Notes: This first compilation of Taittirlya Upanishad Book in Latin coding has been brought to you for the purpose of learning in this coding especially for those who need Latin coding.

Please give your feedback, comments and report errors to the e-mail id **vedavms@gmail.com.** We shall strive to make this book more accurate and error-free. This books have been transliterated from the latest available Sanskrit version compiled earlier by VedaVMS.

You may note that there are inherent "paata bedhas" when we compare various sources and books. We have made constant reference to the Taittiriya Sakhaa compiled and commented by Shri. Sayanacharya of 13th Century and Shri Bhatta Bhaskaracharya (period unknown). Their manuscript compilations were later converted into books by great Scholars. One of such sets of "Taittiriya" was printed and published during earlier 1900 A.D. at Govt. Branch Press, Mysore and another set later published under "Anandaashram Series". These Books were referred to by us as our primary source material for this Book.

This book has not been prepared with any commercial purpose and is purely for studies. All our compilations are available for free download at our website – <a href="https://www.vedavms.in">www.vedavms.in</a>

#### **Conventions used in Letters:**

```
─ is represented by (gg)
```

✓ –is represented by (gm)

m - is represented as anunaasikam

- represented as avagraha

Kindly get used to some other conventions used in nasal letters and conjuct consonants. The notes given in English words gets converted to Latin codes which kindly take care.
