3.4 Further notes and Explanations 29
4 Additional Concepts in JatA Paatam 31
4.1 Dvipadam 31
4.2 Tri-Kramam 31

Version Notes – Version 1.0 dated October 31,2026
1. Concepts like Dvipadam and trikramam have been explained.
2. Some drafting errors have been corrected to improve language.
3. Control on number of Ghana, Jatai and Krama statements generated are given.

1 Veda Basics – Jata Paatam

1.1 Introduction:

Our Rishis and compilers of Veda had devised methods to ensure that the Veda is not changed and there is a control. They have designed ways to ensure it is well memorized and assimilated.

The Krishna Yajur Veda has five types of Vedic learning:

1. Samhita/Vaakyam Paatam – learning Vedas as they are recited
2. Pada Paatam – learning Vedas with the Padam of each and every word
3. Krama Paatam – a method to learn Veda in a specific order
4. Jata Paatam – a different method of ordering words back and forth
5. Ghana Paatam – a different method of ordering words and reciting.

The Pada Paatam is twice as powerful and effective in relation to Samhita Paatam; Krama paatam is rated four times and Jata Paatam thousand times as per a sloka referred to by scholars. Ghana Paatam is said to have infinite power and effectiveness in relation in Samhita/Vaakya Paatam.

There are other types of Veda Paata (not practiced by followers of Krishna Yajur Veda)

1. Maala Paataa
2. Shika Paata
3. Dhanta Paata
4. Dwaja Paata
5. Ratha Paata

6. Rekha Paata

The main purpose of these types of studies is to that the Vedas are protected through distinct ways to repeat the contents of the mantra. Any unintended change any of the method will conflict with the type of learning. The learning becomes thorough. The Sruti is well protected to be handed over generations through the word of mouth.

We shall concentrate on Jata Paatam in this note and it becomes easier when one understands/studies the Pada paatam. Kindly **read Basics of Krama Paatam before reading this Article** as many concepts are explained there. A reading of the Article on Basics of Veda Swaras will help immensely in understanding swara flow in a statement.

1.2 Jata Paatam basics:

The rules or principles of Jata Paata recital are as follows:

1. Assume there are seven Padams/words in a mantra as a Ruk.
   We will number these words as 1,2,3,4,5,6,7
2. First take words 1 & 2 and recite them as **12 , 21 ,12**
3. Then drop 1, take 2 and 3 recite **23, 32, 23** .. (and continue this till the statement (Ruk) is over.)
4. If the Padam 4 is a word with two padams **4a** and **4b as in a PS**, **before taking up 5,6**; it is chanted as **4 iti 4a pause 4b.** The student now grasps the details of the Padams that make this word **4**.

5. If the Padam that is dropped is a Pragraha (PG) or Pragraha Veshtana Padani (PGS), the Padam will be recited distinctly as **4 iti 4** or if it has constituent parts, then as **4 iti 4a pause b.**
   To indicate that the Ruk has ended a final recital of **7 iti 7.**
6. Each of the Jata vAkyam will have 6 padas by default unless special rules apply.
7. Then the next Ruk is taken up as in Step 2. (as indicated in 3 above also)
8. All rules relating to normal Veda recital, Swaram rules, Vowel Sandhi Rules, Visarga Sandhi Rules, Consonant Sandhi Rules and other grammar rules are applied.
9. The Swaram markings and acquisition follow the normal Veda recital rules.
10. Rules like dropping one 'A' (letter 'aa'), if they follow each other.

1.3 Elongation of rendering

The rendering needs to be extended/elongated for the
last part of the word/padam, when it is

1) a Dheerga Swaritam or Anudatta Swaram **and**

the letter is

2a) a Dheerga letter (e.g. aa, ee, O,) **or**

2b) a Anuswaram (letters ending as tam, sam, sham etc. with a dot in Sanskrit).

This is indicated through a **">"** (arrow pointing to the right in our books for convenience of readers). Kindly note there are slight differences in the Font size/format of Sanskrit, Malayalam and Tamil texts. The Method of elongation varies between few schools in actual practice. Please refer to your Guru for

further clarifications on rendering if the school is different from the concepts or flow that is explained.

1.4 Swaram Acquisition

1. In Jata Paatam, the last aksharam in any of the rendering cannot be an anudAttam (lower swaram) unless the last padam or word is fully marked in anudAttam.
2. Rules of gm, gg needs to be applied when combining words ending in Anuswaram.
3. Generic Swaram rule is that there is an udAttam letter, the previous letter shall be an anudAttam assigned to a letter in a word, and the next one following the udAttam shall be a Swaritam. This rule applies across two Padams or words. Kindly read our Article 01- Basics of Veda Swaras before reading this Article.
4. Any number of udAttams may be formed through Rule and they donot generally acquire swaram, unless special Swaritams are formed.
5. There are words that do not acquire swaram as per Pada Paatam (like Sam, dyau, yAH) and Vedic grammar rules from Sages, especially Sage pAnini.

Note:

1. **Letter marked in Green have Swaritam or Dheerga Swaritam (third letters in a pattern)**

2. **The previous letter is UdAttam (medium note)**
3. **Letter prior to it marked in yellow shall be generally acquire AnudAttam (lower note)**

This is only one of the major rules. Readers should not construed that it is universally applicable everywhere. The swaram shifts to a previous or next letter if an intented letter, cannot acquire swaram. Similarly, if two successive letters acquire swaritam, one will be dropped, subject to some rules. Sometimes a kampam may be formed with two swaritams following one another with a partial recital of anudAttam between them.

A Discussion note on Swaram acquisition principles have been provided after initial study, in our Article 11 – Basics of Veda- Pada Paatam

This Article covers Swaram rules also.

2 GaNanaamthvaa Example

Let us see the explanation of Jata Paata with well known mantra “GaNanAm thavA Ganapathim”

2.1 Samhita/Vakyam: TS 2.3.14.3

(ओं) । गणानां त्वा गणपतिꣳ हवामहे कविं कवीना–मुपमश्र–वस्तमं ।
ज्येष्ठराजं ब्रह्मणां ब्रह्मणस्पत आनꣳशृण्वन्नूतिभिः सीद सादनं ॥

ക3ണാനാന്ത്വാ ക3ണപതിꣳ ഹവാമഹേ കവിങ്കവീനാ-
മുപമശ്രവസ്തമം । ജ്യേഷ്ട2രാജം ബ്ര3ഹ്മണാം
ബ്ര3ഹ്മണസ്പത ആ നഃ ശ്രുണ്വന്നൂതിഭി4: സീദ3 സാദ3നം ।

ഗണാനാം ത്വാ ഗണപതിꣳ ഹവാമഹേ കവിം കവീനാ–
മുപമശ്രവസ്തമം । ജ്യേഷ്ഠരാജം ബ്രഹ്മണാം ബ്രഹ്മണസ്പത ആ
നഃ ശൃണ്വന്നൂതിഭിഃ സീദ സാദനം ।

2.2 Pada breakup or Pada Paata order

This is actually broken up into words as follows in terms of constituent Padams as per SamhitA Pada Paatam and a serial number to initially understand the flow of JatA paatam:

The Pada paatam spilts the statements as follows.

गणानाम् **(1)**। त्वा **(2)** । गणपतिमिति गण – पतिम् (**गणपतिम्**) **(3)**।

हवामहे **(4)** । कविम् **(5)**। कवीनाम् **(6)** ।

उपमश्रवस्तममित्युपमश्रवः–तमम् (**उपमश्र–वस्तमं**) **(7)** ॥

ज्येष्ठराजमिति ज्येष्ठ–राजम् (**ज्येष्ठराजं**) **(1)** । ब्रह्मणाम् **(2)** । ब्रह्मणः **(3)** ।

पते **(4)**। एति (**आ**) **(5)** । नः **(6)** । शृण्वन्न् **(7)**। ऊतिभिरित्यूति – भिः

(**ऊतिभिः**) **(8)** । सीद **(9)** । सादनम् **(10)** ॥

க$_3$ணானாம் **(1)**। த்வா **(2)** । க$_3$ணபதிமிதி க$_3$ண -- பதிம்

(**க$_3$ணபதிம்**) **(3) PS** । ஹவாமஹே **(4)** । கவிம் **(5)** ।

கவீனாம் **(6)** । உபமஶ்ரவஸ்தம-மித்யுபமஶ்ரவ: --

தமம்(**உபமஶ்ரவஸ்தமம்**) **(7) PS** ॥

ஜ்யேஷ்ட$_2$ராஜமிதி ஜ்யேஷ்ட$_2$ --ராஜம் (**ஜ்யேஷ்ட$_2$ராஜம்**) **(1) PS** ।

ப்$_3$ரஹ்மணாம் **(2)** । ப்$_3$ரஹ்மண: **(3)** । பதே **(4)** । ஏதி (**ஆ**) **(5)** ।

ந: **(6)**। ஶ்ருண்வன்ன் **(7)** । ஊதிபி$_4$ரித்யூதி -- பி$_4$: (ஊதிபி$_4$:)**(8)PS** ।

ஸீத$_3$ **(9)** । ஸாத$_3$னம் **(10)** ॥

ഗ॒ണാനാ॑ം **(1)** । ത്വാ**(2)** । ഗ॒ണപ॑തിമിതി ഗ॒ണ – പ॒തിം
(ഗ॒ണപ॑തിം) (3) PS । ഹ॒വാമ॑ഹേ **(4)** । ക॒വിം **(5)**। ക॒വീനാം **(6)** ।
ഉ॒പ॒മശ്ര॑വസ്തമമിത്യു॑പ॒മശ്ര॑വഃ – ത॒മം **(ഉ॒പ॒മശ്ര॑വസ്തമം) (7) PS** ॥
ജ്യേ॒ഷ്ഠ॒രാ॒ജമിതി॑ ജ്യേ॒ഷ്ഠ – രാ॒ജം **(ജ്യേ॒ഷ്ഠ॒രാ॒ജം) (1) PS** ।
ബ്രഹ്മണാം **(2)**। ബ്ര॒ഹ്മ॒ണഃ **(3)** । പ॒തേ **(4)** । ഏതി॑ **(ആ) (5)** ।
ന॒ഃ **(6)**। ശൃ॒ണ്വന്ന് **(7)**। ഊ॒തിഭി॒രിത്യൂ॒തി – ഭി॒ഃ
(ഊ॒തിഭി॑ഃ) (8) PS । സീ॒ദ **(9)**। സാ॑ദനം **(10)** ॥

2.3 <u>Explanation of the flow of this Jata PAta:</u>

Jata Paata	Notes and Explanations
(ओं) गणानाम् त्वा त्वा गणानाम् गणानाम् त्वा क३णानाम् त्वा त्वा क३णानाम् क३णानाम् त्वा गणानाम् त्वा त्वा गणानाम् गणानाम् त्वा	**Statement No: 1** OM just added as a start is optional. Padams/Words taken 1 & 2 Flow - 12-21-12 There is no change is swaras it is as per vaakyam.

त्वा गणपतिम् गणपतिम् त्वा त्वा गणपतिम् த்வா கணபதிம் கணபதிம் த்வா த்வா கணபதிம் ത്വാ ഗണപതിം ഗണപതിം ത്വാ ത്വാ ഗണപതിം	**Statement No: 2** Padams/Words taken 2 & 3 Flow – 23-32-23 Normally words or padam without any swaram in the Vakyam gets lower swaram (anudAtta) in Pada Padam when taken up for recital first in a step. Here 'tvA' acquires anudAttam.
गणपतिꣳ हवामहे हवामहे गणपतिम् गणपतिꣳ हवामहे கணபதிꣳ ஹவாமஹே ஹவாமஹே கணபதிம் கணபதிꣳ ஹவாமஹே ഗണപതിꣳ ഹവാമഹേ ഹവാമഹേ ഗണപതിം ഗണപതിꣳ ഹവാമഹേ	**Statement No: 3** Padams/Words taken 3 & 4 Flow – 34,43,34 'M' becomes ꣳ due to following word with 'ha'. No swaram change rendering as per vaakyam. No rules come in.

गणपतिमिति गण–पतिम् । க3ணபதிமிதி க3ண -- பதிம் ഗണപതിമിതി ഗണ–പതിം	**Statement No: 4** Padam 3 is going to be dropped. But it has two padams **Gana + pathim (PS)**; So we are reminded that the word is **3 iti 3A – 3B**. Now wherever the padam is split indicated by --- a pause needs to be given for recital. Since the last part patim ends with a Anuswaram and a lower note, the **'m'** is extended during recital. This concept/rule is same as in Krama and Ghana Paatam.
हवामहे कविम् कविꣳ हवामहे हवामहे कविम् ஹவாமஹே கவிங் கவிꣳ ஹவாமஹே ஹவாமஹே கவிம் ഹവാമഹേ കവിം കവിꣳ ഹവാമഹേ ഹവാമഹേ കവിം	**Statement No: 5** Now we continue Padams/words 4/5 Flow 45,54,45 Note 'havAmahE' gets anudAtta swaram since it has no swaram in vaakyam, it will be recited as anudAttam when it is taken up first as in Pada Paatam. 'ha' in havAmahE takes swaritam to support udAttam vi(gm) in kavi(gm) and ka in kavim has acquired anudattam.

कविम् कवीनाम् कवीनाम् कविम् कविम् कवीनाम् கவிங் கவீனாங் கவீனாங் கவிங் கவிங் கவீனாம் கவிம் கவீநாம் கவீநாம் கவிம் கவிம் கவீநாம்	**Statement No: 6** Padams/Words 5/6 Flow 56,65,56 There is no change in swaram and it is as per vaakyam. As per Vaakyam 'ka' acquires Swaritam based on the previous udAttam **vim** which is supported by anudAttam 'ka'
कवीना मुपमश्रवस्तम मुपमश्रवस्तमम् कवीनाम् कवीनामुपमश्रवस्तमम् கவீனா முபமஶ்ரவஸ்தம முபமஶ்ரவஸ்தமம் கவீனாம் கவீனா முபமஶ்ரவஸ்தமம் கவீநா முபமஶ்ரவஸ்தம முபமஶ் ரவஸ்தமம் கவீநாம் கவீநா முபமஶ்ரவஸ்தமம்	**Statement No: 7** Padams/Words 6/7 Flow 67,76,67 The 'mu' is formed with 'm' of kavinAm and 'u' of upamasravastamam 'mu follows udAttam 'nA' of kavinAm
उपमश्रवस्तम मित्युपमश्रवः – तमम् । உபமஶ்ரவஸ்தம மித்யுபமஶ்ரவ: -- தமம் உபமஶ்ரவஸ்தம மித்யுபமஶ்ரவः – தமம	**Statement No: 8** Now the ruk has ended. . Seven has two padams (PS) which is split and recited so 7 iti 7a --- 7b Srva: visargam is followed by letter 'ta' so the visargam is replaced with 's'. 'iti' followed by 'u' becomes 'tyu' as per Vowel Sandhi rule. 'tamam' extended with lower note for

	anuswaram ‘mam’
ज्येष्ठराजम् ब्रह्मणाम् ब्रह्मणाम् ज्येष्ठराजम् ज्येष्ठराजम् ब्रह्मणाम् ज्ँयेஷ்ட2ராஜம் ப்3ரஹ்மணாம் ப்3ரஹ்மணாம் ஜ்ँயேஷ்ட2ராஜம் ஜ்ँயேஷ்ட2ராஜம் ப்3ரஹ்மணாம் ജ്യൈഷ്ഠരാജം ബ്രഹ്മണാം ബ്രഹ്മണാം ജ്യൈഷ്ഠരാജം ജ്യൈഷ്ഠരാജം ബ്രഹ്മണാം	Now start with the Second Ruk. **Statement No: 1** (Second Ruk) Padams/Words **1,2** Flow 12,21,12 The ‘ja’ gets anudAttam before bra as udAttam and svaritam is acquired by ‘hma’ in brahmanAm. Marked in yellow ‘ja’ retains its svaritam
ज्येष्ठराजमिति ज्येष्ठ – राजम् ज्ँயேஷ்ட2ராஜமிதி ஜ்ँயேஷ்ட2 -- ராஜம் ജ്യൈഷ്ഠരാജമിതി ജ്യൈഷ്ഠ – രാജം ‘ja’ in first part acquires anudAttam to support Swaritam ‘ti’ in iti.	**Statement No: 3** We need to take 2,3 but Padam/Word 1 Jyeshtarajam consists of two padam **jeshta** and **raajam (PS)**. so its Padam is recited as 1 iti 1a – 1b Rajam has anuswaram with Swaritam and extended to Dheerga Swaritam at end.
ब्रह्मणाम् ब्रह्मणो ब्रह्मणो ब्रह्मणाम् ब्रह्मणाम् ब्रह्मणः ப்3ரஹ்மணாம் ப்3ரஹ்மணோ ப்3ரஹ்மணோ ப்3ரஹ்மணாம் ബ്രഹ്മണാം ബ്രഹ്മണോ ബ്രഹ്മണോ ബ്രഹ്മണാം	**Statement No: 4** Continue with Padams/words 2/3 Flow 23,32,23

ப்3ரஹ்மணாம் ப்3ரஹ்மண: ப்ரஹ்மணாம் ப்ரஹ்மணோ ப்ரஹ்மணோ ப்ரஹ்மணாம் ப்ரஹ்மணாம் ப்ரஹ்மண:	
ब्रह्मणस्पते पते ब्रह्मणो ब्रह्मणस्पते> ப்3ரஹ்மணஸ்பதே பதே ப்3ரஹ்மணோ ப்3ரஹ்மணஸ்பதே> ப்ரஹ்மணஸ்பதே பதே ப்ரஹ்மணோ ப்ரஹ்மணஸ்பதே>	**Statement No: 4** Padams/Words 3/4 Flow 34,43,34 brahmaNaspate acquires anudAttam in start since it has no other swaram in vaakyam. This is BrahmaNa + pate.. The visargam becomes 's' as a rule . 'te' with lower swaram extended during recital since it is dheergam.
पत आ पते पत आ பத ஆ பதே பத ஆ பத ஆ பதே பத ஆ 'pa' in pate acquires svaritam since 'ta' of 'pata' is anudAttam. The **pate** is converted to pata since the sound 'ae' is followed by Vowel 'aa'. It becomes 'a' of ta sound as per Vowel Sandhi rule.	**Statement No: 5** Padams/Words 4/5 Flow 45,54,45 It should be as पत आ ~~आ~~ पते पत आ பத ஆ ~~ஆ~~ பதே பத ஆ பத ~~ஆ~~ ~~ஆ~~ பதே பத ஆ but please note that '~~aa' is dropped~~ when they follow each other during rendering. A+A is A only .

आनो॑ न आ॑नः ஆநோ॑ ந॒ ஆ॑நः ആനോ॑ ന॒ ആ॑നഃ	**Statement No: 6** Padam/Words 5/6 Flow 56,65,56 Please note that 'aa' is dropped. In Swaram markings 'A'(aa) does not get swaram. 'no' that follows the udAttam 'aa' is swaritam and as per Padam. The 'na' after 'no' acquires anudAttam to support 'naH' at the end.
नः शृ॑ण्वन् छृ॑ण्वन् नो॑नः शृ॑ण्वन् ந॒: ஶ்ரு॑ண்வஞ் ச்2ரு॑ண்வன் நோ॑ ந: ஶ்ரு॑ண்வன் നഃ ശൃ॑ണ്വൻ ഛൃ॑ണ്വൻ നോ॑ നഃ ശൃ॑ണ്വൻ	**Statement No: 7** Padam/ Words 6/7 Flow – 67,76,67 'sh' comes for visargam 'n' and Ch combined should be read as 'njCh' 'na' with svaritam acquires anudAttam at the start.
शृ॑ण्वन् नू॑तिभि रू॑तिभिः शृ॑ण्वन् छृ॑ण्वन् नू॑तिभिः ஶ்ரு॑ண்வன் நூ॑திபி4 ரூ॑திபி4: ஶ்ரு॑ண்வஞ் ச்2ரு॑ண்வன் நூ॑திபி4: ശൃ॑ണ്വൻ നൂ॑തിഭി രൂ॑തിഭിഃ ശൃ॑ണ്വൻ ഛൃ॑ണ്വൻ നൂ॑തിഭിഃ	**Statement No: 8** Padams/Words 7/8 Flow – 78,87,78 'n' and 'U' combines to give 'NU'

ऊतिभिः सीद सीदोतिभि रूतिभिः सीद ஊதிபி4: ஸீத3 ஸீதோ3திபி4 ரூதிபி4: ஸீத3 ஊதிபி4: ஸீத3 ஊ॒திபி॑4: ஸீத॑3 ஸீதோ॒3திபி4 ரூ॒திபி॑4: ஸீத॑3 ഊതിഭിഃ സീദ സീദോതിഭി രൂതിഭിഃ സീദ ഊ॒തിഭി॑ഃ സീദ॑ സീദോ॒തിഭി॑ രൂ॒തിഭി॑ഃ സീദ॑	**Statement No: 9** Padams/Words 8/9 Flow 89,98,89 's' should be taken for visargam since 'sida' follows.
ऊतिभिरित्यूति – भिः ஊதிபி4ரித்யூதி -- பி4: ஊதிபி4ரித்யூதி -- பி4: ഊതിഭിരിത്യൂതി – ഭിഃ ഊ॒തിഭി॑രിത്യൂതി – ഭിഃ	**Statement No: 10** Split as per padam Uti+bhi: (PS) In the first part the visargam of bhi becomes 'r' to make it bhir as per Visarga Sandhi. Then combining with 'e' becomes 'ri' U follows 'ti' and becomes ityU as per vowel sandhi.
सीद सादनꣳ सादꣳ सीद सीद सादनम् ஸீத3 ஸாத3னꣳ ஸாத3ꣳ ஸீத3 ஸீத3 ஸாத3னம் ஸீத॑3 ஸாத॑3னꣳ ஸாத॑3ꣳ ஸீத॑3 ஸீத॑3 ஸாத॑3னம் സീദ സാദനꣳ സാദꣳ സീദ സീദ സാദനം സീ॒ദ॑ സാ॒ദ॑നꣳ സാ॒ദ॑ꣳ സീ॒ദ॑ സീ॒ദ॑ സാ॒ദ॑നം	**Statement No: 11** Padams/Words 9/10 Flow 9-10,10-9,9-10 Here na(gm) acquires anudAttam to 'sA' udAttam and the 'da' in sAdana(gm) acquires swaritam. 'da' in last sida get anudAttam to support 'sA' udAttam and 'da' acquires swaritam in sAdanam
सादनमिति सादनम् ஸாத3னமிதி ஸாத3னம் ஸாத॑3னமிதி ஸாத॑3னம் സാദനമിതി സാദനം സാ॒ദ॑നമിതി സാ॒ദ॑നം	**Statement No: 12** End of Ruk. Padam 10 iti 10 'SAdanam' is a single word **with no padam split so it is rendered without any pause**. No separator will be

സാദനമിതി സാദനം	indicated like --. 'na' get anudAttam to support 'ti' which has acquired anudAttam to support 'sA' udAttam and swaritam 'da' in sAdanam

2.4 Number of Statements generated :

Ruk 1 – There are **7 padams** which includes **2 PS** (padam spilt ganapatim and upamasravastamam) so it should generate number of padam plus two PS = 9 statements. The last padam if it were a normal padam, we would have repeated it separately. (see in sadanam iti sadanam). So, if the last padam is a padam with split (PS) or (PG) or (PGS), one statement will be generated less.
Therefore, the formula is number of padams 7 + padam splits (PS) 2 + pragraha padam (PG) 0 + pragraha padam split (PGS) 0 – minus number of last padam which is a PS or PG or PGS 1 = 9-1 = 8 JatA Statements.

Ruk 2- There are **10 Padams** and it includes **2 PS,** jeShtarajam and UtiBhiH

Therefore, the formula is number of padams 10 + padam splits (PS) 2 +pragraha padam (PG) 0 + pragraha padam split (PGS) 0 – minus number of last padam which is a PS or PG or PGS 0 = 10+2 = 12 JatA Statements.

3 Jata Example from Rudram

3.1 Jata Paatam example from Rudram

The Pada Paatam of first mantra from Anuvaham 1 of Rudram is given as follows: (from the Samhita Pata Paata book containing source work of Sri Bhattacharya Misra)

नमः **(1)** । ते **(2)** । रुद्र **(3)** । मन्यवे **(4)** । उतो इति **(5) (PG)** ।
ते **(6)** । इषवे **(7)** । नमः **(8)** ।

नमः **(1)** । ते **(2)** । अस्तु **(3)** । धन्वने **(4)** । बाहुभ्यामिति बाहु – भ्याम् (बाहुभ्याम्) **(5) PS** । उत **(6)** । ते **(7)** । नमः **(8)** ॥

நம: **(1)** । தே **(2)** । ருத்3ர **(2)** । மன்யவே **(4)** ।
உதோ இதி **(5) (PG)** । தே **(6)** । இஷ்வே **(7)** । நம: **(8)** ।
நம: **(1)** । தே **(2)** । அஸ்து **(3)** । த4ன்வனே **(4)** ।
பா3ஹுப்4யாமிதி பா3ஹு -- ப்4யாம் (பா3ஹுப்4யாம்) **(5)** ।
உத **(6)** । தே **(7)** । நம: **(8)** ॥

നമഃ **(1)** । തേ **(2)** । രുദ്ര **(3)** । മന്യവേ **(4)** । ഉതോ ഇതി **(5) (PG)** ।
തേ **(6)** । ഇഷവേ **(7)** । നമഃ **(8)** ।

നമഃ **(1)** । തേ **(2)**। അസ്തു **(3)** । ധന്വനേ **(4)** ।
ബാഹുഭ്യാമിതി ബാഹു – ഭ്യാം (ബാഹുഭ്യാം) **(5)**।
ഉത **(6)**। തേ **(7)** । നമഃ **(8)** ॥

Now the Pada Padam gives all the padams only. While reciting we need to take care of all Recital rules, Word formation, grammar etc. Let us see how this converts into Kramam. We have indicated the dheerga swaritam in Padam (words). In classical books, it will be indicated as swaritam and during rendering the specific rules are applied and rendered as Dheerga Swaritam.

The Pada Paatam shall mark a padam, without any swaram, in all anudAttam only. (lower note). While combining words these padams need to converted to udAttam and apply Sandhi and Swaram rules.

3.2 Explanation of JatA flow:

Notes and Explanations with Padam	Jata Paata
Padam 1,2 - नमः + ते । Padam 1,2 - நம: । தே Padam 1,2 - നമഃ । തേ Flow – 12, 21,12	**Statement No: 1 (Ruk 1)** (ओं) नमस्ते ते नमो नमस्ते (ஓம்) நமஸ்தே தே நமோ நமஸ்தே

namaha+te becomes namaste; namaha becomes namO before 'na' of following namaha as per visarga sandhi. 'te' in blue acquires anudAttam to support udAttam 'na' the following intended svaritam of na**mO** but this mO acquires anudAttam to support the 'ma' in namaste	(ഒാം) നമസ്തേ നമോ നമസ്തേ
Padam 2/3, തേ । രുദ്ര Padam 2/3, തേ । രുത്3ര Padam 2/3, തേ । രുദ്ര Flow – 23,32,23 **'te and rudra'** do not have swaram and acquires anudAttam swaram. Now there is no scope of rule to introduce any other swaram so the entire flow is in anudAttam.	**Statement No: 2** തേ രുദ്ര രുദ്ര തേ തേ രുദ്ര തേ രുത്3ര രുത്3ര തേ തേ രുത്3ര തേ രുദ്ര രുദ്ര തേ തേ രുദ്ര
Padam 3/4 - രുദ്ര । മന്യവേ Padam 3/4 - രുത്3ര । മന്യവേ Padam 3/4 - രുദ്ര । മന്യവേ Flow – 34,43,34 Rudra is rendered with anudAttam at start then it is rendered normally since	**Statement No: 3** രുദ്ര മന്യവേ മന്യവേ രുദ്ര രുദ്ര മന്യവേ>മന്യവേ രുത്3ര മന്യവേ മന്യവേ രുത്3ര രുത്3ര മന്യവേ>മന്യവേ രുദ്ര മന്യവേ മന്യവേ രുദ്ര രുദ്ര മന്യവേ>

it has no designated swaram. in ManyavE , 'vE' is a dheerga letter with swaram the Swaritam becomes Dheerga Swaritam at end.	
Padam 4/5. मन्यवे । उतो इति । Padam 4/5 மன்யவே । உதோ இதி । Padam 4/5 മന്യവേ । ഉതോ ഇതി । Flow – 45,54,45 ManyavE becomes Manya**va** due to following Vowel 'u' as per Vowel Sandhi Word ~~**iti**~~ is not considered as it is an indicator in Pada Paatam to mean that 'utO' is a **Pragrihya/Pragraha**. **Pragrihyas/Pragrahas** are words which are not subject to Sandhi in the front.	**Statement No: 4** मन्यव उतो उतो मन्यवे मन्यव उतो । மன்யவ உதோ உதோ மன்யவே மன்யவ உதோ മന്യവ ഉതോ ഉതോ മന്യവേ മന്യവ ഉതോ
Padam 5/6. उतो इति । ते । Padam 5/6. உதோ இதி । தே Padam 5/6. ഉതോ ഇതി । തേ Flow - 56,65,56 '~~iti~~ will be ignored since it is an	**Statement No: 5** उतो ते त उतो उतो ते > உதோ தே த உதோ உதோ தே > ഉതോ തേ ത ഉതോ

indicator. 'te' with 'ae' sound takes 'a' sound 'ta' before vowel letter word utO. 'te' acquires dheerga swaritam due to being a dheerga letter at the end. This is acquired because of u	உதோ தே >
Padam 5 उतो इति । Padam 5 உதோ இதி । Padam 5 ഉതോ ഇതി । Flow – 5 iti 5 This is like krama paatam. is dropped so utO iti utO is taken; 'e' in iti + u in utO combine to give ityu.	**Statement No: 6** उतो इत्युतो உதோ இத்யுதோ ഉതോ ഇത്യുതോ Padam is PG. generates an extra JatA statement
Padam 6,7 ते । इषवे Padam 6,7 தே । இஷ்வே Padam 6,7 തേ । ഇഷ്വേ Flow – 67,76,67 'ta' and 'va' marked in blue have 'ae' sound but takes 'a' sound before vowel 'e' 'ta' and 'va' acquire anudAttam to support the 'sha' in ishave & ishava	**Statement No: 7** त इषव इषवे ते त इषवे த இஷ்வ இஷ்வே தே த இஷ்வே ത ഇഷ്വ ഇഷ്വേ തേ ത ഇഷ്വേ
Padam 7/8 इषवे । नमः । Padam 7/8 இஷ்வே । நம: Padam 7/8 ഇഷ്വേ । നമഃ	**Statement No: 8** इषवे नमो नम इषव इषवे नमः இஷ்வே நமோ நம இஷ்வ

Flow – 78,87,78 've' marked in blue acquires anudAttam to support the following intended svaritam of namaH. First namaha becomes namO before following namaha. This namaha loses visargam due to following vowel 'e' But mO marked in yellow becomes anudAttam to support following namaH.	இஷ்வே நம: இஷவே நமோ நம இஷ்வ இஷவே நமஃ The 'ma' marked in green becomes anudAttam to support svaritam of 'Sha' in ishava. 'va' acquires anudAttam to support Sha in ishavE.
Padam 8 End of Ruk in Samhita. 8 iti 8. Padam 8 - नमः । Padam 8 - நம: । Padam 8 - നമഃ । First namaha loses visargam before 'e', ma acquires anudAttam to support intended svaritam of 'ti', but ti itself acquires anudAttam to support 'ma' in second namaha.	**Statement No: 9** नम इति नमः நம இதி நம: നമ ഇതി നമഃ
Start of second ruk. Padam 1,2 - नमः । ते Padam 1,2 - நம: । தே Padam 1,2 - നമഃ । തേ Flow- 12,21,12 This is exactly same as the first ruk's start with 1,2	**Statement No: 1 (Second Ruk)** नमस्ते ते नमो नमस्ते நமஸ்தே தே நமோ நமஸ்தே നമസ്തേ തേ നമോ നമസ്തേ

Padam 2/3 - ते । अस्तु Padam 2/3 - தே । அஸ்து Padam 2/3 - തേ । അസ്തു Flow 23,32,23 astu+astu combines, tu changes to 't'+'v'	**Statement No: 2** ते अस्त्वस्तु ते ते अस्तु தே அஸ்த்வஸ்து தே தே அஸ்து തേ അസ്ത്വസ്തു തേ തേ അസ്തു Since te and astu do not have swaram it is rendered in full udAttam.
Padam 3/4 अस्तु । धन्वने Padam 3/4 - அஸ்து । த$_4$ன்வனே Padam3/4 - അസ്തു । ധന്വനേ Flow – 34,43,34 'astu' at start acquires anudAttam, since it is followed by Padams with swaram the combination of astvastu gets only swarm for stu at end to support 'dha' udAttam	**Statement No: 3** अस्तु धन्वने धन्वने अस्त्वस्तु धन्वने அஸ்து த$_4$ன்வனே த$_4$ன்வனே அஸ்த்வஸ்து த$_4$ன்வனே അസ്തു ധന്വനേ ധന്വനേ അസ്ത്വസ്തു ധന്വനേ
Padam 4/5 - धन्वने । बाहुभ्याम् Padam 4/5 - த$_4$ன்வனே । பா$_3$ஹுப்$_4$யாம் Padam 4/5 - ധന്വനേ । ബാഹുഭ്യാം Flow – 45,54,45	**Statement No: 4** धन्वने बाहुभ्याम् बाहुभ्याम् धन्वने धन्वने बाहुभ्याम् > த$_4$ன்வனே பா$_3$ஹுப்$_4$யாம் பா$_3$ஹுப்$_4$யாந் த$_4$ன்வனே த$_4$ன்வனே பா$_3$ஹுப்$_4$யாம் > ധന്വനേ ബാഹുഭ്യാം ബാഹുഭ്യാം ധന്വനേ ധന്വനേ ബാഹുഭ്യാം >

Pada Paatam is given as बाहुभ्यामिति बाहु – भ्याम् Here the 'iti' has been added to split the Padam. iti has svaritam on ti by Pada Paata rules. In Pada paata style, the bAhubhyAm with iti becomes bA`hubhya`miti` , the split is given as bA`hu – bhyA`m. 'bhyAm' acquires anudAttam to support 'ti' in 'iti' if you combine second part bAhu+bhyAM, bA has anudAttam, hu is udAttam so, when bhyAm is combined it acquires svaritam; becomes a dheerga swaritam since it is dheerga letter.	ധന്വനേ ബാഹുഭ്യാം ബാഹുഭ്യാം ധന്വനേ ധന്വനേ ബാഹുഭ്യാം > While rendering Jata paatam, bhyam acquires anudAttam to support 'nva' in dhanvane. 'ne' in dhanvane also requires anudAttam to support following dhanvane – dha is udAttam
Padam 5/6 - बाहुभ्याम् । उत Padam 5/6 -பா3ஹுப்4யாம் । உத Padam 5/6 - ബാഹുഭ്യാം । ഉത 'm' combines with u of uta to give 'mu' 'ta' of uta combines with u of following uta to become 'tO' vowel sandhi rule is 'a' +'u' = 'O'	**Statement No: 5** बाहुभ्यामुतोत बाहुभ्यां बाहुभ्यामुत பா3ஹுப்4யாமுதோத பா3ஹுப்4யாம் பா3ஹுப்4யாமுத ബാഹുഭ്യാമുതോത ബാഹുഭ്യാം ബാഹുഭ്യാമുത

Padam 5 Flow 5 iti 5 Padam 5 - बाहुभ्याम् Padam 5 - പാ3ഹൂപ്4യാമ് Padam 5 - ബാഹുഭ്യാം	**Statement No: 6 Padam is PS** बाहुभ्यामिति बाहु – भ्यां > പാ3ഹൂപ്4യാമിതി പാ3ഹൂ - പ്4യാമ് **>** ബാഹുഭ്യാമിതി ബാഹു – ഭ്യാം > Generates one extra JatA statement
Padam 6,7 - उत । ते । Padam 6,7 - ഉത । തേ । Padam 6,7 - ഉത | തേ | Flow – 67,76,67 Uta+uta becomes utOta (a+u =O)	**Statement No: 7** उत ते त उतोत ते > ഉതതേ ത ഉതോതതേ **>** ഉത തേ ത ഉതോത തേ >
Padam 7/8 - ते । नमः Padam 7/8 - തേ | നമ: Padam 7/8 - തേ | നമഃ Flow – 78,87,78 'mO' and 'te' acquire anudAttam to support 'ma' in namaH part of Namaste and namaha	**Statement No: 8** ते नमो नमस्ते ते नमः തേ നമോ നമസ്തേ തേ നമ: തേ നമോ നമസ്തേ തേ നമഃ

Ruk ends. Padam 8 **Flow is 8 iti 8** Padam 8 - नमः । Padam 8 - நம: । Padam 8 - നമഃ ।	**Statement No: 9** नम इति नमः நம இதி நம: നമ ഇതി നമഃ

3.3 Number of Statements generated:

Ruk 1 – There are **8 padams** which includes **1 PG** (Pragraha utO iti) so it should generate number of padam plus one extra statement = 9 statements. **Therefore, the formula is number of padams 8 + padam splits (PS) 0 +pragraha padam (PG) 1 + pragraha padam split (PGS) 0 – minus number of last padam which is a PS or PG or PGS 0 = 8+1 = 9 JatA Statements**

Ruk 2- There are **8 Padams** and it includes **1 PS,** (bAhuByAm). **Therefore, the formula is number of padams 8 + padam splits (PS) 1 + pragraha padam (PG) 0 + pragraha padam split (PGS) 0 – minus number of last padam which is a PS or PG or PGS 0 = 8+1 = 9 JatA Statements.**

Note: These are same as in Krama Paatam. Kindly see Article on Basics of Krama Paatam.

3.4 Further notes and Explanations

1. Normally a person is supposed to be an expert or a master if he can recite something backwards! Jata Paatam is one such a method to make one an expert or thorough. As per modern science, to do a task in an exactly opposite or reverse manner requires lot of control, skill and thoroughness. When these were done in ancient days without the aid of any reading material, the student needs great concentration and skill, which in itself is sharpended by these types/methods of studies.

2. The Jata Paatam is a hidden method in a Ghana Paatam.
   Ghana Paata recital method is 12,21,123,321,123
   This is taught after Pada Paatam.
   The Series 12,23,34 which one learns in Krama Paatam is applied in Jata Paatam and Ghana Paatam.
   The first six words recited are 12,21,12 marked in yellow and blue which exactly matches with Jata Paatam but since third Padam or word comes in there will be additional sandhi or swaram changes will occur.
   Now take the second part marked in blue and green it is 123,321 123 , this is actually like a Jata of three words/Padams.
3. Therefore, the logical order of learning has been designed as Vaakyam, Padam, Kramam (step next to Padam in order of 2 Padams), JatA (next to kramam with a twist of reverse order with 2 Padams) and finally Ghanam (a 3 Padam combination which can mastered if the previous steps are well learned).
4. Normally Jata Paatam is not taught or learnt to/by householders.
   Jata Paatam of selective areas is taught in Veda PadaShalas.
5. This note has been prepared with an intention of sharing the concept.
6. One should definitely approach a qualified Guru if one wants to learn some important mantras through JatA Paatam.
7. **Kindly don't use our books to recite JatA Paatam if you have not learnt it from a qualified Guru. You may use it to follow and understand the flow of JatA Paatam when listening to recitals.**

---

4 Additional Concepts in JatA Paatam

4.1 Dvipadam

Dvipadam is when two **identical padams**, which match both in **varna and swara**, come in one after another. By basic definition, there will be 12,21,12 six padams are repeated.

We have namaH | namaH as to successive padams. It **will not be repeated** as six padams like normally, ie **namo namo namo namo namo namaH.**

The Jata vAKyam will have only the two padam example - namo namaH.

So our Rishis have already designed avoidance of duplication or redundancy. A Jata vAkyam will have **only 2 padams** if its from dvipadam.

Note: Check jatA paatam of TS 4.5 (Rudra namakam) which has a number of namaH and namaH set that follow in anuvAkam 2,3 and 4.

4.2 Tri-Kramam

This are instances where the JatA vaakyam will **use three successive padams** instead of standard two successive padams in a statement.

Let us take an example of Padams from TS 1.1.2.2 JatA Paatam, the four padams in sequence are: ते । मा । आ (एति) । स्थात् । தே । மா । ஆ (ஏதி) । ஸ்தா2த் । തേ । മാ । ആ (ഏതി) । സ്ഥാത് ।

When the first two padams are taken there is an easy direct flow of Jatai like

24) 1.1.2.2(21)– ते । मा ।

ते मा मा ते ते मा ।

24) 1.1.2.2(21)- தே । மா ।

தே மா மா தே தே மா ।

24) 1.1.2.2(21)– തേ । മാ ।

തേ മാ മാ തേ തേ മാ ।

For the next JatA vAkyam if we take, only **mA and A**, the combination will give **mA mA mA** as the **A merges into mA**, since they are both udAttam, the end result is udAttam. We cannot figure of the flow easily. The student may lose control of the Padams with its source varNa and swara. Remember all these were mentally calculated and recited and there were no books for Jatai or Ghanam. That makes this concept special.
So instead of two padams, three padams are taken and recited as follows:

25) 1.1.2.2(22)– मा । आ । स्थात् ।

मा ऽऽस्थाथ् स्थादा मा मा ऽऽस्थात् ।

25) 1.1.2.2(22)- மா । ஆ । ஸ்தா$_2$த் ।

மா ஃஸ்தா$_2$த்$_2$ ஸ்தா$_2$தா$_3$ மா மா ஃஸ்தா$_2$த் ।

25) 1.1.2.2(22)– മാ । ആ । സ്ഥാത് ।

മാ ssസ്ഥാഥ് സ്ഥാദാ മാ മാ ssസ്ഥാത് ।

Now the two padams of the three, A and SthAt are taken, so with these statements the student would remember the flow and link it well with pada paatam. That is given below:

26) 1.1.2.2(23)– आ । स्था॒त् ।
आ स्थाथ् स्था॒दा स्थात् ।

26) 1.1.2.2(23)- ஆ । ஸ்தா॒2த் ।

ஆ ஸ்தா2த்2 ஸ்தா॒2தா3 ஸ்தா2த் ।

26) 1.1.2.2(23)– ആ । സ്ഥാ॒ത് ।
ആ സ്ഥാഥ് സ്ഥാ॒ദാ സ്ഥാത് ।

This specially occurs when a padam with ending udAttam ‘A’ sound is followed by preposition ‘A’ whichis udAttam creating the need for remembering a additional padam step in a Jata vAkyam with three padams. The Trikrama jatA has 9 padams 123,321,123 though the sound is hidden. (merger of A with A)
