4 Additional Concepts in Ghana Paatam....21
4.1 Dvipadam 21
4.2 Tri-Kramam....24

Version Notes – Version 1.0 dated October 31,2026
1. Concepts like Dvipadam and trikramam have been explained.
2. Some drafting errors have been corrected to improve language.
3. Control on number of Ghana, Jatai and Krama statements generated are given.

1 Veda Basics – Ghana Paatam

1.1 Introduction:

Our Rishis and compilers of Veda had devised methods to ensure that the Veda is not changed and there is a control. They have designed ways to ensure it is well memorized and assimilated.

The Krishna Yajur Veda has five types of Vedic learning:

1. Samhita Paatam – learning Vedas as they are recited
2. Pada Paatam – learning Vedas with the Padam of each and every word
3. Krama Paatam – a method to learn Veda in a specific order
4. Jata Paatam – a different method of ordering words back and forth
5. Ghana Paatam – a different method of ordering words and reciting.

The Pada Paatam is twice as powerful and effective in relation to Samhita Paatam; Krama paatam is rated four times and Jata Paatam thousand times as per a sloka referred to by scholars. Ghana Paatam is said to have infinite power and effectiveness in relation in Samhita/Vaakya Paatam.

There are other types of Veda Paata (not often practiced by followers of Krishna Yajur Veda)

1. Maala Paataa
2. Shika Paata
3. Dhanta Paata
4. Dwaja Paata

5. Ratha Paata
6. Rekha Paata

The main purpose of these types of studies is to that the Vedas are protected through distinct ways to repeat the contents of the mantra. Any unintended change any of the method will conflict with the type of learning. The learning becomes thorough. The Sruti is well protected to be handed over generations through the word of mouth.

A discussion note/article on Basics of Krama Paatam and JatA Paatam have been uploaded. In this discussion note/article we have taken explaining the basics of Ghana Paatam. Kindly also read the Basics of Veda Swaras first in the Articles page so that the flow of Veda Swaras is understood better. The concepts already covered in these Articles are understood in right context.

1.2 Ghana basics:

The rules or principles of Ghana Paata recital are as follows:

1. Assume there are seven words/Padams in a mantra as a Ruk.

   We will number these words as **1,2,3,4,5,6,7**

2. First, take up Words/Padams 1**,**2**,**3. The recital shall be as follows:

   12,21,123,321,123. In the second set**,** drop 1**,** take **234**

   Recite **23,32,234,432,234**. This continues till the ruk ends.

   A normal Ghana vAkyam/Statement will have 13 padams in general.

First padam 1 occurs 5 times, padam 2 occurs 5 times and padam 3 occurs 3 times.

3. If the statement 4 is a word with two padams **(PS) 4a** and **4b, before taking up 5,6**; it is chanted as **4 iti 4a pause 4b.** The student now grasps the details of the Padams that make this word **4**. This is similar to Krama Paatam/JatA Paatam.
4. If the Padam that is dropped is a Pragraha (PG) or Pragraha Veshtana Padani (PGS), the Padam will be recited distinctly as **4 iti 4** or if it has constituent parts, then as **4 iti 4a pause b,** as in Krama Paatam and JatA Paatam.
5. When the two words 6**,**7 are taken up; the chanting rule (as explained above with three padam combination) cannot be followed; so. it is recited as **67, 76,67.** The flow of the mantra and its word are repeated to memorise the words/padams. This will be identical to JatA statements taking two padams at a time.
6. To indicate that the Ruk has ended a final recital of **7 iti 7 like in Krama Paatam/JatA Paatam.**
7. Then the next Ruk is taken up as in Step 2.
8. All rules relating to normal Veda recital**,** Swaram rules**,** Vowel Sandhi Rules**,** Visarga Sandhi Rules**,** Consonant Sandhi Rules and other grammar rules are applied
9. The Swaram markings and acquisition follow the normal Veda recital rules and is clearly marked in the Pada Paatam.

10. Elongation of rendering is made for the statements where padam is split like in Krama Paatam/JatA Paatam.

2 GaNanaamthvaa Example

Let us see the explanation of Ghana Paata in this chapter with well known mantra “GaNanAm thavA Ganapathim”. Let us take the **first Ruk only**.

2.1 Samhita/Vakyam: TS 2.3.14.3

(ओं) । गणानां त्वा गणपतिꣳ हवामहे कविं कवीना–मुपमश्र–वस्तमं ।

ग3णानान्-त्वा ग3णपतिꣳ हवामहे कविङ्कवीना-

मुपमश्रवस्तमम् ।

ഗണാനാം ത്വാ ഗണപതിꣳ ഹവാമഹേ കവിം കവീനാ–

മുപമശ്രവസ്തമം ।

2.2 Pada breakup or pada pada order

This is actually broken up into words as follows in terms of constituent Padams/words as stated in the Pada Paatam and a serial number is assigned to each padam to initially understand the flow of Ghana paatam:

The Pada paatam spilts the statements as follows.

गणानाम् **(1)**। त्वा **(2)** । गणपतिमिति गण – पतिम् (**गणपतिम्**) **(3)**।

हवामहे **(4)** । कविम् **(5)** । कवीनाम् **(6)** ।

उपमश्रवस्तममित्युपमश्रवः–तमम् (**उपमश्र–वस्तमं**) **(7)** ॥

க3ணானாம் **(1)**। த்வா **(2)** । க3ணபதிமிதி க3ண -- பதிம்
(க3ணபதிம்) (3) PS । ஹவாமஹே **(4)** । கவிம் **(5)** ।
கவீனாம் **(6)** । உபமஶ்ரவஸ்தம-மித்யுபமஶ்ரவ: --
தமம்**(உபமஶ்ரவஸ்தமம்) (7) PS** ॥
ഗണാനാം **(1)** । ത്വാ**(2)** । ഗണപതിമിതി ഗണ – പതിം
(ഗണപതിം) (3) PS । ഹവാമഹേ **(4)** । കവിം **(5)**। കവീനാം **(6)** ।
உபமஶ்ரவஸ்தமமித்யுபமஶ்ரவः – தமம் **(உபமஶ்ரவஸ்தமம்) (7) PS** ॥

2.3 Explanation of the flow of this Ghanam:

Ghana Paata	Notes and Explanations
गणानां त्वा , त्वा गणानां, गणानां त्वा गणपतिं, गणपतिं त्वा गणानां, गणानांत्वा गणपतिं । க3ணானாம் த்வா த்வா க3ணானாம் க3ணானாம் த்வா க3ணபதிம் க3ணபதிம் த்வா க3ணானாம் க3ணானம் த்வா க3ணபதிம் ।	**Statement 1** Padams - 1,2,3 Flow12,21,123,321,123 No Swaram rules/Sandhi rules affect the flow of Padams

Ghana Paata	Notes and Explanations
ഗണാനാം ത്വാ , ത്വാ ഗണാനാം, ഗണാനാന്ത്വാ ഗണപതിം, ഗണപതിം ത്വാ ഗണാനാം, ഗണാനാന്ത്വാ ഗണപതിം ।	
त्वा गणपतिं, गणपतिं त्वा, त्वा गणपतिꣳ हवामहे, हवामहे गणपतिं त्वा , त्वा गणपतिꣳ हवामहे त्वा क३णपतिम् क३णपतिम् त्वा त्वा क३णपतिꣳ हवामहे हवामहे क३णपतिम् त्वा त्वा क३णपतिꣳ हवामहे । त्वा गणपतिं, गणपतिं त्वा, त्वा गणपतिꣳ हवामहे, हवामहे गणपतिं त्वा , त्वा गणपतिꣳ हवामहे ।	**Statement 2** Padams – 2,3,4 Flow 23,32,234,432,234 'M' becomes ꣳ before 'ha'. There is no change in Swarams. 'tvA' has no swaram in Vaakyam. It is rendered in full anudAttam at start as in Pada Paatam.

Ghana Paata	Notes and Explanations
गणपतिꣳ हवामहे, हवामहे गणपतिं , गणपतिꣳ हवामहे कविं, कविꣳ हवामहे गणपतिं गणपतिꣳ हवामहे कविं , क३णपतिꣳ हवामहे हवामहे क३णपतिम् क३णपतिꣳ हवामहे कविम् कविꣳ हवामहे क३णपतिम् क३णपतिꣳ हवामहे कविम् । गणपतिꣳ हवामहे, हवामहे गणपतिं , गणपतिꣳ हवामहे कविङ्, कविꣳ हवामहे गणपतिं , गणपतिꣳ हवामहे कविं ।	**Statement 3** Padams 3,4,5 Flow 34,43,345,543,345 'M' becomes ꣳ before 'ha'. There is no change in Swaram as all words follow from vakyam.
गणपतिमिति गण – पतिं >। क३णपतिमिति क३ण -- पतिम् > ।	**Statement 4** Padam 3 Ganapathim is going to be dropped. So at last the padam is rendered as Word iti

Ghana Paata	Notes and Explanations
ഗണപതിമിതി ഗണ – പതിം > । 'iti' which is joined to explain Padam into Parts has 'ti' as Swaritam as a rule. So the 'ti' of gaNapathi acquires anudAttam before mi (anudAttam) and 'ti' becomes swaritam	padam1 – padam2. 3 iti 3a-3b **(PS)** Same as in Krama paatam/JatA Paatam. Anuswaram of **patim** has lower swaram, therefore 'm' will be extended. PS creates one additional Ghana vAkyam as in Kramam/Jatai/Ghanam
हवामहे कविं, कविꣳ हवामहे, हवामहे कविं कवीनां , कवीनां कविꣳ हवामहे,हवामहे कविं कवीनाम् । ഹവാമഹേ കവിം കവിꣳ ഹവാമഹേ ഹവാമഹേ കവിം കവീനാം കവീനാം കവിꣳ ഹവാമഹേ ഹവാമഹേ കവിം കവീനാം ॥	**Statement 5** Padams 4,5, 6 Flow 45,54,456,654,456 'M' becomes ꣳ before 'ha'. Havamahe has no swaram but when it starts as the first word acquires full lower swaram like in Krama patam for the first combination. Then rendered normally. Since ka in Kavim(gm) starts with anudAtta, vigm is udAttam so ha as the third letter acquires a swaritam.

Ghana Paata	Notes and Explanations
ഹവാമഹേ കവിം, കവിഗ്ം ഹവാമഹേ, ഹവാമഹേ കവിം കവീനാങ്, കവീനാങ് കവിഗ്ം ഹവാമഹേ, ഹവാമഹേ കവിങ് കവീനാം ।	Similar rule for ka in kavinaam after kavim
कविं कवीनां, कवीनां कविं, कविं कवीना- मुपमश्र-वस्तम,मुपमश्र-वस्तमं कवीनां कविं, कविं कवीनामुपमश्र-वस्तमं കവിം കവീനാം കവീനാം കവിം കവിം കവീനാ മുപമശ്രവസ്തമ- മുപമശ്രവസ്തമം കവീനാം കവിം കവിം കവീനാ മുപമശ്രവസ്തമം । കവിങ് കവീനാങ്, കവീനാം കവിങ്, കവിം കവീനാ-മുപമശ്ര-വസ്തമ,- മുപമശ്ര-വസ്തമങ് കവീനാം കവിങ്, കവിങ് കവീനാമുപമശ്ര-വസ്തമം ।	**Statement 6** Padams 5,6,7 Flow 56,65,567,765,567 'ka; in kavinaam get svaritam as it follows vim which is udAttam, since the third letter before it is anudAttam in 'ka' and vi marked in yellow. 'mu' marked in green similarly gets swaritam ,prior nA is udAttam and preceding vi of kavinaam anudAttam.

Ghana Paata	Notes and Explanations
कवीना–मुपमश्र–वस्तम, मुपमश्र–वस्तमं कवीनां, कवीनामुपमश्रवस्तमं । கவீனா முபமஶ்ரவஸ்தம முபமஶ்ரவஸ்தமம் கவீனாம் கவீனா முபமஶ்ரவஸ்தமம் । कवीना–मुपमश्र–वस्तम,– मुपमश्र–वस्तमं कवीनाङ्, கவீனா–முபமஶ்ரவஸ்தமம் ।	**Statement 7** We have only Padams 67 left. So the padams are 67 Flow is 67,76,67 Ka and Vi acquire lower swaram in as marked in Pada Paatam as pracaya. Swaram acquisition of 'mu' as per the previous rendering of 567
उपमश्रवस्तम मित्युपमश्रवः – तमं >। உபமஶ்ரவஸ்தம மித்யுபமஶ்ரவ: - தமம் > உபமஶ்ரவஸ்தமமித்யுபமஶ்ரவ: – தமம >।	**Statement 8** This a PS – padam split The Ruk ends. The last Padam **7 iti 7a ---7b.** Same rule as in Krama Paatam/JatA Paatam.'m' requires elongated rendering.

2.4 Number of Ghana vAkyams/Statements generated

Ruk 1 – There are **7 padams** which includes **2 PS** (padam spilt ganapatim and upamasravastamam) so it should generate number of padam plus two PS = 9 statements. The last padam if it were a normal padam, we would have repeated it separately. So, if the last padam is a padam with split (PS) or (PG) or (PGS), one statement will be generated less.
Therefore, the formula is number of padams 7 + padam splits (PS) 2 + pragraha padam (PG) 0 + pragraha padam split (PGS) 0 – minus number of last padam which is a PS or PG or PGS 1 = 9-1 = 8 Ghana vAkyams /statements.

If you compare the total statements(vAkyams) generated for this Ruk, in all the three types of recitals, namely, Krama, JatA and Ghana Paatams, they are same at 8.

Important Notes:

1. The Words are split as per the rule explained for convenience of the reader to understand the concept.
2. Words shall be taken together to make the rendering smooth e.g. kavInaang-kavInaam as in 5th row in the table.
3. Please note rules of Visarga Sandhi, Vowel Sandhi, joining words and related grammar rules are all applied while rendering.

3 Other Examples

In this Section we are highlighting the changes that occur during recital taking samples from the Ghanam Chapter of Shanti Japam book. Students must note that these are only samples and not exhaustive. This is to familiarise them with some important grammar/veda recital rules. Students who have already learnt Rudram must read/study our Rudra Ghanam book in Section 1 of our website. (Books by Subject)

3.1 JeevaathuScha Me (Ref 37.1)

1. मे जीवातु, जीवातु मे, मे जीवातुश्च,

1.. മേ ജീവാതുർ, ജീവാതുർ മേ, മേ ജീവാതുശ്ച,

1. മേ ജീവാതുർ, ജീവാതുർ മേ, മേ ജീവാതുശ്ച

Notes: Words used are **mE, JIvAthu: , ca**

a) jIvAthu**:** becomes jIvAthur when followed by jI and mE as per visarga sandhi rule for sound ‘u’

b) jIvAthu**:** + **ca** becomes jIvAtuSca me (Visarga Sandhi for hard consonant ca)

3.2 JeevaathuScha Me (Ref 37.1 & 37.1)

3. च मे, मे च, च मे दीर्घायुत्वं, दी॑र्घायुत्वं

3. ச மே, மே ச, ச மே தீ3ர்கா4யுத்வம், தீ॑3ர்கா4யுத்வம் மே॑

3. ച മേ, മേ ച, ച മേ ദീർഘായുത്വം, ദീ॑ർഘായുത്വം മേ

28. च मे, मे च, च मे,

28. ச மே, மே ச, ச மே

28. ച മേ, മേ ച, ച മേ

Notes:

a) The first dheergayutvam as a rule starts in lower swarm till 'yu' which precedes udAttam 'tvam' the next dhee as a letter after udAttam acquires swaritam, but becomes dheerga swaritam due to following joint letter 'rgha'. This is also due to all previous padams ca and me being in anudAttam. It continues like pracAya rule.

b) Ca, mE has lower notes always in Pada Paatam. When rendering ca,me,me,ca,ca,me in 37.3 it is rendered normally. It comes at the end in 37.28 and the last '**me'** (marked in green) needs to be extended as in Krama paatam.

3.3 JeevaathuScha Me (Ref 37.1)

8. मेऽनमित्र, मनमित्रं मे, मे ऽनमित्रं च, चा नमित्रं मे,

8. மேऽநமித்ர, மநமித்ரம் மே, மே ऽநமித்ரஞ்ச, சா நமித்ரம் மே,

8. മേऽനമിത്ര, മനമിത്രം മേ, മേ ऽനമിത്രം ച, ചാ നമിത്രം മേ,

Notes:

a) 'a' in anamitram becomes avagraha when preceded by 'mE' (ae sound) (marked in blue.)
b) Anamitram+anamitram becomes manamitram (marked in yellow). Simple sandhi of m+a.
c) Ca + anamitram becomes chA namitram (Vowel sandhi of a+a='aa' sound) marked in green (vowel sandhi)

3.4 SarvebhyO vai kamebhyaH (Ref 37.8)

7. तद् यजमाना, यजमाना स्तत्

7. தத்$_3$ யஜமானா, யஜமானா ஸ்தத்,

7. തദ് യജമാനാ, യജമാനാ സ്തത്

Note:

a) The words are tat, yajamAnA:
b) **"tat"** becomes **tad** due to Consonant Sandhi Rule (Discussed in a separate article)
c) The Visagaram after first yajamAnA**:** gets dropped followed by soft consonant as per Visarga Sandhi rule since the vowel sound is 'A'.

d) The ‘tat’ becomes ‘stat’ as the ‘ta’ follows the visargam of second yajamAnA**: .**

3.5 Ta EvAsmin Ayur (Ref 37.12)

Let us take the first three words of this Ghanam

त एवास्मिन् (त(ते) *एव* अस्मिन्)

த ஏவாஸ்மின்ன் (த(தே) **ஏவ அஸ்மின்ன்**)

ത ഏവാസ്മിന് (ത(തേ) ഏവ അസ്മിന്

Rendered as

त एवै व ते त एवास्मिन्नस्मिन्न

த ஏவை வ தே த ஏவாஸ்மின்ன-ஸ்மின்

ത ഏവൈ വ തേ ത ഏവാസ്മിന്നസ്മിന്നേ

Notes:

1. It is ‘ta,(1)aeva(2),aeva(2),te (1)te,(1) aeva(2) asmin.(3)..(3)
2. We start with **‘ta’** instead of ‘**te’** because the following word is a vowel ‘ae’ as per Vowel Sandhi.
3. ‘vai’ in green is derived by adding the va and ae, vowel sandhi sound ‘**a’** combines with **‘ae’** to give ‘ai’
4. The ‘va’ that is left after ae in aeva is recited as it is;
5. First ‘te’ is recited as it is and the next one becomes ‘ta’ due to following vowel ae.
6. In Eva +asmin, a+a generates ‘aa’ as per vowel sandhi.
7. In Asmin+asmin, n+a produces ‘nna’ becomes asminnasminn.. ‘n’ doubles when followed by vowel – Consonant Sandhi Rule

3.6 No double usage of Vowel 'A'

This is from the second Ruk of GaNAnAm Thva mantra.

Let us take the rendering with word combination - **pata, A, na:**

(पते । आ । नः), (பதே । ஆ । நः), (పతే । ఆ । నః)

पत आ ~~आ~~ पतेपत आनोन आपते पत आ नः ।

பத ஆ ~~ஆ~~ பதே பத ஆ நோ ந ஆபதே பத ஆ நः ।

పత ఆ ~~ఆ~~ పతేపత ఆ నో న ఆపతే పత ఆ నః ।

Notes:

a) Two Vowels donot combine when it is ae and A. A+A is also A ,the second 'aa' is actually dropped during recital as its effect has come in. Shown as double strike.
b) **'pate'**.. the 'ae' sound becomes 'a'- pata before vowel 'aa' but retained as **pate** before next '**pata**'. which has 'aa' following it. Marked in blue
c) **na:** followed by **na:** becomes **nona**. Visarga sandhi rule for **a:** becomes **'O'** (marked in Green).
d) The second **na:** has visargam dropped since it is followed by a Vowel 'A'. Marked in yellow.
e) The Ghana paata combinations (Sandhis) can be very continuous and interesting and a User appreciates these as one learns the Sandhi Rules.

4 Additional Concepts in Ghana Paatam

4.1 Dvipadam

Dvipadam is when two **identical padams**, which match both in **varna and swara**, come in one after another at the end of the Ruk, it is repeated only twice as defined in JatA Paatam. But there are two schools of rendering as we listen to Ghana paaraayaNa. Let us see the example from Padams of TS 4.5.2.1 Rudram anuvAkam 2

पु॒ष्टाना॑म् । पत॑ये । नमः॑ । नमः॑ । भव॑स्य । हे॒त्यै ।

പു॒ഷ്ടാനാ॑ം । പത॑യേ । നമ॑: । നമ॑: । ഭ4വ॑സ്യ । ഹേ॒ത്തൈ ।

പു॒ഷ്ടാനാ॑ം । പത॑യേ । നമഃ । നമഃ । ഭവ॑സ്യ । ഹേ॒ത്യൈ ।

The first three padams give a flow which is normal

36. पु॒ष्टाना॑म् । पत॑ये । नमः॑ ।

पु॒ष्टाना॑ं पत॑ये पत॑ये पु॒ष्टाना॑ं पु॒ष्टाना॑ं पत॑ये नमो॒ नम॒ स्पत॑ये पु॒ष्टाना॑ं

पु॒ष्टाना॑ं पत॑ये नमः॑ ।

36. പു॒ഷ്ടാനാ॑ം । പത॑യേ । നമ॑: ।

പു॒ഷ്ടാനാ॑ം പത॑യേ പത॑യേ പു॒ഷ്ടാനാ॑ം പു॒ഷ്ടാനാ॑ം പത॑യേ

നമോ॒ നമ॒ സ്പത॑യേ പു॒ഷ്ടാനാ॑ം പു॒ഷ്ടാനാ॑ം പത॑യേ നമ॑: ।

36. പുഷ്ടാനാം । പതയേ । നമഃ ।

പുഷ്ടാനാം പതയേ പതയേ പുഷ്ടാനാം പുഷ്ടാനാം പതയേ
നമോ നമ സ്പതയേ പുഷ്ടാനാം പുഷ്ടാനാം പതയേ നമഃ ।

This is in order in the normal flow with pushtAnAm | pataye | namaH.

In the next one it is **not pataye | namaH | ~~namaH;~~** If the dvipadam occurs, third padam which is duplicate/identical to second one is dropped.
First some schools repeat it as JatA but add a seventh padam namaH to indicate that an upcoming dvipadam is there.

It is recited as similar to JatA Paatam by other schools which is given in brackets with a note as Paata Bhedam.

37. पतये । नमः ।

पतये नमो नम स्पतये पतये नमो नमः ।

(पतये नमो नम स्पतये पतये नमः ।) – **Paata Bedam**

37. பதயே । நம: ।

பதயே நமோ நம ஸ்பதயே பதயே நமோ நம: ।

(பதயே நமோ நம ஸ்பதயே பதயே நம: ।) - Paata Bhedam

37. పతయే । నమః ।

పతయే నమో నమ స్పతయే పతయే నమో నమః ।

(పతయే నమో నమ స్పతయే పతయే నమః ।) – **paata bedam**

This dvipadam statement uses namaH | namaH without adding Bavasya as third padam

38. नमः । नमः ।

नमो नमः ।

38. நம: । நம: ।

நமோ நம: ।

38. നമഃ । നമഃ ।

നമോ നമഃ ।

Now the flow continues normally with namaH | Bavasya | hEtyai

39. नमः । भवस्य । हेत्यै ।

नमो भवस्य भवस्य नमो नमो भवस्य हेत्यै हेत्यै भवस्य नमो नमो भवस्य हेत्यै ।

39. நம: । ப4வஸ்ய । ஹேத்யை ।

நமோ ப4வஸ்ய ப4வஸ்ய நமோ நமோ ப4வஸ்ய ஹேத்யை ஹேத்யை ப4வஸ்ய நமோ நமோ ப4வஸ்ய ஹேத்யை ।

39. नमः । भवस्य । हेतॆ्य ।

നമോ ഭവസ്യ ഭവസ്യ നമോ നമോ ഭവസ്യ ഹേതൈ്യ

ഹേതൈ്യ ഭവസ്യ നമോ നമോ ഭവസ്യ ഹേതൈ്യ ।

Note: Some Scholars indicated that this **seven padam** Ghana statement is used specifically to indicate upaya namaskaram (salutation at the beginning and end in many of the statements in anuvAkam during recital of Rudra Ghanam.
So we may have two pada Ghana vAkyams, six pada Ghana vAkyam, seven pada Ghana vAkyam as per the method followed.

4.2 <u>Tri-Kramam</u>

This are instances where the Ghana vaakyam will **use four successive padams** instead of standard three successive padams in a statement. This is similar to the example we have seen in JatA Paatam.
Let us take an example of Padams from TS 1.1.2.2 JatA Paatam, but we take five padams in sequence which are:

ते । मा । आ (एति) । स्थात् । इन्द्रस्य ।

തേ । മാ । ആ (ഏതി) । സ്ഥാ2ത് । ഇന്ദ്3ര്സ്യ ।

തേ । മാ । ആ (ഏതി) । സ്ഥാത് । ഇന്ദ്രസ്യ ।

When the first three padams are taken, like a standard Ghana

ते । मा । आ (एति) । ,ते । मा । ആ । തേ । മാ । ആ (ഏതി) ।

it results in ते मा मा ते ते मा मा ते ते मा

തേ മാ മാ തേ തേ മാ മാ തേ തേ മാ

തേ മാ മാ തേ തേ മാ മാ തേ തേ മാ

This will not give a clear idea of the constituent padams since mA + A is mA both are udAttams resulting in an udAttam 'mA'. So, four padams are taken up and recited as follows:

24) 1.1.2.2(21)– ते । मा । आ । स्थात् ।

ते मा मा ते ते मा ऽऽस्थाथ् स्थादा मा ते ते मा ऽऽस्थात् ।

24) 1.1.2.2(21)- തേ । മാ । ആ । സ്താ$_2$ത് ।

തേ മാ മാ തേ തേ മാ ऽऽസ്താ$_2$ത്$_2$ സ്താ$_2$താ$_3$ മാ തേ തേ മാ ऽऽസ്താ$_2$ത് ।

24) 1.1.2.2(21)– തേ । മാ । ആ । സ്ഥാത് ।

തേ മാ മാ തേ തേ മാ ssസ്ഥാഥ് സ്ഥാദാ മാ തേ തേ മാ ssസ്ഥാത് ।

Since te is dropped and we start with mA + A which is a set resulting in same sound, so next two more padams are taken and again Ghana is made of four padams.

25) 1.1.2.2(22)– मा । आ । स्थात् । इन्द्रस्य ।

मा ऽऽस्थाथ् स्थादा मा मा ऽऽस्थादिन्द्रस्ये न्द्रस्य स्थादा मा मा ऽऽस्थादिन्द्रस्य ।

25) 1.1.2.2(22)- மா । ஆ । ஸ்தா$_2$த் । இந்த்$_3$ர்ஸ்ய ।

மா ऽऽஸ்தா$_2$த்$_2$ ஸ்தா$_2$தா$_3$ மா மா ऽऽஸ்தா$_2$தி$_3$ந்த்$_3$ரஸ்யே ந்த்$_3$ர்ஸ்ய ஸ்தா$_2$தா$_3$ மா மா ऽऽஸ்தா$_2$தி$_3$ந்த்$_3$ர்ஸ்ய ।

25) 1.1.2.2(22)– മാ । ആ । സ്ഥാത് । ഇന്ദ്രസ്യ ।

മാ ssസ്ഥാഥ് സ്ഥാദാ മാ മാ ssസ്ഥാദിന്ദ്രസ്യേ ന്ദ്രസ്യ സ്ഥാദാ മാ മാ ssസ്ഥാദിന്ദ്രസ്യ ।

Now the Ghana will follow the normal three padam route.

26) 1.1.2.2(23)– आ । स्थात् । इन्द्रस्य ।

आ स्थाथ् स्थादा स्थादिन्द्रस्ये न्द्रस्य स्थादा स्थादिन्द्रस्य ।

26) 1.1.2.2(23)- ஆ । ஸ்தா$_2$த் । இந்த்$_3$ர்ஸ்ய ।

ஆ ஸ்தா$_2$த்$_2$ ஸ்தா$_2$தா$_3$ ஸ்தா$_2$தி$_3$ந்த்$_3$ரஸ்யே ந்த்$_3$ர்ஸ்ய ஸ்தா$_2$தா$_3$ ஸ்தா$_2$தி$_3$ந்த்$_3$ர்ஸ்ய ।

26) 1.1.2.2(23)– ആ । സ്ഥാത് । ഇന്ദ്രസ്യ ।

ആ സ്ഥാഥ് സ്ഥാദാ സ്ഥാദിന്ദ്രസ്യേ ന്ദ്രസ്യ സ്ഥാദാ സ്ഥാദിന്ദ്രസ്യ ।

This specially occurs when a padam with ending udAttam ‘A’ sound is followed by preposition ‘A’ whichis udAttam creating the need for remembering a additional padam step in a Ghana vAkyams with four padams in two statements. 1234,2345,and then 345 though the sound is hidden. These statements shall have 16 or 18 padams though some sounds are merged in the A+A .

==========

Notes:

1. The grammatical treatment of a set of two padams in JatA and three padams in Ghana may be sometimes different due to special rules.

2. Formation of avagrahas is subject to special Paddhatis that are followed. There are specific SIKSha rules for formation of avagraha.

3. There are specific SIkShAs for Jatai and Ghanam like JatA Mani, JatA DarpaNam, Ghana Darpanam and there are guide books like Ghana Sandi (available in VedaVMS site in SIkShA page) and Ghana sAra (available with only some vedic students/scholars for reference)

1. **Kindly don't use our books to recite Ghana Paatam if you have not learnt it from a qualified Guru. You may use it to follow and understand the flow of Ghana Paatam. Complete Krishna yajur veda samhita Ghana pada audio is available in www.archieves.org**
