I had missed some corrections last 2 times. Hopefully this is the final list. All corrections verified with Jagannatha Rao book.

Only one line included with red and brief note indicating correction. What is shown is the version with error

The original UqrdhvaH padam is messed up to ensure good rendering with Baraha. I had corrected this in my local copy. IMHO we should keep original pada and use post processing script (I can help with this) to change such padas

to appear better in Baraha. We shouldn't mix formatting changes with original pada (ennoda thazhnda abiprayam)
