ம:

ல் +அ: =ல:, வ்+அ: = வ:

ക് + അഃ = കഃ , ച് + അഃ = ചഃ, ത് + അഃ = തഃ

ട് + അഃ = ടഃ , പ്+ അഃ = പഃ , മ് + അഃ =മഃ

ല് +അഃ =ലഃ , വ്+അഃ = വഃ

1.2.2 Conjunt Consonant Visarga:

स्+र्+अः = स्रः, श्+व्+अः =श्वः, भ्+य्+अः =भ्यः,

ஸ்+ர்+அ: = ஸ்ர:, ஶ்+வ்+அ: =ஶ்வ:, ப்4+ய்+அ: =ப்4ய:

സ്+ര്+അഃ = സ്രഃ, ശ്+വ്+അഃ =ശ്വഃ , ഭ്+യ്+അഃ =ഭ്യഃ

1.3 Example of Visarga for ka varga:

कः, काः, किः, कीः, कुः, कूः, केः, कैः, कोः, कौः

க: , கா: , கி: , கீ: , கு: , கூ: , கே: , கை: , கோ: , கௌ: ,

കഃ, കാഃ, കിഃ, കീഃ, കുഃ, കൂഃ, കേഃ, കൈഃ, കോഃ, കൗഃ

The word *half sound* in the table indicates the 'ha' sound shall be given half *the time of full utterance of 'ha'*

Sanskrit	Tamil	Malayalam	Vowel sound	Read as (in near English sound)
कः	கः	കഃ	a	Kaha(ha has half sound)
काः	காः	കാഃ	aa	kAaha(ha has half sound)
किः	கிः	കിഃ	e	Kihi (hi half sound)
कीः	கீः	കീഃ	ee	Keehi (hi half sound)
कुः	குः	കുഃ	u	Kuhu (hu half sound)
कूः	கூः	കൂഃ	oo	Koohu ((hu half sound)
केः	கேः	കേ:	ae	kehe
कैः	கைः	കൈഃ	ai	Kaihai (hai half sound)
कोः,	கோः	കോഃ	o	Koho (ho half sound)

कौः	கௌ:	ഔഃ	ou	Kouhu (hu half sound)

PS: Rule 2. 48 visarjanlya (visargam) has the same position of the preceding vowel (vowel sound)

1.4 Important Notes

1. The Vedas has been in existence for a long time which experts estimate between 40000 BC to 15000 BC. Sanskrit has been one of the oldest languages in the world. Ignoring the time factor, let us see the fact that PAnini has structured the Sanskrit Language and Grammar and written rules around 6th century or 3rd century BC.

2. The standard Sanskrit rules applicable to Visarga Sandhi are applicable in Vedas but Panini's work recognises those rules for poetry/Veda Sruti but says some of the rules are optional. So we find that a rule as per Grammar book is overridden in Vedas, when the effect of the sound, its swaram and mAtra time are to be retained for the best effect of rendering.
A rule applicable to prose may not be applicable to poetry/song (read as Veda!).

1.5 Visarga during Vedic Recital

1. The Visarga shall be **distinctly uttered** when it is at the end of a statement/Ruk.
2. When the Visarga letter appears in the middle of the statement/Ruk
    a. The Visarga may be dropped by the Visarga Sandhi rules and then it is not uttered or given a sound effect.
    b. The Visarga may be pronounced with special sound effect based on the Visarga Sandhi rules based on the letters.
    c. The Visarga gets converted to **another letter or sound form**, **which is recited** as per Visarga Sandhi rules.

Note: The readers must familiarise themselves with the book that they refer to. Visargam may be printed in some places and/or when the Visarga Sandhi rule is applied; then visargam is printed in the form as **"it is to be read".**

Example : नमः शिवाय may be printed with visargam or printed as to be read as नमशिवाय.

1.6 Letter classification for Learners

Visarga Sandhi rules are based on the following:

1. The Vowel sound of the Visargam **(a, aa, e, ee, u, oo, Ae, ai, O, Ou)**
2. The representation of Visargam as sound **'s' or 'r'**
3. The type of the letter that follows the Visargam (Vowel, Soft Consonant, Hard Consonant, Letter of a particular Varga, a specific letter
4. There are also rules for a specific Visarga letters.

1.6.1 Table of Letter Classification

Type of Letter	Letter or the basic varga Letter

2 Visarga Sandhi Rules

Important Notes:

1. The examples, given in this Article, **focus on the current Visarga Rule** that is being taken up in the respective Section/Para/Table. The example may ignore or not highlight the other Visarga Rule that has been applied in another word or padam in that same example **to keep focus.**
2. Please note that some swaram markings may be missing or not copied. The focus is on the specific Sandhi rule only. Please ignore the Swaram for the purpose understanding Sandhi rule. The **word sets copied may not** be the same across three languages.
3. Swaram changes that come along with Sandhi rules are being indicated separately in the examples provided.
4. We have tried to give examples from the Vedic VAkyams that we recite and are not interested in giving theoretical examples as given in many internet sites. The purpose is that the student is able to relate it to what is being learnt in the Veda Class.
5. The Examples given are adequate but we find that certain Sandhi rules do not occur often and we have given lesser examples. Readers are requested to contribute more if they find relevant examples in these areas of fewer occurrences. We have referred to to Samhita Pada Paatam, especially where special rules are followed Visarga.

3 Visarga Sandhi Rule for Visarga with 'a' sound

3.1 Visarga Vowel sound is 'a'(अ,அ, അ) representing 's' (स्,ஸ்,സ്) and the following letter is 'a'(अ,அ, അ)

Let us take Nama: + astute

नमः + अस्तुते = नमोऽस्तुते

The Visarga "na**ma**ha" has vowel sound **'a'**(अ, அ, അ). The Visarga stands for **'s'.** (स्,ஸ்,സ്). The first letter of the word/padam following visargam is also 'a' (अ, அ, അ).

PS 9.7 – '**a:'**, the whole of it, when followed by '**a'**, becomes **'o'**

Rule: The Visarga letter gets converted to 'O' sound of that letter, that is म to मो and the 'a' becomes the symbol ऽ (Avagraha, as 'a' is elided after O) representing half 'a' (अ, அ, അ) sound which is blended with '**O'**. नमः **has become** नमो. The Sandhi has produced the word नमोऽस्तुते.

This is found in a number of places across various Vedic texts, Slokas etc.

This rule is already incorporated and printed in the Books.

3.2 Exceptions to 3.1. Rule as an Option

Please refer to our Article on Avagraha, we have given two sections from PS for rules of where Avagraha will be formed and where Avagraha will not be formed. There are exceptions since “Use of Avagraha”, subject to some rules, is Optional as per PAnini’s work. We find that the rule is not followed/optional due the specific sound effect, swaram of the letter. Those from Rudram Chapters till 10, are exempt as per PrAtisAkyam. The following table gives such examples from well known mantras/suktams:

Words/Padams before Sandhi	Word/Padam with Sandhi Rule

Readers shall remember that this first rule with Avagraha, helps understanding of Krama pAta flow and Padams.

Note based on general Observations: The **'a'** does not become avagraha when it has specific swaram, it is occurring between swarams and there is a need for 'a' to be distinctly pronounced. Key guidelines are from Taittirlya PrAtiSAkyam.

3.3 Visarga Vowel sound is 'a'(अ,அ, അ) representing 's' (स्,ஸ்,സ്) and the following letter is Vowel other than 'a'(अ,அ, അ) :

नमः + आव्याधिनीभ्यो = नम आव्याधिनीभ्यो

நமஃ + ஆவ்யாதி4நீப்4யோ = நம ஆவ்யாதி4நீப்4யோ

നമഃ + ആവ്യാധിനീഭ്യോ = നമ ആവ്യാധിനീഭ്യോ

The Visarga "na**ma**ha" has vowel sound 'a'. The Visarga stands for **'s'.** (स्,ஸ்,സ്)

The first letter of the word/padam following visargam not a (अ, அ, അ).(for which we have seen the first rule above in 2.1)

It can be any of the following Vowel:

आ इ ई उ ऊ ए ऐ ओ औ ऋ ॠ

ஆ இ ஈ உ ஊ ஏ ஐ ஓ ஔ ரு ரூ

ആ ഇ ഈ ഉ ഊ എ ഐ ഓ ഔ ഋ ൠ

Rule: The Visarga gets dropped and not recited. A Pause is given to indicate such occurrence. There are a number of examples in Rudram which readers can analyse as examples.

The Visargam is not printed in the Book. The existence of Visarga is known to a student who knows this rule. But when Pada or Krama Paatam is referred to, it becomes clear to the students.

Table of Examples:

3.4 Visarga Vowel sound is 'a' (अ, அ, അ) representing 's' (स्,ஸ்,സ്) and the following letter is a Soft Consonant:

For list of hard and soft consonant letters, please refer to table for type of Letters in Para 1.6.1

PS 9.8 - Also when **'a:'** followed by a Soft (sonant) consonant, becomes **'O'** .

नम: हिरण्य बाहवे = नमो हिरण्य बाहवे

நம: + ஹிரண்ய பா$_3$ஹவே = நமோ ஹிரண்ய பா$_3$ஹவே

നമ: ഹിരണ്യ ബാഹവേ = നമോ ഹിരണ്യ ബാഹവേ

The Visarga Vowel sound is ‘a’, visarga stands for ‘s’ and followed by ‘ha’ varga letter which is Soft Consonant.

Rule: The Visarga is dropped; the letter before the Visarga changes to its Vowel sound ‘O’.

The Visarga letter gets converted to ‘O’ sound of that letter, that is म to मो;

नमः has become नमो. This is the most often seen rule in the Vedic Text for Visarga. This rule is always incorporated and printed in the books as to be read.

PS 8.16 & 17 - when preceded by an **'a'**-vowel, visarjanlya representing **r** is omitted, And the preceding vowel is made long, when following letter is 'r'

Rule: The Visarga is dropped; the **letter with visarga is elongated to 'aa'**. This rule is incorporated and printed in the books.

3.6 *Visarga Vowel sound is 'a' (अ, அ, അ) representing 'r' (र्,ர்,ര്) and the following letter is any Vowel or Soft Consonant except 'r'*

सुवः + इति = सुव रिति ; सुवर् + इति = सुव रिति

The Vowel sounding of सुवः is **'a', the visargam stands for 'r' indicating**

सुवर् **It is followed by a vowel letter or soft consonant letter.**

Rule: The Visarga become 'r' and stands as r or combines with the following letter to become a letter in the 'ra' varga. This rule is incorporated and printed in the books.

Please note that the following words with **vowel sound 'a'** takes the visarga representation of 'r' (र्,ர்,ര്) mainly.

puna: , suva:, prAta: anta:, aha: (पुनः, सुवः प्रातः, अन्तः, अहः),

புன:, ஸ்வ:, ப்ராத:, அந்த:, அஹ:

(പുന:, സ്വ:, പ്രാത:, അന്ത:, അഹ:)

Note: These are key examples which are often seen with sound ‘r’ and the list above is not exhaustive. A spefic Section 6 has been added which provides rules from PrAtiSAkyam with examples for illustration only.

Note: When punaH is followed by letters starting with ‘p’, the visargam is retained as upAdmaniyAH. (Ph in our representation)

punaH + punaH = puna: puna:. punaH+ pra = puna: pra

Similarly, suvaH when followed by a word starting letter s, retains visaragam as ‘s’; example suvaH + suvaH = suvaH suvaH;

PS 8.26 suvaH when followed by word starting ‘p’ retains visarag as upAdmAnia, TS 1.4.43.1& TS 4.1.10.5 – suvaH +pata = suvaH pata,

3.7 <u>Special Rule for Visarga ‘a’ (अ, அ, അ) sound for ‘saH, eshaH’</u>

The Visarga gets dropped for the two Visarga letters SaH, YeshaH **(सः, एषः, ஸ:** ඒෂ: ස: ඉෂ:**)** when the following letter is any Vowel (**except ‘a’**) or any Consonant. **(Including Hard Consonants which please note)**

सः + वैश्रवणोपमो = स वैश्रवणोपमो

ஸ: வைஶ்ரவணோப்மோ = ஸ வைஶ்ரவணோப்மோ

ස: වෛශ්‍රවණෝප්මෝ = ස වෛශ්‍රවණෝප්මෝ

The Visargam is सः, ஸ:, ස: followed by letter Consonant of “Va” vargam – वै, **வை,** වෛ–The Visarga is dropped.

एषः + आदेशः = एष आदेशः

ஏஷ: ஆதே3ஶ: = ஏஷ ஆதே3ஶ:

ഏഷ്ഃ + ആദേശഃ = ഏഷ് + ആദേശഃ

The Visargam is एषः, ஏஷ:, ഏഷ്ഃ followed by the Vowel letter

आ, ஆ, ആ. **Rule : The Visarga is dropped.**

This rule is incorporated so Visargam is not printed in the Books. Only students knowing this rule may be aware of the existence of Visargam.
Reference to Pada Paatam or Kramam is helpful.

3.7.1 Special Observations on saH before ‘l’

The letter ‘l’ if it appears after SaH with a single letter Padam it may be merged with ‘sa’ for ease of rendering since it is difficult to render this combination of Vowels together. Please also note that it has been observed for the Padam ‘it’. But if ‘it’ can be combined with following letter due to Sandhi, it is taken separately with the following letter. Veda learners are requested to observe the rendering and also the combination of vowel sounds and Sandhi that emerge specific to that instance only.

Examples of saH with ‘it;

Words/Padams before Sandhi	Rendering in Vaakyam
T.S.1.1.14.4 सः । इत् । उ । होता । ஸ: । இத் । உ । ஹோதா । സഃ । ഇത് । ഉ । ഹോതാ । SaH drops visargam, but merges with ‘i’ like normal Sandhi to form ‘sE’,	सेदु होता ஸேது3 ஹோதா സേദു ഹോതാ ‘t’ of ‘it’ becomes ‘d’ before Vowel ‘u’ as per Consonant Sandhi Rule to form ‘du’
T.S.1.2.14.3 सः । इत् । अग्ने । अस्तु । ஸ: । இத் । அக்3னே । அஸ்து സഃ । ഇത് । അഗ്നേ । അസ്തു । Example similar to above	सेदग्ने अस्तु ஸேத3க்3னே அஸ்து സേദഗ്നേ അസ്തു
T.S. 1.5.9.6 सः । इत् । नु । वै ஸ: । இத் । நு । வை । സഃ । ഇത് । നു । വൈ । Here Sa and ‘i’ donot combine.	स इन्वै ஸ இன்ன்வை സ ഇന്വൈ **‘t’ of ‘it’ becomes ‘n’ before nasal ‘nu’. ‘nu’ becomes ‘n’ to becomes ‘nnvai’. Note this special rule.**

Normally other letters with **more than two akshara in ‘i’ do not merge with ‘sa’** and **do not** become **‘sE’**. ‘saH’ dropes visargam before I**ndraH or Indra** which remain as it is. In the last mantra of Mahanarayana Suktham, (which is part of Aranyam, which does not have formal Pada Paatam), saH Indra saH akShara parama swarAt, becomes “sEndra sO&kShara parama swarAt”.

3.8 Visarga Sandhi Rule for Visarga with 'aa' (आ,ஆ, ആ)sound

3.8.1 Visarga Vowel sound is 'aa'(आ,ஆ, ആ) representing 's' (स्,ஸ்,സ്) or 'r' (र्,ர்,ര്) and the following letter is any vowel or Soft Consonant

Rule : The Visargam ends with vowel sound 'aa' (आ,ஆ, ആ) ,the visargam represents 'S' (स्,ஸ்,സ്) or **'r'** (र्,ர்,ര്) and followed by Vowel 'a' (example1) and Soft Consonant (example 2) , **the Visarga is dropped.**

4.3 <u>All Vowels except a and aa followed by Vowel, Soft Consonant (except r)</u>

Rule: Visarga becomes R

हेतिः + वृणक्तु = हेति वृणक्तु

हेतिः + अस्मान = हेतिरस्मान्

The Visarga sound is ‘e’ other than (a,aa), it is followed by a Soft Consonant in the first example and a Vowel in the second example ;The Visarga becomes ‘r’.

In the second example, r combines with a to become ‘ra’ hence रस्मान्

Let us see some examples with **ee, u, ae, ai, O, au.**

This rule is applied and printed in the books. Reference to Pada Paatam and Kramam helps the student to understand this Visarga rule further.

5 Visargam Rules for Hard Consonants

The Visarga rules for Hard Consonants are not dependent on the Vowel sound of the Visarga. This is normally based the Hard Consonant Letters that follow the Visarga. However, there are few exceptions to make the construction of words smoother with rule changes.

5.1 Visargam followed by Hard Consonant - ka,kha

(क,ख, க,க$_2$ க ஖)

Rule: When the Visarga is followed by a word starting with 'ka, kha,', the visarga is replaced and stressed in recital with a 'kh, while recital. This is referred to as JihvAmUllya in classical text and recognized as a specific sound. (ref PS and PA). The word means produced at the root of the tongue. Ideally this sound should represent the sound of visarga before 'ka, kha'. This is referred to as 'ardha visarga' or 'half visarga' and represented as a vajra symbol.

This sound should not stress the 'K' or 'H' but an intermediate light stress and the sound emanates closer to the place of generation of 'h' and 'k' Refer to your Guru for getting this sound right.

Note: We are used to normally saying 'Kh' with a stress like mahapranam (including the examples we have used kh), the stress of 'kh' that should be avoided. There should not be forceful outflow of air.

This is not printed or printable in books; that is, books print Visargam. Earlier versions of Veda Books use a vajra symbol like two 'u' like symbol one normal and other facing downwards.

Note: Please note that the letter ksha (क्ष, க்ஷ, क्ष) is a joint letter (conjuct consonant) formed by adding kh+sha, क्ष = ख् + ष; க்ஷ = க்2+ ஷ ; क्ष = क् + ष) therefore the rule for 'ka,kha' applies.

In case of any conjunct consonants, the rule applies based on the first letter that forms the base of that consonant letter.

Recital Styles: When "KSha" comes after Visaragam, many Schools especially from Southern India, give a stress for **'kh**' for the Visaragam and also to the '**KSha' sound of the following letter.**

Other style is that the visarga is not dropped, the 'h' is distinctly recited. However, Scholars of some Schools say that the effect of pronouncing two khs or h and kh (as they are closer to each other) is not recital friendly and it distorts the sound effect. So, they give a pause where the Visaragam is present and recite the word starting with the "**KSha**" letter

5.1.1 Exceptions of Internal Sandhi of Words for ka,kha (क,ख, க,க$_2$ ک ख)

Rule: Vowel sounds with 'e' and 'u' are followed by Hard Consonant letter from Ka, Kha or the visarga **is not replaced with kh since they may not give smooth rendering**. The Visaragam is **replaced with "Sh"**. This is more applicable to internal Sandhi of the words that are formed. The Veda books shall not be printed with the source words or Padams as given in the left side of the Table. It is printed with the final derived word as given in the right side of the Table. This is being highlighted as this will aid understanding of Pada Paatam.

(च छ श श₂ ச ஶ)

Rule: When the visaraga is followed by a word starting with 'ca,cha',

(च छ, श श₂, ச ஶ), the visarga is replaced with 's' (श्, ஶ் ශ්).

This rule is incorporated and printed in the books.

5.3 *Visargam followed by Hard Consonant - Ta,Tha*

(ट ठ, ट ट$_{2,}$ ട ഠ)

When the visaraga is followed by a word starting with 'Ta,Tha',

the visarga is replaced with 'Sh'(ष् ഷ് ष्).

This rule is incorporated and printed in the books.

Note: There are no direct examples in the Samhita as these rules are incorporated in the internal sandhi of all words formed with the sound 'ISHTa, ISHTi, ISHTe ,etc'.

5.4 Visargam followed by Hard Consonant - ta,tha

(त थ, त त2 ত থ)

Rule: When the visaraga is followed by a word starting with 'ta,tha,',

(त थ, त त2 ত থ) the visarga is replaced with a 's' (स्,ஸ்,স্) while recital.

Note: when the word 'Ot, follows Visarga 's' replaces the Visarga and becomes stvota.

This rule is incorporated and printed in books for easy rendering for the reader.

5.5 *Visargam followed by Hard Consonant - pa,pha*

(प फ, ப ப2, വ ഫ)

Rule : When the visaraga is followed by a word starting with 'pa,pha,',

(प फ, ப ப2, വ ഫ) the visarga is replaced with an 'ph' (फ्, ப்2, ഫ്)

while recital. This sound is more represented as a letter called "upadhmAnlya" which means blowing. This is used as a substitute for Visagara before pa or Pha. It is also referred to 'ardha visarga' or 'half visarga'. This should be uttered with like 'ph' but not with heavy stress. This is not printed or printable in books. It is printed with a distinct shape in older versions of books.

5.6 Visargam followed by Hard Consonant Sibilants- sa,Sa,Sha

Rule : When the visaraga is followed by a word starting with Sibilants (ऊष्मन्), that is 'sa,Sa,Sha', (स श ष), the visargam gets replaced by corresponding halant letter of the following letter like (s स् ஸ் സ്) (s श्, ஶ் ശ്), (Sh ष् ஷ் ഷ്)

Many books print these without visargam for easy and continuous reading. Our Compilations use both ways of representation depending on the book.

5.7 Other rules involving s,S,Sh (स श ष)

5.7.1 Visarga sound is ‘e’(इ இ ஈ) or ‘u’ उ உ ஊ and followed by) or Ma (म, ம, ம)

Vowel sounds with ‘e’ and ‘u’ are followed by Hard Consonant letters from Ka, Kha or pa, pha, or Ma the visarga **is not replaced with kh or ph or M since they may not give smooth rendering**. **The visargam becomes ‘Sh’.**
Visarga sound is ‘e’ followed by ‘ma’ Visarga becomes ‘Sh’
Visarga sound is ‘u’ followed by ka (hard consonant) Visarga becomes ‘Sh’

This rule must be applied carefully as many places visargam with ‘u’ and ‘e’ becomes ‘r’ or the corresponding kh, ph, m can be used.
Refer to Section 6 which gives examples from PS.

5.7.2 Visargam after letter 'Ta' (ट , ட ഡ) group changes

to 'sh' ष् ஷ் ഷ്)

This is more an internal sandhi during formation of words involving Consonant change rule, 'ta' becomes 'sta', with s for visargam then changes to shTa. It is easy to read it as ISHTA than Ista as per convention and rule. Kindly refer to rules covered in Consonant Sandhi; for vowel sounds other than 'a' and 'aa', the 's' changes to 'Sh'. The OShtau match for 'ta' is 's' and Ta is 'Sh'. This change can be observed even if there is no visargam in the internal sandhi of words.

Example:

6 Rules from PrAtiSAkyam

6.1 Rules from PrAtiSAkyam(PS)

PS details a number of rules with the words involved in Visarga Sandhi.

We have tried to explain **some rules and with illustrative examples.**

Some rules apply under specific conditions. This section is for readers who would like to get into more depth of Visarga Sandhi Rules.Some of the exceptions and rules which have been explained in previous Sections may also get covered.

Note: Where there is a combination of words/padam resulting in one word, the books shall print the derived word after the Sandhi rule.

PS 8.8 visarjanlya becomes 'r' in hvAH, abhAH, vAH, hAH,

(these words have **AH** sound with visaragam; visargam does not get dropped but becomes 'r'.

abibhaH, ajIgaH, akaH, anantaH, vivaH, suvaH, punaH, aharahaH, prAtaH, vastaH, SamitaH, savitaH, sanutaH, stanutaH, stOtaH, hOtaH, pitaH, mAtaH, yaShTaH, eShTaH, nEShTaH,and tvaShTaH. Visargam sound **aH** with visarga as 'r'.
