Basics of Veda Swaras and Vedic Recital -11

Pada Paatam and Swaram Flow

Version 1.0 October 31, 2026

Contents

1 Veda Basics – Pada Paatam 7
1.1 Introduction: 7
1.2 Pada Paatam basics: 8
1.3 Elongation of rendering 10
1.4 Swaram Acquisition 10
2 GaNanaamthvaa Example 13
2.1 Samhita/Vakyam TS 2.3.14.3: 13
2.2 Flow of the Pada Paatam: 15
3 Basic Rules for a Padam 26
3.1 Guiding Principles 26
3.2 Rule 1- Words with No Swaram converts to AnudAttam 29
3.3 Rule 2 First letter Swaritam converts to anudAttam 32
3.4 Rule 3 Full Padam converts anudAttam if first letter alone is marked with Swaritam 32
3.5 Rule 4 All unmarked udAttam converts to anudAttam till the anudAttam in vAkyam 33
3.6 Words with two Padam is split through 'iti' 34
3.7 If first padam has prime swaram, then it is marked in second part as it is 35
3.8 If first padam has no prime swaram, they get anudAttam in first part but swaram is not marked in second part 36

3.9 The Second part has distinct swaram it will be reflected in the Second Part 37
3.10 The Second Padam has Swaritam, the first padam may have pracaya in vAkyam 38
3.11 Additional Swaram may be acquired to Support Swaritam or anudAttam) 41
4 Quick Reference for Padam Paatam Swarams and link to vAkyam for Swaram acquisition/Change 43
4.1 Padam with No Marking; normally single letters (with visarga,halant ending also) 43
4.2 Single letters with marking (with visarga,halant ending also) 44
4.3 Padam with two letters 44
4.3.1 First anudAttam & Second udAttam 44
4.3.2 both letters marked as anudAttam 45
4.3.3 first as udAttam and Second one as Swaritam 46
4.4 Padam with three letters with first anudAttam,udAttam, Swaritam 46
4.5 Padam with three letters or more letters 47
4.5.1 all marked in anudAttam 47
4.5.2 all except last letter marked in anudAttam 48
4.5.3 Has a set of anudAttam and one Swaritam 48
4.5.4 Swaritam comes as a Second letter 49

4.5.5 Swaritam comes in the first letter....50
4.6 Padams with only anudAttam and Swaritam....51
4.7 Different perspective of the nature of Swaras....52
4.8 Special Rules for udAttam in vAkyam and Other Paatams 54
4.8.1 udAttam (jeeva) as per classical text remains as it is vAkyam....54
4.8.2 Swaram Rule before and after such Prime/Jeeva udAttam....57
4.8.3 Special words and Padams with First udAttam....62
4.8.4 Prime udAttam joining....67
4.8.5 Prime udAttam or Swaritam can acquire anudAttam due to Pracaya Rule....72
5 Representation of Prepositions/Prefixes....74
6 Swaram Rules....80
6.1 Rules for Swaram acquisition during Sandhi (from PS)....80
6.2 Sandhi Rules for Swara combinations of A/U/S....83
6.3 Sandhi Samples of udAttam occurence....85
6.4 Sandhi Samples of anudAttam occurrence....91
6.5 When Swaritam (circumflex) and anudAttam (grave) combine result is Swaritam....93
6.6 Examples of Swaritam formation for a combination of PU+AnudAttam....99
6.7 KShaipra....109

6.8 Nitya....111
6.9 prAtihatA....114
6.10 aBhinihatA....116
6.11 PraSliShtA....119
6.12 pAdavRutta....121
6.13 Tairovya~jjana....124
6.14 Special Swaritams....126
6.14.1 Kshaipra, Nitya, PraSliShta and AbhinihitA retain their position....130
6.14.2 Tairovya~jjana, Pratihata and Padavrutta give up their Swaritam position....133
6.15 Kampa Swaram (Two Swaritams together)....137
7 Examples with the 'iti' impact in Pada Paatam....142
7.1 Examples of joining 'iti' and its impact on vAkyam - Pada Paatam derivation....142
7.2 Examples of common end-words in vAkyam to Padam:..158
7.3 Examples of conversion from Pada Paatam with 'iti' words to vAkyam....171
8 Padam joining without 'iti'....190
9 Rudram example for conversion to vAkyam....213
9.1 Conversion from Pada Paatam to vAkyam....213
10 Pragrihya (or Pragraha)....219
10.1 Examples from Samhita Vaakya Paatam....228

Version Notes – Version 1.0 dated October 31, 2026

1. **This is a revised Draft release version.**
2. **'i' plus 'i' does not become PrasliShtA as per Scholars and the original reference has been dropped and examples deleted.**
3. **The Concepts of PrAtihata, Padavrutta, PrasliShta and Tairovya~jjana have been completely corrected and new relevant examples have been given under advice from a vedic student.**
4. **There is a deliberate repetition of same examples in different sections to fit them into context as per our Guide.**
5. **Wherever rules have been cleared by some Experts who reviewed the document, the rules have been rewritten. Section 6 Padams have been taken without swaram marking as per Pada Paatam in few instances, and that is corrected so rule interpretation is more accurate.**
6. **More explanations have been given with respect udAttam rather than the marked Padams like anudAttam and udAttam. Concepts of Prime anudAttam, Support anudAttam, Prime udAttam, Prime Swaritam etc are retained.**
7. **Minor typing errors, incorrect references to udAttam and anudAttam due to different representation in vAkyam and Pada Paatam and swaram marking errors, wherever found, have been corrected.**

1 Veda Basics – Pada Paatam

1.1 Introduction:

Our Rishis and compilers of Vedas had devised methods to ensure that the Veda is not changed and there is a control with no unintended or intended changes. They have designed ways to ensure it is well memorized and assimilated.

The Krishna Yajur Veda has five types of Vedic learning:

1. Samhita/Vaakya Paatam – learning Vedas as they are recited
2. Pada Paatam – learning Vedas with the Padam of each and every word
3. Krama Paatam – a method to learn Veda in a specific order
4. Jata Paatam – a different method of ordering words back and forth
5. Ghana Paatam – a different method of ordering words and reciting.

The Pada Paatam is twice as powerful and effective in relation to Samhita Paatam; Krama paatam is rated four times and Jata Paatam thousand times as per a sloka referred to by scholars. Ghana Paatam is said to have infinite power and effectiveness in relation in Samhita/Vaakya Paatam.
There are other types of Veda Paata (not practiced by followers of Krishna Yajur Veda)

1. Maala Paataa
2. Shika Paata
3. Dhanta Paata
4. Dwaja Paata
5. Ratha Paata
6. Rekha Paata

The main purpose of these types of studies is that the Vedas are protected through distinct ways to repeat the contents of the Mantras. Any unintended change any of the method will conflict with the other type of learning.
The learning becomes thorough. The Sruti is well protected to be handed over generations through the word of mouth.
We shall concentrate on **Pada Paatam** in this note.
The Pada Paatam is derived out of the vAkyam by Rishis/Scholars and **cannot be changed and it carries the intend of the vedic constituents of a word, that is Padam**.
Kindly note that the **Pada Paatam is the base/foundation** for all vikruti paata like Ghana Paatam, Krama Paatam and Jata Paatam. Articles on these topics have been already been uploaded in our site and available in the Articles Page.
Readers are requested to read the Introduction Notes and Explanations in TS 1.1 Pada Paatam which gives basics on Counts, Korvai and other related details. This document covers only the Krishna Yajur Veda based learning.

1.2 Pada Paatam basics:

Basics of Pada Paatam are explained in brief:

1. Pada Paatam is the detailed explanation to the constituent words in vAkyam/Samhita. In Krishna Yajur Veda branch, there is **no** formal Pada Paatam for **Braahmanam and Aranyam**.
   (referred to as 'SAkA' by vedic pandits)
2. The **Padam Paatam provided by our great compilers**, **cannot be changed**. But it is used for the understanding of constituent words in Samhita and for use in other types of Paatam like Kramam, Jatam and Ghanam. When the Pada Paatam is taken as the base and we derive the

Kramam, Jatam and Ghanam; the resultant derivation of vAkyam from any of these types of Paatam will be consistent with vAkyam.

3. The definition of what is a Padam is dealt in Sanskrit Grammar. There are detailed definitions/explanations available in the work of PAnini's AshtAdhyAyi (PA) – **Book 1 Chaper 3.**
4. For our understanding, we will take Padam as a word which is expressed to provide the right breakup of the vAkyam/SamhitA as provided by Scholars.
5. Pada Paatam, in Vedas, has words which in itself have been formed with two or three constituent Padams/words. E.g Gana-pathiH, PrajA-patiH, vyuptakEsAya (vi-upta-kEsAya)
6. One of the six Veda anga (limb or part) is called **Nirukta (or Niruptam)**. This covers the etymology of Sanskrit language, detailing origin, definition, explanation and development of words. A person who has learnt Nirukta will be able to spilt very difficult words into its component Padams easily.
7. A person with good basic knowledge of Sanskrit grammar with how the root word (dhAtu) undergoes changes with gender, numberals, verb and related grammar parameters would find it easier to grasp, the technical details of splitting vAkyam to Padam or vice verse.
8. Understanding of Sanskrit Grammar, Sandhi Rules and conventions used in Vedic recitals is a very basic step for understanding Pada Paatam well.
9. In addition, the basic principles of Swaras, as explained in the books of Sages/Scholars of yester years would be very useful.
10. Panini's AshtAdhyAyi **Books 5 Ch 2 ,6 Ch 1,2 3, and 8 Ch 1,2** have a number of rules relating to the **what shall be basic swara of words/Padams** detailing Gender, cases, Verb endings, compounds, affixes, suffixes and other grammatical classifications.
    Readers interested in these rules may refer to the above Chapters.

11. Once the Padam is split, **it is rendered continuously in the order of the Padam while rendering Pada Paatam in the order of the Padams.**

12. **Please remember we have five types of Padam which we defined in Krama, JatA and Ghana patam Articles –**

a. Simple Padam
b. Veshtana Padani – Padam with split (PS)
c. Upasarga Padani – Preposition padam (Pre)
d. Pragraha Padani – (PG)
e. Pragraha Veshtana Padani – Pragraha Padam with split (PGS)

1.3 Elongation of rendering

The rendering needs to be extended/elongated for the
last part of the word/padam, when it is

1) a Dheerga Swaritam or anudAtta Swaram **and**

the letter is

2a) a Dheerga letter (e.g. aa, ee, O,) **or**

2b) a Anuswaram (letters ending as tam, sam, sham etc. with a dot in Sanskrit).

The Method of elongation varies between few schools in actual practice. Please refer to your Guru for further clarifications on rendering if the school is different.

1.4 Swaram Acquisition

1. In Pada Paatam, the last aksharam cannot be an anudAttam (lower swaram) **unless** the last full padam or word is fully marked in anudAttam.
2. A Dheerga letter marked in Swaritam in Pada Padam acquires Dheerga Swaritam subject to rules in vAkyam or vice-versa.
3. Rules of gm, gg needs to be applied when combining words ending in Anuswaram.

4. Generic Swaram rule is that if there is UdAttam the previous letter shall be assigned an anudAttam and the next letter to the udAttam shall be a Swaritam.
5. This rule applies across two Padams or words. However, if letters with designated udAttam intervenes, the swaram shifts to next or earlier possible letter.
6. The Swaram may be acquired by a letter to support a UdAttam which is coming up or an udAttam that has come up.
7. There are words that do not acquire swaram as per Pada Paatam (like Sam, dyau, yAH) and Vedic grammar rules from Sages, especially Sage pAnini.
8. Let us see some patterns in GaNAnAm Thava… for swaram.

Note:

1. **Letter prior to it marked in yellow shall be generally have or acquired anudAttam (lower note) 'pa' has acquired anudAttam to support 'Sra'**
2. **The next letter is UdAttam (medium note)**
3. **Letter marked in Green have or acquired Swaritam or Dheerga Swaritam. (third letters in a pattern). 'Sra' in aSrava has Swaritam in its Padam. Rest all are Swaritam that support a previous anudAttam.**
4. **Readers are requested to read the Article on 01Basics of Veda Swaras so the reader will be acquainted to concepts like anudAttam, udAttam, Swaritam, Sannatara(pracaya), Ekasruti and the flow of Vedic Statements with the examples given in that Article.**

While applying a number of grammar rules, there could be conflicts and it applies to padam and swara sandhis that form in a vAkyam.
However, the interpretation of the reputed Scholar, who has compiled Panini's AshtadhyAyi (PA) and notes from other Scholars give us basic principles of application of rules in Sanskirt grammar, though these are **not explicitly stated** in PA:

1. A subsequent rule/operation which follows a preceding rule will have superiority/priority in application
2. A Nitya Rule/operation (persistent application defined in texts) will be stronger than a subsequent rule/application which is not persistent (anitya)
3. An internal operation/rule (referred as antaranga) is stronger than a generic external rule or operation (bahiranga)
4. An apavAda rule/operation (rules of exception) is stronger than the general (utsarga) rule/application.
5. A maxim is also provided by the Scholars that "in case of conflict, the rule that is applied **is the one that which will remain and must last in spite** of presence of other rules and **debars such Other rules**".
6. Readers must also keep in mind that a Vedic custom or practice or rule that has been followed for centuries by a specific **School of Veda (SAkhA)** will have its own priority in application and recital.
   A key example will be application of **gm, gg** in Krishna Yajur Veda Schools. There would also be variations between Vedic schools based on the Sage/Sages who have compiled or propounded or given lessons (sIkShA) on these mantras.

2 GaNanaamthvaa Example

Let us see the explanation of Pada Paatam with well known mantra "GaNanAm thavA Ganapathim"

2.1 Samhita/Vakyam TS 2.3.14.3:

(ओं) । गणानां त्वा गणपतिꣳ हवामहे कविं कवीना–मुपमश्र–वस्तमं ।
ज्येष्ठराजं ब्रह्मणां ब्रह्मणस्पत आनꣳशृण्वन्नूतिभिः सीद सादनं ॥

Pada Paatam:

गणानाम् । त्वा । गणपतिमिति गण – पतिम् । हवामहे । कविम् ।
कवीनाम् । उपमश्रवस्तममित्युपमश्रवः–तमम् ।
ज्येष्ठराजमिति ज्येष्ठ–राजम् । ब्रह्मणाम् । ब्रह्मणः । पते । एति । नः ।
शृण्वन्न् । ऊतिभिरित्यूति – भिः । सीद । सादनम् ।

Samhita/Vakyam:

க3ணானாந் த்வா க3ணபதிꣳ ஹவாமஹே கவிங் கவீனா-
முபமஶ்ரவஸ்தமம் । ஜ்யேஷ்ட2ராஜம் ப்3ரஹ்மணாம்
ப்3ரஹ்மணஸ்பத ஆ நꣳ: ஶ்ருண்வன்னூதிபி4: ஸீத3 ஸாத3னம் ।

Pada Paatam:

ക3ണാനാം ൽ । ത്വാ । ക3ണപതിമിതി ക3ണ -- പതിം । ഹവാമഹേ ।
കവിം । കവീനാം । ഉപമശ്രവസ്തമമിത്യുപമശ്രവ: -- തമം ।
ജ്യേഷ്ഠ2രാജമിതി ജ്യേഷ്ഠ2 --രാജം ൽ । ബ്3രഹ്മണാം ।
ബ്3രഹ്മണ: । പതേ । ഏതി । ന: । ശ്രുണ്വന്ന് ।
ഊതിപി4രിത്യൂതി -- പി4: । സീദ3 । സാദ3നം ।

Samhita/Vakyam:

ഗണാനാം ൽ ത്വാ ഗണപതിഗ്ം ഹവാമഹേ കവിം കവീനാ-
മുപമശ്രവസ്തമം । ജ്യേഷ്ഠരാജം ബ്രഹ്മണാം ബ്രഹ്മണസ്പത
ആ നഃ ശൃണ്വന്നൂതിഭിഃ സീദ സാദനം ।

Pada Paatam:

ഗണാനാം ൽ । ത്വാ । ഗണപതിമിതി ഗണ – പതിം । ഹവാമഹേ ।
കവിം । കവീനാം । ഉപമശ്രവസ്തമമിത്യുപമശ്രവഃ – തമം ।
ജ്യേഷ്ഠരാജമിതി ജ്യേഷ്ഠ –രാജം ൽ । ബ്രഹ്മണാം । ബ്രഹ്മണഃ ।
പതേ । ഏതി । നഃ । ശൃണ്വന്ന് । ഊതിഭിരിത്യൂതി – ഭിഃ ।
സീദ । സാദനം ।

2.2 *Flow of the Pada Paatam:*

vAkyam/Samhita	Final Padam
गणानां क३णानानाꣳ गणानाꣳ	गणानां क३णानानाम् (ꣳ) गणानाꣳ The word gaNAnaam is a separate and taken as a Padam. Swaram anudAttam is on 'ga' because the next letter is udAttam and 'naam' acquires 'Swaritam' and then reflected as Dheerga Swaritam. No change from vAkyam to Padam.
त्वा, त्वा ता	त्वा , त्वा , ता 'tvA' does not have any swaram or it is udAttam. In Pada Paatam it is represented **as anudAttam**. **(Rule*)** It is actually an EkaSruti padam following a swaritam. But this rule is not universal (but a general and conventional rule) there are few exceptions of single letter words that do not acquire anudAttam. As per Vedic grammar those exceptional words remain as udAttam only.

गणपतिꣳ , क॒ ३ णपतीꣳ , ഗണപതിꣳ Note: (gm) has come in; the next letter is 'ha; it is obvious. This is 'm'. So, take the word as Ganapatim Note: The word Ganapatim consists of two Padams which must be reinforced in the mind of the student. So, the rule is that all words are split as Word iti Padam1 – Padam 2 **(Rule *)** Iti –ti of iti, shall by default, 'i' is udAttam and ti is Swaritam **(Rule *)**	गणपतिमिति गण – पतिम् क॒ ३ णपतिमिति क॒ ३ ण -- पतिम् ഗണപതിമിതി ഗണ – പതിം Given below is the source step* गणपतिम् इति गण - पतिम क॒ ३ णपतिम् इति क॒ ३ ण - पतिम् ഗണപതിം ഇതി ഗണ -പ തിം

***Explanation of Conversion to Padam:**

Step 1. – Take First part perform Sandhi and adjust swarams

गणपतिम् इति गण - पतिम = गणपतिमिति

क॒ ३ णपतिम् इति क॒ ३ ण - पतिम् = क॒ ३ णपतिमिति

ഗണപതിം ഇതി ഗണ - പതിം = ഗണപതിമിതി

Now 'ti' has a Swaritam with 'i' as udAttam and no support anudAttam.

The letter before 'ti' is 'mi' which is udAttam and the letter before it 'ti' should acquire 'anudAttam'.

So, after introducing an anudAttam for 'ti' it becomes

गणपतिमिति , क॒ ३ णपतिमिति , ഗണപതിമിതി

End of Part 1 conversion to Padam.

Now take the Part 2 and apply rules applicable

गण - पतिम् , क३ण - पतीम् , ग्ण-पतीo

Now Gana with a first anudAttam and Na as second letter udAttam, is clear and readable.

Let us see how Pada Paata rules convert Patim.

Rule*. A Swaritam of the first letter of the Padam (in vAkyam) becomes anudAttam and in that case all udAtta letters following it till end of the Padam is converted to anudAttam.

So becomes

पतिम् → पतिम् , second part becomes गण – पतिम्

पतीम् → पतीम् second part becomes क३ण -- पतीम्

पतीo → पतीo second part becomes ग्ण – पतीo

Please Note that the part till the separator '-' appears is treated as one part and the part after the separator '-' is treated as the second part. If there is sandhi, sandhi will be applied for both padam component and the swaras.

Swara sandhi or combinations are discussed separately.

How to convert it back to the word as per vAkyam:

Simply perform reverse engineering of the rules.

गणपतिमिति गण – पतिम्

க3ணப3திமிதி க3ண -- ப3திம்

ഗണപതിമിതി ഗണ – പതിം

Take Part 1

Remove the 'iti' as a Padam, reverse Sandhi and restore Swaram.

गणपतिमिति – इति = गणपतिम्

க3ணப3திமிதி - இதி = க3ணப3திம்

ഗണപതിമിതി – ഇതി = ഗണപതിം

Rule* – The last akshara/letter cannot be an anudAttam, unless all of the letters in that Padam are anudAttam.

Rule* - After a Swaritam, within a Padam, no letters acquire swaram in Padam. The part after that svaritam is called 'Ekasruti' in Vedic/grammar terms.

So, remove, the anudAttam for ti and one gets गणपतिम् , க3ணப3திம்,

ഗണപതിം. (result from Part 1)

If then is there a cross check??!

Oh, yes ! It is there !! our Rishis have designed it so well …. Let us see it

Take Part 2

गण – पतिम् , க3ண -- ப3திம், ഗണ – പതിം.

First part ‘gana’ looks fine, similar to vAkyam. Patim has all anudAttam, so reverse first rule, if all letters are marked anudAttam, restore it back to udAttam(as unmarked temporarily).

गण – पतिम् , க3ண -- பதிம், ഗണ – പതിം.

Now join them you get गणपतिम् , க3ணபதிம், ഗണപതിം.

Do a Swaram check. ‘ga’ is anudAttam, Na is udAttam, then following ‘pa’ should acquire Swaritam. So ‘pa’ should get Swaritam as per basic rule. Simply give that Swaritam to that ‘pa’ it becomes गणपतिम् , க3ணப்திம், ഗണപ്തിം. (result form Part 2). You notice that ‘tim’ is the EkaSruti (ES).

This has matched with result of re-engineering in Part 1.
(marked in similar grey above)

Note: When Visargam is dropped in the first part before iti, to derive a word correctly we should look at Visarga denoted in second part. It may not be as simple as Ganapatim example above. Similarly, sound ‘ae’ becoming ‘a’ before iti or ‘au’ becoming ‘A’ need to be derived from left side of the Padam split equation!!! It is not always easy like this example.

Now next word/Padam from vAkyam. This explanation is for understanding since the student is not supposed the change the given padam or its components as given in Pada Paatam. Only conversion is done to understand derivation of vAkyam or other vikruti statements.

हवामहे , ஹவாமஹே ഹവാമഹേ	हवामहे , ஹவாமஹே ഹവാമഹേ In vAkyam there is no Swaram. In Padam, entire word converted to anudAtta swaram. It is EkaSruti (ES)
कविं, கவிங், കവിം	कविं, கவிம் (ங்), കവിം Ka has anudAttam since vim is udAttam. No special Pada Paata rule involved.
ऽकवीनाम् ऽகவீனாம் ऽകവീനാം The first letter of a Padam cannot be in Swaritam and it will acquire anudAttam as per rule. In vAkyam, ka had acquired swaritam after udAttam vim.	कवीनाम् கவீனாம் കവീനാം Ka acquires anudAttam. Rest of the padam remains as it is. If you observe the 'naam' is udAttam.
ऽउपमश्र–वस्तमं	उपमश्रवस्तममित्युपमश्रवः–तमम्

ഉപമശ്രവസ്തമം ഉപമശ്രവസ്തമം । ‘u’ has Swaritam as it follows udAttam ‘naam’ and will acquire an anudAttam in PP. This word has two padam – upamasravaha +tamam. This is expanded like word iti padam1+padam 2 similar to ganapatim vaha + tamam =vastamam. tamam has no swaram in vAkyam hence marked all in anudAttam.	ഉപമശ്രവസ്തമമിത്യുപമശ്രവഃ -- തമം । ഉപമശ്രവസ്തമമിത്യുപമശ്രവഃ – തമം । ‘mi’ is the joining of m of tamam+ ‘e’ of iti. ‘ti’ of iti combines with u and ityu is formed, this combination is a Swaritam since one of the letters is Swaritam. ‘ma’ acquires anudAttam before udAttam mi and tyu acquires swaritam.
ज्येष्ठराजं ജ്യൈഷ്ഠ2രാജം ജ്യൈഷ്ഠരാജം ബ്രഹ്മണസ്പത consists of two Padam jyestha+rajam so jyestharajam iti jyestha – rajam. The part jyeshtha as per grammar does not acquire swarm and is recited in anudAttam. This type of swaram marking is called pracaya rule the	ज्येष्ठराजमिति ज्येष्ठ–राजम् ജ്യൈഷ്ഠ2രാജമിതി ജ്യൈഷ്ഠ2 -- രാജം ജ്യൈഷ്ഠരാജമിതി ജ്യൈഷ്ഠ –രാജം ‘ja’ of jam acquires anudAttam before udAttam mi and ti of ‘iti acquires swaritam.

anudAttam being rA. We will separately cover vedic statement with same and other examples. In vAkyam, jam has anudAttam as it precedes bra in brahmaNaam.	Jyestha is not marked with any swaram in the split part since marked in the first part**. It does not have distinct swaram but acquires anudAttam as per pracaya rule.** Jam after rA (udAttam) acquires Swaritam and then Dheerga Swaritam (DS) as it is at end of the Padam.
ब्रह्मणां ப்3ரஹ்மணாம் ब्रह्मणाम् ப்3ரஹ்மணாம் ब्रह्मण: (स्)	ब्रह्मणाम् ப்3ரஹ்மணாம் ब्रह्मणाम् ப்3ரஹ்மணாம் No change to vAkyam.
ब्रह्मण: (स्) ப்3ரஹ்மண: (ஸ்) ब्रह्मण: (स्) ப்3ரஹ்மண: (ஸ்) ‘s’ at the end of brahmaNa reprsents visargam to give brahmaNaspate. So visargam marked ‘s’ dropped	ब्रह्मण: ப்3ரஹ்மண: ब्रह्मणः ப்3ரஹ்மணஃ No swaram in vAkyam. Hence entire word marked in anudAttam in Padam.

पत , பத, പത this pata is actually ‘patE’ , ‘ae’ sound has become ‘a’ due to following ‘A’ in AnaSSrunvann.	पते, பதே, പതേ this word has last letter alone as anudAttam. Then the full padam is converted to anudAtta swaram.
आ ,ஆ , ആ* Prepositions and prefixes of single words like ‘A’,pra,prati,ni,.anu, api are represented in Pada Paatam as separate Padam with a **iti suffix** for indication. A+ iti becomes Eti	एति ,ஏதி் ,ഏതി് ‘ti’ of iti has Swaritam. So, the ti in Eti acquires it during sandhi. **Section 5** provides for Padams of standard prepositions and prefixes which repeatedly occur in Pada Paatam.
न, नः, നഃ The NaH has acquired swaram since it comes after ‘A’ which is UdAttam and after ‘ta’ in brahmanaspata acquires anudAttam.	नः नः നഃ This will be converted to anudAttam in Pada Paatam (Rule)
शृण्वन्न , ஶ்ருண்வன்ன், ശൃണ്വന്ന് ശൃണ്വന്ന്	शृण्वन् ஶ்ருண்வன்ன் ശൃണ്വന്ന് No change in Pada Paatam.

'nnU' has come in vAkyam due to joining of 'nn' and 'U', that 'U"has been separated which belongs to UtiBhiH	
ऊतिभिः, ஊதிபி$_4$: ഊതിഭിഃ This has Uti+BhiH. So padam becomes utiBhiH iti Uti – Bhi vAkyam has natural flow of anudAttam, udAttam and Swaritam.	ऊतिभिरित्यूति – भिः ஊதிபி$_4$ரித்யூதி -- பி$_4$: ഊതിഭിരിത്യൂതി – ഭിഃ Visaragam represents 'r' since vowel sound is 'e'. 'r' with 'i' of iti becomes 'ri'. The 'ti' of iti combines with 'U', giving ityU. ityU is anudattam before udAttam 'ti' or iti
सीद ஸீத$_3$ സീദ vAkyam has swaram on second letter with no swaram for first letter sI.'da' has acquired anudAttam due to following sA of sAdanam.	सीद , ஸீத$_3$, സീദ Pada Paatam assigns anudAttam to 'si'
सादनं ,ஸாத$_3$னம், സാദനം	सादनम् , ஸாத$_3$னம், സാദനം No change from vAkyam.

In Pada Paatam, the last padam is not repeated as Padam iti padam unless it is a Padam with split (PS) or Pragraha (PG) or Pragraha with padam split (PGS).

3 Basic Rules for a Padam

3.1 Guiding Principles

1. PA Book 6 Chapter 1 Rule 158 says that “A Padam, with an exception of one syllable, is unaccented (no swaram). The simple generic interpretation to be taken is that only one letter in a Padam will be accented/marked with udAttam swaram. Let us call this for our simple understanding as a Jeeva Swaram. Scholars (UdAttam) and Vedic experts in their discussions want a reader to focus on the udAttam, so that it is easy to identify the previous letter of the padam/word, if any, as anudAttam and the letter following udAttam as Swaritam.

   Note: Words with two Padams may have two such key letters with two udAtta letters. Swarams can be derived to support other letters. With the addition of iti which has ‘I’ as udAttam, there can be four letter or even five letter udAttams. Please note that we will take a slightly different definition for easy understanding that is based on the swaram marked and call the Swaram marked as Prime Swaram if there is one anudAttam before udAttam (Prime) and the following Swaritam marked as Prime Swaritam.
2. When you have a Padam with three or more letters, the first one has an anudAttam as Prime Swaram; the third letter may acquire Swaritam or Dheerga Swaritam. This acquisition is not covered in above rule since it is basic to Swaram rule. This acquisition or derived swaram does not in itself be treated the Prime or Jeeva swaram as quoted in the above rule.

   Examples गणानां॑ मीढुषे॑, धृष्णवे॑,

The Scholars would rather focus on the Na,Dhu, ShNa as udAttam (as Jeeva Swarams) leading to the previous letter being anudAttam and the following as Swaritam.

3. One observervation is that, there are single-letter Padams, like mA, Sam, dyau which are marked as udAttam only. The Pada Paatam only represents these with udAttam, without conversion to anudAttam swaram in vAkyam. This udAttam needs to be treated as the Prime Swaram and Jeeva Swaram. They do not acquire Swaram in general unless the Pada Padam/Sandhi rules require as an exception. Occurrence of such words with Swaram is distinctly marked in Pada Paatam.
   Please see the example below.
4. When we take ShoDasa-raudrikaraNa Mantra TS 1.3.3.1,

   the Pada Paatam is given as mA` | mA | mA` before hi`(gm)`sI`H;

   in vAkyam we render this as mA` , mA mA`, with the third mA` acquiring

   Swaritam as it follows a string of anudAttam mA`, udAttam mA.

5. Same Padam may, therefore, be represented in Pada Paatam with different Swaram marking based on the **derivation from vAkyam**. We have covered some illustrative examples later in table of examples in **Section 7.**
6. The basic rules of Swaram based on grammatical construction of a word/Padam, its root, verb, tense, affix, suffix and related classification is detailed by Sage Panini in his work, as a main guide.

7. When there is a conflict of Swaram markings, rules are given about priority to be given to a rule or type of Swara derivation. The normal guidance given is that the second appearing rule or swaram shall have priority over the first.
8. If both Swaritams formed hold their places, a Kampa swaram (ref 6.15) with successive Swaritams are formed in a statement.
9. In a Padam, if there is a Swaritam in the middle of a Padam, then following letters will assume udAttam till the end of the Padam. They are called Ekasruti (ES). However, a letter considered as **Ekasruti (ES)** may assume an anudAttam to support a following UdAttam (if it is prime) to the following padam in vAkyam. Readers shall bear it mind to treat **Ekasruti (ES)** as a hidden anudAttam or Support unmarked anudAttam looking pracaya.
10. When a Padam consists of more than one or more component, it is represented as Padam iti Padam (Part1) – Part 2. The basic grammar rules of Visarga, Vowel, Consonant Sandhis and other grammar rules play an important role.
11. In Pada Paatam, when two Padams are joined together, there could be one or more than one Prime Swaram based on which the swaram marking is determined. **(Section 8)**
12. Words defined as Pragrihya (or Pragraha) would not combine on the last part of the Padam. Pragrihyas are words which represent dual noun or verb forms that do not combine due to Vowel Sandhi.
    Section 10 covers some explanation of this concept.
13. Preposition, prefixes like A, pra, prati, anu, ni, vi, ut will be represented as the words plus iti. If two such words follow each other, the first one will be represented as it is. See examples in **Section 5**.

We are providing some basic rules on how a Padam itself is constructed from vAkyam with examples. These may not include advanced rules applied for specific situations or words. The order is as per the convenicne and understanding of the reader. We are including words from Ganaanam thavaa, Rudram and common Pada Paatam words which readers might be more conversant with.

3.2 Rule 1- Words with No Swaram converts to AnudAttam

If a word or Padam ***does not have any swaram completely*** and marked in udAttam (indicating EkaSruti or Pracaya) in vAkyam, it shall acquire ***all anudAttam in Pada Paatam***.

vAkyam/Samhita	Final Padam
ह्वामहे , ஹவாமஹே ഹവാമഹേ	ह्वामहे , ஹவாமஹே ഹവാമഹേ
रुद्र , ருத்3ர, രുദ്ര	रुद्र , ருத்3ர, രുദ്ര
मृडय, ம்ருட3ய, മൃഡയ	मृडय, ம்ருட3ய, മൃഡയ

Note: In vAkyam, any of the letters in these words/padams may acquire swarm. An example **TS 3.3.1.2;** to observe 'dadhAtu' from a well-known mantra.

मयि ( ) मेधां मयि प्रजां मय्यग्निस्तेजो दधातु मयि मेधां मयि प्रजां मयीन्द्र इन्द्रियं दधातु मयि मेधां मयि प्रजां मयि सूर्यो भ्राजो दधातु ।

Pada Paatam for the mantra:

मयि ( ) । मेधाम् । मयि । प्रजामिति प्र – जाम् (प्रजां) । मयि । अग्निः । तेजः । दधातु । मयि । मेधाम् । मयि । प्रजामिति प्र – जाम् (प्रजां) । मयि । इन्द्रः । इन्द्रियम् । दधातु । मयि । मेधाम् । मयि । प्रजामिति प्र ट्ट जाम् (प्रजां) । मयि । सूर्यः । भ्राजः । दधातु ।

மயி ( ) மேதா$_4$ம் மயி ப்ரஜாம் மய்யக்$_3$னிஸ்தேஜோ தா$_3$தா$_4$து மயி மேதா$_4$ம் மயி ப்ரஜாம் மயீந்த்$_3$ர இந்த்$_3$ரியந் தா$_3$தா$_4$து மயி மேதா$_4$ம் மயி ப்ரஜாம் மயி ஸூர்யோ ப்$_4$ராஜோ தா$_3$தா$_4$து ।

Pada Paatam for the mantra:

மயி ( ) । மேதா$_4$ம் । மயி । ப்ரஜாமிதி ப்ர - ஜாம் (ப்ரஜாம்) । மயி । அக்$_3$னி: । தேஜ: । தா$_3$தா$_4$து । மயி । மேதா$_4$ம் । மயி । ப்ரஜாமிதி ப்ர - ஜாம் (ப்ரஜாம்) । மயி । இந்த்$_3$ர: । இந்த்$_3$ரியம் । தா$_3$தா$_4$து ।

മയി । മേതാ4ം । മയി । പ്രജാമിതി പ്ര - ജാം (പ്രജാം) । മയി ।

സൂര്യ: । പ്4രാജ: । ത3താ4ത്തു ।

മയി ( ) മേധാം മയി പ്രജാം മയ്യഗ്നിസ്തേജോ ദധാതു മയി മേധാം മയി പ്രജാം മയീന്ദ്ര ഇന്ദ്രിയം ദധാതു മയി മേധാം മയി പ്രജാം മയി സൂര്യോ ഭ്രാജോ ദധാതു ।

Pada Paatam for the mantra:

മയി ( ) । മേധാം । മയി । പ്രജാമിതി പ്ര ജാം (പ്രജാം) । മയി ।
അഗ്നിഃ । തേജഃ । ദധാതു । മയി । മേധാം । മയി ।
പ്രജാമിതി പ്ര–ജാം (പ്രജാം) । മയി । ഇന്ദ്രഃ । ഇന്ദ്രിയം ।
ദധാതു । മയി । മേധാം । മയി । പ്രജാമിതി പ്ര – ജാം (പ്രജാം) ।
മയി । സൂര്യഃ । ഭ്രാജഃ । ദധാതു ।

Note: First observe that the 'dadhAtu' in Pata Paatam is marked with all anudAttam in all three places; which indicates that it is unmarked or it has no marked Prime swarm in vAkyam. However, in vAkyam, the 'tu' marked in yellow assumes anudAttam to support udAttam 'ma' in mayi twice and 'da' assumes Swaritam to support the udAttam 'in' in indriyam.
Now after 'brAjO which has a Swaritam on 'jO', the last dadhAtu does not acquire any swaram. This is technically called Ekasruti or monotonous rendering without **swaram** (or **accent** as referred in English texts).

3.3 *Rule 2 First letter Swaritam converts to anudAttam*

The first letter of a Padam acquires Swaritam normally to support the udAttam in the previous word. Now treat the next following letter's swaram as Prime Swaram if marked with anudAttam as Prime anudAttam. This will be followed by udAttam.

vAkyam/Samhita	Final Padam
कवीनाम् ,कवीनाम्,कवीनाꣳ	कवीनाम् ,कवीनाम्,कवीनाꣳ
शार्व्या, ꣳरर्व्या, ꣳशर्व्याꣳ	शार्व्या, ꣳरर्व्या, ꣳशर्व्याꣳ

3.4 *Rule 3 Full Padam converts anudAttam if first letter alone is marked with Swaritam*

When the first letter is converted to anudAttam in Padam, the rest all unmarked UdAttam (read EkaSruti) is converted to anudAttam like normal rule.

vAkyam/Samhita	Final Padam
आ प्यायध्वम् आ प्यायत्$_4$वम् आ प्यायध्वम	एति । प्यायध्वम् एति । प्यायत्$_4$वम् एति । प्यायध्वं
अदृशन् अत्$_3$ꣳरुꣳन्न् अदृꣳशन्	अदृशन्न् अत्$_3$ꣳरुꣳन्न् अदृꣳशन्न्

मृडयाति म்ரு3டயாதி மூ3ட³யாதி	मृडयाति म்ரு3டயாதி மூ3ட³யாதி
वृणक्तु வ்ரு3ணக்து வூ3ணக்து	वृणक्तु வ்ரு3ணக்து வூ3ணக்து

3.5 *Rule 4 All unmarked udAttam converts to anudAttam till the anudAttam in vAkyam*

vAkyam/Samhita	Final Padam
सीद, स्ँत3, सीऽ Here 'da' derives anudAttam swaram to support following 'da' in following sadanam.	सीद , स्ँत3 , सीऽ The application of Rule 'sl' becomes anudAttam but would be treated as Jeeva Swaram as per marking.
अधिवक्ता, अदि4वक्ता, அதிவக்தா	अधिवक्ता, अदि4वक्ता, அதிவக்தா

सहस्राक्षाय,	सहस्राक्षाय,
സഹസ്രാക്ഷായ,	സഹസ്രാക്ഷായ,
സഹ(സ്രാക്ഷായ	സഹ(സ്രാക്ഷായ

Prime anudAttam (PA) is the last marked anudAttam in Pada Paatam. Classical method is to focus on 'kthA' 'kShA' as Jeeva Swaram (udAttam).

3.6 Words with two Padam is split through 'iti'

When a Word occurs with two constituent Padam it is represented as Word iti Padam1A – Padam1B. This is subject to vowel, visarga sandhi and normal grammar rules and also subject to Pada Paata Conventions. Iti, the ti by default has Swaritam subject to application of Swaram and Sandhi rules.

Some important Vowel Sandhi rules to bear in mind are:

1. Visaragam get dropped before 'e' of iti being vowel
2. Words with sound 'ae' gets converted to 'a'
3. Words with sound 'ai' gets converted to sound 'aa'
4. 'e' in iti gets combination with other letters to produce the Sandhi letters.
5. Both 'i' and 'ti' may combine with the previous word and following word to provide a new combination
6. 'iti' will not combine with the last part of Pragrihya Padams **(Section 10)**

7. ‘iti’ as a rule has Swaritam on ‘ti’ however, its Swaram gets dropped if the following letter acquires Swaritam; get anudAttam to support following Swaritam or sometimes dropped to indicate absence or non-acquisition of Swaram.
8. Swaram Rules are provided in Section **6.**

   (Main reference is PrAtiSAkyam for this purpose.)

We will see some examples with different word formations:

3.7 If first padam has prime swaram, then it is marked in second part as it is

Please observe Siva and giri in the second part of the Final Padam as per Pada Paatam.

vAkyam/Samhita	Final Padam
शिवतमा ശിവതമാ ಶಿವತಮಾ add iti afer SivatamA and then split two padams as Siva + tama ma with i of iti becomes mE. ‘**ti’** has Swaritam. Therefore ‘ta’ acquires anudAttam. While joining the Padam back to vAkyam ‘ta’ in tamA of second part will acquire swaritam which follows ‘va’ udAttam.	शिवतमेति शिव – तमा ശിവതമേതി ശിവ -- തമാ ಶಿವತಮೇತಿ ಶಿವ – ತಮಾ Siva has separate swaram for Siva and retained as it is in second part. ‘Si’ Prime anudAttam and ‘va’ Prime udAttam. ‘tamA’ is a separate padam. First letter of Padam alone is Swaritam so entire Padam tamA acquires anudAttam.Rule 3.4 above

गिरिशन्त कि$_3$रीஶந்த ഗിരിശന്ത Rules similar to previous example 'gi' Prime udAttam (PU) ri Prime Swaritam (PS)	गिरिशन्तेति गिरि – शन्त कि$_3$रीஶந்தேதி கி$_3$ரி -- ஶந்த ഗിരിശന്തേതി ഗിരി – ശന്ത Santa follows 'ri' swaritam it is Ekasruti, joining back to vAkyam,

3.8 *If first padam has no prime swaram, they get anudAttam in first part but swaram is not marked in second part*

Please observe giri and yAtu in the second part of the Final Padam as per Pada Paatam.

vAkyam/Samhita	Final Padam
गिरिशान्त कि$_3$रीஶந்த ഗിരിശന്ത 'ta' marked in blue has acquired swaram in vAkyam to support 'ha' , the udAttam in hastE	गिरिशान्तेति गिरि – शान्त कि$_3$रीஶந்தேதி கிரி$_3$ -- ஶந்த ഗിരിശന്തേതി ഗിരി – ശന്ത Both the letters in Santa have no swaram and marked with anudAttam in Pada Paatam.
यातुधान्यः யாதுதா$_4$ன்ய:	यातुधान्य इति यातु – धान्यः யாதுதா$_4$ன்ய இதி யாது-- தா$_4$ன்ய:

യാതുധാന്യഃ This is a special padam with a Prime Swaritam (PS) that forms immediately after anudAttam (PU) normally applicable to words, conjunct consonants with 'ya', 'la' or 'va'	യാതുധാന്യ ഇതി യാതു– ധാന്യഃ

Explanation:

1. **When the second part has first Padam split ending in udAttam please remember to introduce Swaritam in the second Padam like in SivatamA.**
2. **When first Padam split is all marked in udAttam (Pracaya) and second part has all anudAttam marking the entire Padam is in anudAttam, that is without Swaram like in giriSanta as in Section 3.8.**
3. **When the first part has Swaritam in the first split of the Padam, the second padam are all in ekaSruti and therefore will be marked in anudAttam in Pada Paatam. They have no Swaram in vAkyam. Example is giriSanta in Section 3.7.**

3.9 The Second part has distinct swaram it will be reflected in the Second Part

This becomes clear when the first Padam does not acquire any swaram in vAkyam or they all aquire anudAttam in Padam.

vAkyam/Samhita	Final Padam
अधिवक्ता	अधिवक्तेत्यधि – वक्ता

அதி$_4$வக்தா അധിവക്താ	அதி$_4$வக்தேத்யதி$_4$ -- வக்தா അധിവക്തേത്യധി – വക്താ
सुमङ्गलः സുമങ്ക$_3$ലഃ സുമങ്ഗലഃ Su in Sumangalaha has acquired Swaritam to support ,udAttam BruH in baBruH. So, it will acquire anudAttam in Padam.	सुमङ्गल इति सु – मङ्गलः സുമങ്ക$_3$ല ഇതി സു -- മങ്ക$_3$ലഃ സുമങ്ഗല ഇതി സു – മങ്ഗലഃ
ऽवसर्पति ऽവസർപതി ऽവസർപതി 'ti' has acquired anudAttam to support 'ni' in nilagrIva in vAkyam. (not shown)	अवसर्पतीत्यव – सर्पति അവസർപതീത്യവ -- സർപതി അവസർപതീത്യവ – സർപതി The key prime swarams are 'va' Prime anudAttam(PA), 'rpa' Prime Swaritam and ti Ekasruti.

3.10 <u>The Second Padam has Swaritam, the first padam may have pracaya in vAkyam</u>

In Pracaya rule, all aksharams are marked with anudAttam to support a Swaritam or udAttam that follows. **If a letter which is Swaritam originally is converted to anudAttam, the previous letters of that Padam shall also acquire anudAttam at the beginning of a Vedic Statement. If the word consists of more constituent Padams, the anudAttam occurs till a udAttam/Swaritam occurs. The letter prior to that Swaritam will**

be normally udAttam. Pracaya rule occurring in the middle of a Vedic statement is also observed.

vAkyam/Samhita	Final Padam
ज्येष्ठराजं ஜ்யேஷ்ட2ராஜம் ஜ்யேஷ்ட2ராஜம் The Padam for jyEShTa is jyEShTa. The ShTa acquires anudAttam to support Prime UdAttam 'rA' (PU) but rAjam but ja in itself had acquired anudAttam to support the 'bra' (udAttam) in following brahma.	ज्येष्ठराजमिति ज्येष्ठ–राजम् ஜ்யேஷ்ட2ராஜமிதி ஜ்யேஷ்ட2 --ராஜம் ஜ்யேஷ்ठராஜமிதி ஜ்யேஷ்ठ – ராஜம் When the **ShTa** acquires anudAttam, the first letter **jyE** also acquires anudAttam in vAkyam as Pracaya. After swaritam ti the jyEShTa is an Ekasruti in first part. The correct vAkyam is "jyEShTarAjam
अवतत्य (धनुस्त्व७) அவதத்ய (த4னுஸ்த்வ४) 	अवतत्येत्यव – तत्य அவதத்யேத்யவ -- தத்ய

അവതത്യ (ധനുസ്ത്വഴ്)	അവതത്യേത്യവ – തത്യ
The Padam for tatya is tatya, but it acquires anudAttam to support 'nu' in dhanu. Padam for ava is ava.	The 'va' in ava is Prime anudAttam (PA) to support udAttam 'ta' in tatya, now it is the start of the statement, so 'a' also acquires anudAttam, so ava becomes a pracaya in vAkyam also.
TS 2.6.9.7 and prokShaNa Mantra (as per Padam) सु + प्रजाः + त्वम+ एति +शास्ते സു + പ്രജാഃ + ത്വം + ഏതി + ശാസ്തേ സു + പ്രജാഃ + ത്വമ + ഏതി +ശാസേ	(as rendered in vAkyam **2.6.9.7** in the middle of a panchaati rendered as EkaSruti and beginning pracayam) सुप्रजास्त्वमा शास्ते സുപ്രജാസ്ത്വമാ ശാസ്തേ സുപ്രജാസ്ത്വമാ +ശാസേ In prokShaNa Mantram as a separate ruk rendered with pracayam

su has no swaram in vAkyam. prajAH has anudAttam on pra. 'tvam' and 'A(eti)' is udAttam in Padam or vAkyam. 'supra is anudAttams. Since SA in SAstE acquires Swaritam, occurring after udAttam 'A' the support anudAttam is acquired by 'jA' hence, su and pra also acquire anudAttam.	सुप्रजास्त्वमा ऽशास्ते ஸுப்ரஜாஸ்த்வமா ஶாஸ்தே സു പ്രജാസ്ത്വമാ +ശാസേ

3.11 Additional Swaram may be acquired to Support Swaritam or anudAttam)

vAkyam/Samhita	Final Padam
अ(ऽ)पापकाशिनी அ(ऽ)பாபகாஶினீ അ(ഽ)പാപകാശിനീ 'ti' of iti combines with 'a' to give tya which is udAttam. When udAttam enters a combination generally the resultant letter is udAttam. Note 'a' Prime UdAttam (PU) 'pA' Prime Swaritam.	अपापकाशिनीत्यपाप–काशिनी அபாபகாஶினீத்யபாப -- காஶினீ അപാപകാശിനീത്യപാപ – കാശിനീ As per Padam the following pA in pApa has Swaritam. The previous two letters tya and **nI** are both udAttam; so Si gets support anudAttam.

Summary :

1. In Pada Paatam, only a Jeeva udAttam, which is unmarked and a following Swaritam alone will be marked. Rest all letters acquire

anudAttam. Let us give a term 'Support anudAttam', which signifies Sannatara.

2. The udAttam that follow Swaritam in Padam are unmarked, (Ekasruti) (ES); but for Swaram acquisition can be taken as anudAttam from a technical perspective. Let us also take it as Support AnudAttam. (SA)

3. If all letters are marked as anudAttam, take the first letter as the Jeeva Swaram.

4. If a Padam has special single letter word with no marking, ie udAttam they will remain udAttam in vAkyam. (unless specific sandhi rules make it a swaritam- ref Section 6)

4 Quick Reference for Padam Paatam Swarams and link to vAkyam for Swaram acquisition/Change

All the rules given below are subject to change when a Sandhi occurs since Swaram of the constituent letters change as per Sandhi Rules or application of Pracaya.

Note - @ symbol used for anudAttam, # for swaritam and $ for dheerga Swaritam in the following tables.

4.1 Padam with No Marking; normally single letters (with visarga,halant ending also)

Marking in Pada Paatam	udAttam
Prime Swaram	**This single letter.** **Jeeva Swaram as per Classical Ref.**
Examples of Padams	**mA, tat, tvam, Sam, vai, dyau**
Conversion to vAkyam	**always udAttam in vAkyam**; When the halant in these words join another vowel to form a Consonant, this new consonant may acquire swaram. If another letter with swarm combines with this UdAttam, it will remain udAttam Swaram normally.
Swaram Rules in vAkyam	1) Previous Possible letter is anudAttam, 2) Following Possible letter is Swaritam

Exceptions	Words like **mA** may be **marked in anudAttam** based on vAkyam in Pada Paatam. This udAttam may change subject to Sandhi Rules.

4.2 Single letters with marking (with visarga,halant ending also)

Marking in Pada Paatam	**anudAttam**
Prime Swaram	**This single letter**
Examples of Padams	**mE@, tE@, na@, na@H, va@H, mA@, ca@,**
Conversion to vAkyam	1. Rendered with anudAttam in vAkyam at the start of a Ruk 2. Rendered as EkaSruti (unmarked udAttam) in the middle of a Ruk
Swaram Rules in vAkyam	can acquire Swaritam or anudAttam based on flow of vAkyam
Exceptions	Variance may occur due to Sandhi rules

4.3 Padam with two letters

4.3.1 First anudAttam & Second udAttam

Marking in Pada Paatam	**first letter anudAttam**
Prime Swaram **Jeeva Swaram**	**The first letter in anudAttam (PA)** **Classical Method the udAttam (PU) (Second)**

Examples of Padams	Si@vA, u@ta, a@sau
Conversion to vAkyam	first always anudAttam and second will be udAttam
Swaram Rules in vAkyam	1) Following Possible aksharam is Swaritam or a prime anudAttam(PA) if this PA is followed by another udAttam
Exceptions	Subject to Sandhi Rules

4.3.2 both letters marked as anudAttam

Marking in Pada Paatam	**Both in anudAttam**
Prime Swaram	**First anudAttam**
Examples of Padams	ru@dra@, a@stu@, ku@ru@, a@sya@ e@na@m
Conversion to vAkyam	1. Rendered with anudAttam in vAkyam as Pracaya at the start of a Ruk 2. Rendered as Ekasruti the middle of a Ruk. Both are Support anudAttam (SA)
Swaram Rules in vAkyam	Both these letters **can** acquire Swaram, first one as Swaritam to support previous udAttam and Second as anudAttam to support upcoming udAttam.
Exceptions	Sandhi Rules

4.3.3 first as udAttam and Second one as Swaritam

Marking in Pada Paatam	**first as udAttam** and second one as Swaritam
Prime Swaram	**the Swaritam (PS)** **the first occurring udAttam (PU) in Classical Text**
Examples of Padams	nama#H, viSvA$, hastE$, maya#H, paya#H
Conversion to vAkyam	1. Rendered without Change
Swaram Rules in vAkyam	Swaram is retained as it is. First udAttam, Prime anudAttam (PA) does not acquire Swaram. The Swaritam can acquire anudAttam to support following letter.
Exceptions	Sandhi Rules and application of Pracayam

4.4 Padam with three letters with first anudAttam,udAttam, Swaritam

Marking in Pada Paatam	First anudAttam, second udAttam and third Swaritam
Prime Swaram/Jeeva Swaram	The first anudAttam is Prime The udAttam is Jeeva Swaram (PU) as per Classical method Third is Prime Swaritam (PS)
Examples of Padams	vi@SvatA#H, sa@BABya#H,

	ga@NAnA$m, mI@DhuShE$, dhRu@ShNavE$, ma@nyavE$
Conversion to vAkyam	1. Rendered without Change
Swaram Rules in vAkyam	1. Rendered without Change. But the Swaritam of the third letter can acquire anudAttam to support a following anudAttam or Swaritam
Exceptions	Sandhi Rules

4.5 Padam with three letters or more letters

4.5.1 all marked in anudAttam

Marking in Pada Paatam	**All in anudAttam**
Prime Swaram/Jeeva Swaram	**The first letter**
Examples of Padams	mRu@Da@ya@, da@dhA@ti@, a@vO@ca@t, va@dA@ma@si@
Conversion to vAkyam	1. Rendered with anudAttam in vAkyam at the start of a Ruk 2. Rendered as udAttam in the middle of a Ruk
Swaram Rules in vAkyam	They are all Support anudAttams (SA) normally letters can acquire Swaram. Generally, first one as Swaritam (AS) to support previous udAttam last one as anudAttam (AA) normally to support following udAttam/ Swaritam.

Exceptions	Sandhi Rules

4.5.2 all except last letter marked in anudAttam

Marking in Pada Paatam	**all except last letter marked in anudAttam**
Prime Swaram	**The last marked anudAttam**. (PA) The last letter **udAttam** in Classical method (PU)
Examples of Padams	sa@vi@tA, gA@ya@trI pra@tha@maH, a@ru@NaH
Conversion to vAkyam	1. Rendered with anudAttam in vAkyam at the start of a Ruk 2. Rendered as EkaSruti in the middle of a Ruk
Swaram Rules in vAkyam	Letters marked as Support anudAttam (e.g 'sa' ,gA,pra a)**before prime anudAttam** can acquire Swaram. Following possible letter will be Swaritam
Exceptions	Sandhi Rules

4.5.3 Has a set of anudAttam and one Swaritam

Marking in Pada Paatam	**Has a set of anudAttam and a Swaritam**
Prime Swaram	The **last of the Anudattam** marked. (PA)

	As per Scholars, the **UdAttam (PU)** that comes after the last anudAtta, in Classical method.
Examples of Padams	su@ma@~ggala#H , a@va@sarpa#ti sa@ha@srA@kShAya#
Conversion to vAkyam	1. Rendered as Pracaya (anudAttam) in vAkyam at the start of a Ruk if more than one anudAttam. 2. Rendered as EkaSruti in the middle of a Ruk
Swaram Rules in vAkyam	1. any of the anudAttam marked before the Prime anudAttam can acquire swaram in vAkyam. 2. The letters that come after Swaritam, marked as udAttam in vAkyam (ekaSruti part) can acquire swaram to Support following udAttam/Swaritam generally
Exceptions	Sandhi Rules or application of Pracayam

4.5.4 Swaritam comes as a Second letter

Marking in Pada Paatam	**Second letter is Swaritam**
Prime Swaram	This Swaritam is Prime Swaritam (PS) First occurring **udAttam before this Swaritam** in Classical method.

Examples of Padams	nIla#grIvAH bANa#vAn yaja#mAnasya Osha#dhIByaH
Conversion to vAkyam	First letter will be always udAttam (PU) Rendered as it is in vAkyam.
Swaram Rules in vAkyam	Rendered as it is in vAkyam. The letters that come after Swaritam marked in udAttam, (ekaSruti part), can acquire swaram to Support following Swaritam generally
Exceptions	Sandhi Rules or application of Pracayam

4.5.5 Swaritam comes in the first letter

Marking in Pada Paatam	**First letter is Swaritam**
Prime Swaram	**This Swaritam**
Examples of Padams	svi#ShTam, vyu#ptakESAya trya#mbakam
Conversion to vAkyam	Rendered as it is in vAkyam.
Swaram Rules in vAkyam	The letters that come after Swaritam marked in udAttam, (ekaSruti part), can acquire swaram to Support following udAttam/Swaritam generally
Exceptions	Generally, this is not affected by Sandhi Rule since such words are out of one or more padams with Sandhi involved.

4.6 Padams with only anudAttam and Swaritam

These are words with special mention in Sanskirt Grammar. These are Padams/words with the last letter as conjunct consonants of letter **'y','v', 'l',**. These **Padans have anudAttam before Swaritam** and no udAttam is marked in Pada Paatam.

Marking in Pada Paatam	**All initial letters in udAttam and the last letter as Swaritam**
Prime Swaram	**This Swaritam**
Examples of Padams	yA@tu@dhA@nya#, Sa@ra@vyA#, rA@ja@nya#H, sEnAqnyE$, vI@rya#H ka@lvA$H (ca mE)
Conversion to vAkyam	Rendered as in Padam at the beginning of a Ruk. There is no PU. Rendered with the last anudAttam (PA) and Swaritam (PS) in vAkyam.
Swaram Rules in vAkyam	The Swaritam of these words **remain Swaritam** and does not acquire udAttam to support following Swaritam.
Exceptions	Generally, these are not affected by Sandhi Rule.

4.7 Different perspective of the nature of Swaras

Connotations: - Used with an idea to help Veda learners who could observe flow of Swarams. These terms are **not a part of any Classical text** and are given for easy understanding to note the change in Swara flow.

Abbreviations used:

PP – Pada Paatam, V – vAkyam

PS – Prime Swaritam, PU – Prime udAttam, PA – Prime anudAttam

SA – Support anudAttam ES – Ekasruti (unmarked udAttam letters after Swaritam)

AS – Acquired Swaritam AU – Acquired udAttam AA – Acquired anudAttam

In PP/V	Swaram nature	Nature as A/U/S or what it can become	Explanation	Hints/Comments
PP	**PS**	Swaritam	Prime in a Padam	
PP	**PU**	udAttam	Prime in a Padam	
PP	**PA**	anudAttam	Prime in a Padam	
PP	**SA**	Support anudAttam	Letters that are **marked additionally as anudAttam** in Pada Paatam.	These can acquire Swaram**;** when they **donot**, then they are represented as unmarked **udAttam** in vAkyam(ES) or SA

PP	**ES**	Ekasruti	Letters appear as udAttam after the Prime Swaritam in Padam and all Other Paatams	Represented as udAttam (ES) in vAkyam unless Swaram is acquired
V	**AS**	Acquired Swaritam	A letter that **acquires Swaritam** to support a prior anudAttam/udAttam	Or due to Sandhi
V	**AA**	Acquired anudAttam	A letter that **acquires anudAttam** to support a following udAttam/Swaritam	
V	**AU**	Acquired udAttam	Swaritam gives up its Swaram to next letter Swaritam anudAttam becomes udAttam due to Sandhi or Swaram rule	Normal Rule Specific to the situation and words
V	**PS**	PS	Retains in Swaritam	
V	**PS**	AA	Becomes AA to support a following udAttam/Swaritam	Or Sandhi Rule
V	**PS**	AU	Becomes AU to support the next letter which is Swaritam	Or Sandhi
V	**PS**	AU	Becomes AU due to Sandhi Rules	
V	**PU**	PU	More common. Remains PU without acquiring Swaram.	Previous letter anudAttam and next letter swaritam
V	**PU**	AS	Acquires Swaritam due to Sandhi Rules	

V	**PU**	AA	Acquires anudAttam due to Special rules	Or Pracayam
V	**PA**	PA	Will generally remain PA	
V	**PA**	AU	Subject to Sandhi Rules	
V	**PA**	AA	Subject to Sandhi Rules	
V	**PA**	~~AS~~	Will not become AS to support PA or AA	Can become an independent Swaritam Subject to Sandhi Rules

4.8 Special Rules for udAttam in vAkyam and Other Paatams

4.8.1 udAttam (jeeva) as per classical text remains as it is vAkyam

See the Examples in Table below

As Per Padam	As in vAkyam	Comments and Notes
मन्यवे॒ மன்யவே॒ மந்யவே॒	मन्यव॑ மன்யவ॑ மந்யவ॑	'nya' is prime udAttam (PU) to support the anudAttam 'ma' and Swaritam vE. In vAkyam it becomes 'va' before vowel 'u' of utO (Vowel Sandhi Rule)
तया॒ தயா॒	तया॑ தயா॑	'ta' as start udAttam (PU) makes 'yA' with Swaritam. (PS in PP) As a Padam ending 'yA' will be Dheerga

തയാ॑	തയാ᳀	Swaritam; in vAkyam unless a conjuct consonant follows it will be Swaritam.
പുരു॑ഷമ് പുരു॑ഷം । പുരു॑ഷം	പുരു॑ഷം പുരു॑ഷഞ് പുരു॑ഷം	‘pu’ prime udAttam, ru swaritam, Sham has Ekasruti status (ES)
ജഗ॑ത് ജഗ॑ത് । ജഗ॑ത് ।	ജഗ॑ത് ജഗ॑ത് ജഗ॑ത്	Ja udAttam (PU) to support ‘gat’ in Swaritam
താമ്രഃ താമ്രഃ । താമ്രഃ ।	താമ്രോ താമ്രോ താമ്രോ	‘tA’ in anudAttam (PA) followed by prime udAttam (PU) ‘mraH’ becomes ‘mrO due to Visarga sandhi.
ബഭ്രുഃ	ബഭ്രുഃ	‘ba’ anudAttam (PA) followed by BruH (PU)

ப3ப்4ரு: ஬ப்⁼ப்⁼ரு: ।	ப3ப்4ரு: ஬ப்⁼ப்⁼ரு: ।	
இ⁼மாம் இமாம் ஈமாம ।	சே⁼மாꣳ⁼ ரு⁼த்3ரா சே⁼மாꣳ⁼ ரு⁼த்3ரா சேமாꣳ ருத்3ரா அ⁼பி4தோ அபி4தோ	Padam – yE + ca+ imam ca+I becomes cE ‘e’ anudAttam (PA) followed by ‘mAm’ becomes ‘mA(gm) but retains udAttam swaram (PU)
ரு⁼த்3ரா: ரு⁼த்3ரா: ரு⁼த்3ராஃ ।	ரு⁼த்3ரா அ⁼பி4தோ ரு⁼த்3ரா அ⁼பி4தோ ரு⁼த்3ரா அபி4தோ	‘ru’ anudAttam (PA) followed by ‘drA’ retains udAttam. (PU)
ध॑न्व॒नः த4ன்வ॑ன: ध॑न्व॒नाः	ध॑न्व॒न த4ன்வ॑ன ध॑न्व॒न	‘dha’ prime udAttam (PU) followed by ‘nva’ Swaritam (PS). ‘naH’ is ekasRuti.

Note: These may change due to application of Sandhi Rules or application of Pracayam Rule.

4.8.2 Swaram Rule before and after such Prime/Jeeva udAttam

1. When a Prime/Jeeva udAttam occurs, the previous possible letter of the earlier word/padam which can acquire Swaram is marked anudAttam in vAkyam, Krama and other Paatams.
2. When a word/padam is follows a Prime/Jeeva udAttam, the next possible letter of the following word/Padam is marked in Swaritam in vAkyam, Krama and other Paatams. A **Prime anudAttam (PA) does not acquire Swaritam after Prime udAttam (PU)** because that PA is followed by another PU.

As Per Padam	As in vAkyam	Comments and Notes
पुरुषम् + जगत् புருஷம் । ஜக3த் । പുരുഷം । ജഗത് ।	पुरुषम् जगत् புருஷஞ் ஜக3த் പുരുഷം ജഗത്	'pu' is udAttam (PU) followed by 'ru' Swaritam (PS). 'Sham' is ekasruti. Followed by next word 'ja' with udAttam (PU) and 'gat' Swaritam (PS). So 'Sham' acquires anudAttam (AA) to support 'ja' udAttam and it cannot acquire any other Swaram as prime udAttam. (PU)

धन्वनः+त्वम्+ उभयोः தன்வனः । த்வம் । உப4யோஃ: । ധന്വനഃ । ത്വം । ഉഭയോഃ ।	धन्वनस्त्व मुभयो தன்வனஸ்த்வ முப4யோ ധന്വനസ്ത്വ മുഭയോ	‘dha’ of dhanvanaH is PU. ‘nva’ is PS. ‘tvam’ is a Padam with udAttam, so naH which is Ekasruti (ES) acquires anudAttam (AA). ‘yO’ acquires anudAttam to support following udAttam in vAkyam ‘rA’ of rAtniyor.
ताम् । कुरु । मा । हिꣳसीः । पुरुषम् தாம் । குரு । மா । ஹிꣳஸீ: । புருஷம் താം । കുരു । മാ । ഹിꣳസീഃ । പുരുഷം	तां कुरु मा हिꣳसीः पुरुषं தாங் குரு மா ஹிꣳஸீ: புருஷஞ்	‘tAm’ is a prime udAttam (PU), the Padam ‘kuru’ is all anudAttam (SA) in PP with ability to acquire Swaram. So ‘ku’ acquires Swaritam (AS). ‘ru’ acquires anudAttam (AA) before ‘mA’, a Prime udAttam. (PU)

താം । കുരു । മാ । ഹിഗ്ംസീഃ । പുരുഷം ।	താം കുരു മാ ഹിഗ്ംസീഃ പുരുഷം	Now ‘him’(SA) follows ‘mA’ (PU) so it acquires Swaritam,since it becomes hi(gm) Swaritam is marked on (gm) ‘pu’ in Purusham is Prime udAttam , ‘sI’ marked in anudAttam in PP acquires anudAttam (AA) in vAkyam.
आ। പ്യായധ്വം് । ആ । പ്യാ യത്4വം । ആ । പ്യായധ്വം ।	आ പ്യായധ്വമഘ്നിയാ ആപ്യായത്4വമക്4നിയാ ആ പ്യായധ്വമഘ്നിയാ	‘A’ a single Padam Prime udAttam (PU) is followed by ‘pyA’ marked in Support AnudAttam (SA) in Pada Paatam acquires Swaritam (AS) as per Rule. Rest of the letters become ES
अयഷ്മാഃ । മാ । വഃ ।	अयഷ്മാ മാ വഃ अയക്ഷ്മാ മാ വഃ	‘mA’ the prime udAttam (PU)is preceded by kShmA which is prime udAttam (PU) so kShmA shall not

அ॒ய॒க்ஷ்மா: । மா । வ॒: । അ॒യ॒ക്ഷ്മാഃ । മാ । വ॒ഃ ।	।അ॒യ॒ക്ഷ്മാ മാ ।വ॒ഃ In ayaKShmA ‘a’ has acquired swaritam (AS) after vA udAttam of anamivA	undergo any change, the ‘ya’ marked as anudAttam (SA) in PP shall acquire anudAttam (AA). ‘va’ (SA) which follows ‘mA’ a Prime udAttam(PU) readily acquires Swaritam. (AS)
स॒वि॒தா । प्र । अ॒र्॒पयतु ஸ॒வி॒தா । ப்ர । அ॒ர்॒ப॒யது । സ॒വി॒താ । പ്ര । അ॒ർ॒പ॒യതു । ‘arpayatu’ is marked all in anudAttam in PP. Effectively they are Support AnudAttam/ES	।स॒वि॒தா प्रा॒र्॒पयतु ஸ॒வி॒தா ப்ரா॒ர்॒ப॒யது സ॒വി॒താ പ്രാ॒ർ॒പ॒യതു But ‘a’ is subject to Vowel Sandhi with pra resulting in prA which will be udAttam. See Swaram Rules in Sec 6	Pra is Prime udAttam (PU). It should have an anudAttam support. ‘tA’ in SavitA is Prime udAttam which cannot acquire Swarm so ‘vi’ acquires anudAttam (PA). The property is ‘prA’ is udAttam (PU) so ‘rpa’ which follows udAttam acquires Swaritam (AS).

in vAkyam with swarm acquisition rights in vAkyam.		
परा । ताः । भगवः பரா । தாः। ப$_4$க$_3$வ: പരാ । താഃ ।ഭഗവഃ	പരാ താ ഭഗവോ பரா தா ப$_4$க$_3$வோ പരാ താ ഭഗവോ	'rA' which is Swaritam (PS) acquires anudAttam (AA) to support 'tAH' (PU) and 'Ba' (SA) acquires Swaritam (AS) after 'tAH' (PU)
ईशत । मा । अघशꣳसः ஈஶத । மா । அக$_4$ஶꣳஸ: ഈശത । മാ । അഘശꣳസഃ ।	ईशत माऽघशꣳसो ஈஶதமாऽக$_4$ஶꣳஸோ ഈശത മാऽഘശꣳസോ	Here 'ta' of ISata (SA)acquires anudAttam before (PU) 'mA'. 'a' fo aGaSa(gm) elides, so it is followed by Ga which is udAttam, so Swaritam shifts to Sam which by design has Swaritam. (PS). (gm) of Sa(gm) shall be marked in Swaritam.

4.8.3 Special words and Padams with First udAttam

There are a few words that **have udAttam**, as first letter, in Pada Paatam and as well as in vAkyam followed by an anudAttam as second letter. Generally, in other words/Padams this word would have got represented as anudAttam in Pada Paatam with an ability to acquire Swaram.

We give examples of two such common words **bRuhaspatiH, vanaspatiH along with a few words identified while compiling SamhitA Kramam.**

Let us for our clarity define them as Special udAttam (SU) Padams.

As Per Padam	As in vAkyam	Comments and Notes
वनस्पतयः वनस्पत्यः वनस्पतयः	वनस्पतयः वनस्पत्यः वनस्पतयः	Note 'va' in vanaspati is not marked as anudAttam as per Pada Paata Rule. An exception for this word is found in pAnini's ashtAddhyAyI (PA) that 'va' is udAttam. (SU) 'na' is anudAttam followed by spa udAttam and 'ta' swaritam.
बृहस्पतिः ब்ருஹஸ்பதி:	बृहस्पतिः	Note 'bRu' in vanaspati is not marked as anudAttam as per Pada

ब்ரு॒ஹஸ்பதிः	*ப்3ரு॒ஹஸ்பதி:* ब्रु॒हस्पतिः	Paata Rule. An exception for this word is found in PA, that 'bRu' is udAttam. (SU)

Examples from Chamaka Ghanam

वनस्पतयः । च । मे । (anuvaakam 5 vAkyam No 16)

वनस्पतयश्च च वनस्पतयो वनस्पतयश्च मे मे च वनस्पतयो वनस्पतयश्च मे ।

வனஸ்பதய: / *ச* / *மே* / (anuvaakam 5 vAkyam No 16)

வனஸ்பதயஶ்ச ச வனஸ்பதயோ வனஸ்பதயஶ்ச மே மே ச வனஸ்பதயோ வனஸ்பதயஶ்ச மே

ബൃഹസ്പതിഃ । ച । മേ ।

ബൃഹസ്പതിശ്ച ച ബൃഹസ്പതിർ ബൃഹസ്പതിശ്ച മേ മേ ച ബൃഹസ്പതിർ ബൃഹസ്പതിശ്ച മേ ।

All the letters marked in yellow acquire anudAttam (AA) to support the udAttam **'va' and ha'.**

Please note that the 'na' and 'bRu' marked in blue, are Special udAttams to that Padam or vAkyam shall retain its Speical udAttam Swaram in other Paatams also.

Other Examples from Kramam & vAkyam

As Per Padam	As in vAkyam/Kramam
T.S.1.1.2.2 बाहुभ्याम् । उत् । यच्छे । बृहस्पतेः पा3ഹൗപ്4യാം । ഉത് । യച്ചേ2 । പ്3രുഹസ്പതേഃ । ബാഹുഭ്യാം । ഉത് । യച്ഛേ । ബൃഹസ്പതേഃ ।	बाहुभ्यामुद्यच्छे बृहस्पते പാ3ഹൗപ്4യാമുദ്3യച്ചേ2 പ്3രുഹസ്പതേ ബാഹുഭ്യാമുദ്യച്ഛേ ബൃഹസ്പതേ

T.S.1.6.5.2 ஓஷதயः । வனஸ்பதயः । ஓஷ்தய: । வனஸ்பத்ய: । ஔஷ்தயய: । வனஸ்பத்யய:	ஓஷதயோ வனஸ்பதயோ ஓஷ்த$_4$யோ வனஸ்பத்யோ ஔஷ்தயயோ வனஸ்பத்யயோ
T.S. 1.8.10.1 ஸோமாய । வனஸ்பதயே ஸோமாய்ய । வனஸ்பத்யே ஸோமாயய । வனஸ்பத்யயே	ஸோமாய வனஸ்பதயே ஸோமாய்ய வனஸ்பத்யே ஸோமாயய வனஸ்பத்யயே
T.S.1.2.10.2 க்3ருஹ்ணாமி । தனூனப்த்ரே ॥ க்3ருஹ்ணாமி । தனூநப்த்ரே ॥ க்3ருஹ்ணாமி । தனூனப்த்ரே ॥	க்3ருஹ்ணாமி தனூனப்த்ரே ॥ க்3ருஹ்ணாமி தனூனப்த்ரே ॥

T.S.1.8.7.1 चरुम् । इन्द्राय । शुनासीराय சரும் । இந்த்3ராய । ஶுனாஸீராய ചരും । ഇന്ദ്രായ । ശുനാസീരായ ।	चरुमिन्द्राय शुनासीराय சருமிந்த்3ராய ஶுனாஸீராய ചരുമിന്ദ്രായ ശുനാസീരായ
T.S.4.1.8.1 प्रीणानः । नराशꣳसः । ப்ரீணான: । நராஶꣳஸ: । പ്രീണാനഃ । നരാശꣳസഃ।	प्रीणानो नराशꣳसो ப்ரீணானோ நராஶꣳஸோ പ്രീണാനോ നരാശꣳസോ

In the above table, letters marked in yellow acquire anudAttam to support the first letter special udAttam (SU) marked in blue of these special words.

4.8.4 Prime udAttam joining

As Per Padam	As in vAkyam/Kramam
T.S.1.1.14.4 त्वम् । अग्ने । व्रतपा त्वं । अ॒क्₃ने॒ । व्र॒त॒पा त्व॑ं । अ॒ग्ने॒ । व्र॒त॒पा 'm' is a part of tvam and that joins with 'a' of agnE to form 'ma'	 त्व॑मग्ने व्रतपा त्व॑म॑क्₃ने व्र॒त॒पा त्व॑म॑ग्ने व्र॒त॒पा 'tva' part without halant retains the udAttam (PU), the 'a' is marked with anudAttam (SA) in PP and can acquire swaram becomes Swaritam after the udAttam. The 'ma' will acquire swaritam. (ie. m+a)
T.S.1.2.1.2 तत् । शकेयम् । आ । वः । तत् । श॒केय॑म् । आ । व॒: । तत् । श॒केय॑ं । आ । व॒ः ।	 तच्छकेयमा वो तच्₂छ॒केय॑मा वो॑ तच्छ॒केय॑मा वो॑

‘t’ of tat joins with ‘S’. Apply Consonant Sandhi rule, ‘t’ becomes ‘c’ and ‘S’ becomes ‘C’. Note ‘Sa’ is a SA.	‘ta’ retains udAttam (PU) in tat. ‘cCa’ acquires Swaritam (AS). ‘ya’ and ‘vO’ respectively acquire anudAttam (AA) and Swaritam (AS) before/after udAttam padam ‘mA’
T.S.1.2.14.5 तत् । मा । पितुः தத் । மா । பிதுः । തത് । മാ । പിതുഃ । ‘t’ joins nasal mA which has swaram marked in udAttam in PP. Hence it can acquire Swaram.	तन्मा॑ पितु தன்மா॑ பிது സ്തന്മാ॑ പിതു ‘t’ becomes nasal ‘n’ before ‘mA’. This ‘nmA’ follows udAttam ‘ta’ (PU) hence acquires Swaritam.(AS)
T.S.1.3.9.1 तत् । ते । आ । प्यायताम् । तत् । ते ।	तत्त आ प्यायतां॑ तत्त

தத் । தே । ஆ । ப்யாயதாம் । தத் । தே । தத் । தே । ஆ । ப்யாயதாம் । தத் । தே । 't' of tat joins 'tE' to become tattE, in vAkyam becomes tatta due to following vowel.	தத்த ஆ ப்யாயதாந் தத்த தத்த ஆ ப்யாயதாம் தத்த The first 'tatta' acquires anudAttam due to following 'A; which is udAttam (PU). 'pyA' (SA) acquires Swaritam (AS) as it follows 'A' and 'tAm' (SA) acquires anudAttam (AA) since it precedes 'ta' (PU)
T.S.1.1.4.2 ன । அராத்யை । ஸுவः ந । அராத்யை । ஸுவ: ന । അരാത്യൈ । സുവഃ । 'na' and 'a' combine to give 'nA'. udAttam+udAttam gives udAttam. See also Section 6 for Swaram	நாராத்யை ஸுவ நாராத்யை ஸுவ നാരാത്യൈ സുവ 'and since it is dheergam followed by conjunct consonant , converts to dheerga Swaritam. 'tyai' which is ekasruti acquires

Rules. this ‘nA’ being udAttam following ‘rA’ retains Swaritam (PS)	anudAttam (AA) to support udAttam (PU) ‘su’
T.S.1.3.5.1 अति । अन्यान् । अगाम् । न । अन्यान् । उप । अती । अन्यान । अकाꣳम् । न । अन्यान । उप അതി । അന്യാൻ । അഗാം । ന । അന്യാൻ । ഉപ ‘na’ is udAttam and combining with ‘a’ produces ‘nA’ udAttam. That is basic udAttam shall remain udAttam unless ‘v’,’y’ are formed explained in Swaram rules later. ‘nyA’ is udAttam. ‘n’ joins u to becomes ‘nu’. This is also udAttam.	अत्यन्यानगां नान्यानुपा अत्यन्यानकाꣳन् नान्यानुपा അത്യന്യാനഗാം നാന്യാനുപാ The Swartiam is acquired by pa of upa as it is a prime swaritam also. It has become pA due to following letter in vAkyam. The anudAttam support “agAm’ for this word shall come from previous Padam only. “agAm” which is PS in Padam becomes AA.

T.S.1.4.22.1

स्तरीः । असि । न । इन्द्र ।

ஸ்தரீ: । அஸி । ந । இந்த்3ர

സ്തരീഃ । അസി । ന ।

ഇന്ദ്ര ।

'na' combines with 'e' to give 'nE' this is udAttam. 'rl' is (PU) the 'r' and 'a' of asi give 'ra' since 'a' has SA, it acquires (AS). 'si' which is SA retains anudAttam (AA) to support 'na' which is PU.

स्तरीरसि नेन्द्र

ஸ்தரீ3ரஸி நேந்த்3ர

സ്തരീ3രസി നേന്ദ്ര

na udAttam with 'e' gives 'nE' udAttam.

'dra' of indra marked as SA in PP acquires Swaritam (AS).

T.S.1.5.2.3

एव । न । एति । यजमानः । वै ।

ஏவ । ந । ஏதி । யஜ்மான: ।

வை ।

ഏവ । ന । ഏതി ।

യജ്മാനഃ । വൈ ।

एव नैति यजमानो वै

ஏவனைதி யஜ்மானோ வை

ഏവ നൈതി യജ്മാനോ

വൈ

'na' with 'E' becomes 'nai' which is udAttam.	'ti' which should acquire Swaritam after 'nai' acquires anudAttam (AA) as it comes before udAttam 'ya' and 'ja' is Prime Swaritam. (PS)
T.S.1.5.9.7 तिष्ठेत । न । एनम् । திஷ்டே2த । ந । ஏனம் । തിഷ്ഠേത । ന । ഏനം । Similar to previous example	 तिष्ठेत नैनम् திஷ்டே2த நைனம் തിഷ്ഠേത നൈനം 'nam' acquires Swaritam after udAttam 'nai'

Note: Please observe the Swarams before and after an udAttam.

4.8.5 Prime udAttam or Swaritam can acquire anudAttam due to Pracaya Rule

This is more to the the grammatical way the prefix should be treated in a word/padam.

As Per normal Padam	As in vAkyam/Kramam
ओषधि–वनस्पतयो	Normally Sha of OShadi get Swaritam, on joining Padams the yO in vanaspatayaH get swaritam, supported by spa; all preceding

ஓஷதி4-வனஸ்பதயோ ஔஷதி–வனஸ்பதயோ	letters are marked in anudAttam including ‘O’ anudAttam; the padam Oshadhi as prefix is taken as pracayam. Sha is not udAttam as in previous examples.
आयुराशास्ते ஆயுரா-ஶாஸ்தே ஆயுராஶாஸ்தே	AyuH+ A+SAStE. SA of SAstE should acquire swaritam following a prime udAttam ‘A’. Now the ‘yU’ acquires anudAttam. As per Pada Paatam rule, the first ‘A’ is also marked in anudAttam. So in a combined Padam there is one prime udAttam ‘rA’ (‘r’ of visargam + A)

5 Representation of Prepositions/Prefixes

The table below gives the original Prepositions/Adjective prefixes and how they are represented in Pada Paatam with an ‘iti. These are Upasarga Padanis.

Preposition/prefix	Representation in Pada Paatam
आ ஆ ആ	आ + इति = एति ஆ + இதி = ஏதி ആ + ഇതി = ഏതി Note: In Kandam 5, Padam **eti#** is used as eti# and not as ‘A’ in a few instances. Appears as exception based on the vAkyam.
अति अदि അതി	अति + इति = अतीति அதி + இதி = அதீதி അതി+ ഇതി = അതീതി
अपि அபி അപി	अपि + इति = अपीति அபி + இதி = அபீதி അപി + ഇതി = അപീതി

अप अप् अप	अप + इति = अपेति अप् + इति = अपेति अप् + इति = अपेति
अधि अदि$_4$ अधी	अधि + इति = अधीति अदि$_4$ + इति = अदी$_4$ति अधी + इति = अधीति
अभि अबि$_4$ अभी	अभि + इति = अभीति अबि$_4$ + इति = अबी$_4$ति अभी + इति = अभीति

अनु அனு அனு	अनु + इति = अन्विति அனு + இதி = அன்விதி அனு + இதி = அன்விதி
अव அவ அவ	अव + इति = अवेति அவ + இதி = அவேதி அவ + இதி = அவேதி
प्र ப்ர ப்ர	प्र + इति = प्रेति ப்ர + இதி = ப்ரேதி ப்ர + இதி = ப்ரேதி
प्रति ப்ரதி ப்ரதி	प्रति + इति = प्रतीति ப்ரதி + இதி = ப்ரதீதி ப்ரதி +இதி = ப்ரதீதி

परि பரி பரி	परि + इति = परीति பரி + இதி = பரீதி பரி + ஈதி = பரீதி
निः நிः நிஃ	निः + इति = निरिति நி: + இதி = நிரிதி நிஃ + ஈதி = நிரீதி
नि நி நி	नि+ इति = नीति நி + இதி = நீதி நி + ஈதி = நீதி
वि வி வி	वि + इति = वीति வி + இதி = வீதி வி + ஈதி = வீதி

सम् ஸம் ஸம	सम् + इ॑ति = समि॑ति ஸம் + இ॑தி = ஸமி॑தி ஸம + இ॑தி = ஸமி॑தி
उत् உத் உத்	उत् + इ॑ति = उदि॑ति உத் + இ॑தி = உதி॑3தி உத் + இ॑தி = உதி॑3தி
उ॑प உ॑ப உ॑ப	उ॑प + इ॑ति = उपे॑ति உ॑ப + இ॑தி = உபே॑தி உ॑ப +இ॑தி = உபே॑தி

Note: if two such prepositions/prefix follow one another,
the first one is represented without iti as a convention.

Examples from Samhita Pada Paatam:

Standard convention of Padams	Representation in Pada Paatam
TS 1.1.4.2 सुवः । अभीति । वीति ஸுவ: । அபீ4தி । வீதி सुवः । अभीति । वीति ஸுவ: । அபி4 । வீதி सुवः । अभीति । वीति ச

6 Swaram Rules

In this Section we are first providing the Rules from Prati Sakhyam (PS) and related Classical text on the rules of Swaram acquisition during Sandhi.
The Readers are requested to focus on the examples and the technical names are provided for the interested readers. Our examples may not be exhaustive. The Swaram formations that have been understood are represented in a table in **Section 4.**

Please note that sometime the last letter in our example acquires anudAttam to support upcoming letter or first letter has acquired a swaritam. Kindly focus on the main theme of the examples.

6.1 Rules for Swaram acquisition during Sandhi (from PS)

- **Chapter 10 –Rule 10** - When an udAttam (acute) Swara enters the combination the result is udAttam (acute) Swara.
  This is subject to some **exceptions of udAttam-anudAttam** combination where **a Swaritam** gets formed.

Note: The udAttam referred here is Prime udAttam and not Ekasruti part which is represented without any swaram (accent) as not to be taken as udAttam.

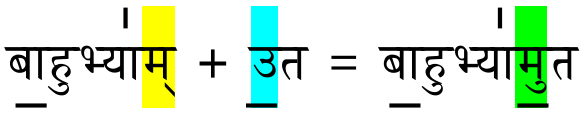

- When Swaritam (circumflex) and anudAttam (grave) combine result is Swaritam (circumflex) (Rule 12)
- Rule 15 '**e**' vowel and '**u'** vowel become **y** and **v** respectively
- Rule 16 and when they are udAttam (acute) the following anudAttam (**as per Pada Paatam)** (grave) becomes Swaritam (circumflex)
- Rule 17 also when **'U'** is the result of the combination

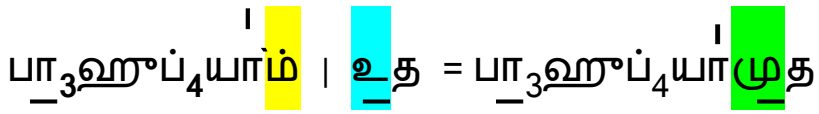

- **Chapter 20** – Rule 1 When *e*, ee,u, U are converted into ***y*** or ***v*****,** in Vowel Sandhi, the resultant Swaritam accent is ***kShaipra*****,** if it results out of a combination of **udAttam and anudAttam**.
- Chapter 20 -2 -But where a syllable containing a ***y*** or ***v*** *acquires* ***Swaritam*** (circumflexed) in a fixed word, being *preceded by* ***an anudAttam*** **(grave) syllable, or *not preceded by anything (First letter),*** that is to be known as ***nitya*****.**
- Chapter 20 -3 - If, moreover, there is an **udAttam** (acute) standing **in another word**, then, if there be a Swaritam (circumflex) resulting from a rule of combination, it is ***prAtihata*****.**
- Chapter 20 -4 - After such a one, in case of the loss of '***a'***, that is elision of **'a'** resulting in formation of **avagraha**, it is ***abhinihata*****.**
- Chapter 20 -5 -Where an ***'uu(U)'*** results out of joining two short, **u+u** it is ***praSliShtaa*****. (PS refers 'uu' only)**
- Chapter 20 -6 - Where there is a hiatus, **pause given for uttering two vowel sounds,** between two words or within a formed word, it is ***pAdavRutta*****.**
- Chapter 20 -7 -Where an udAttam (acute) precedes the resultant Swaritam, it is **tairovya~jjana**. This also refers to a simple padam in which a Swaritam follows an anudAttam.
- Chapter 20 -8 -These are the names of the Swaritam (circumflex) accents.
- Chapter 20 -9/10, in the **kShaipra, abhinihata and nitya**, the effort is **firmer**.
- Chapter 20 -11 - In the **praSliShtaa and prAtihata**, the effort is **gentler**.
- Chapter 20 -12 -In the **tairovya~jjana and pAdavRutta**, the effort is **feebler**.

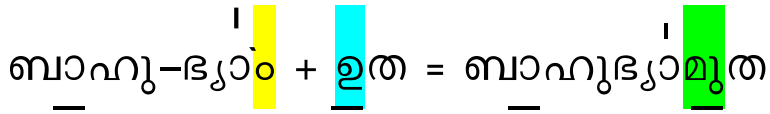

Important Note:

When a halant (like k,p,c,t,m) joins a Vowel to form a Swarayukta Aksharam (a Vowel based consonant), the swaram of the following Vowel is acquired by the newly formed Consonant. This should not be treated as a formal Vowel Sandhi.

Example:

Note: In the examples discussed below, please note that some of the swarams, which are formed due to Sandhi, may acquire different swaram to support following letter/akshara. The resultant word is given with original swaram as per rule but in vAkyam they may acquire swaram to support a previous anudAttam or a following udAttam. Kindly take note of the same when you compare with vAkyam/SamhitA.

The Padams given on the left side of the table are given without the 'iti' combination, but derived final Padam.

6.2 Sandhi Rules for Swara combinations of A/U/S

Letter coming up First	Letter coming up next/Following	Swaram of Resultant Letter	Comments/Notes if any
PU	**PU**	**PU**	
PU	**SA**	**PU**	
PU	**PA**	**PU**	
PU	**PA**	**AS**	As Per Rules in Chapter 20 mentioned above esp. when **'v','y'** , or letters form a **'U'**
PU	**PS**	**PU/PS Retained**	PS cannot come as the first letter except with derived words with Nitya Swaritam. Then Nitya Swaram is generally not affected.
SA	**PA**	**PA**	
SA	**SA**	**SA**	This will retain SA in Pada Paatam but unmarked **udAttam in vAkyam (Pracaya/Ekasruti)** when not influenced by Swarm rules.
SA	**PU**	**PU**	Though may be considered as Acquired UdAttam it is the combined letter retaining the PU of following letter.
SA	**PS**	**PS**	
ES	**SA**	**ES/SA**	ES is hidden SA. So, combination gives (SA in Pada Paatam) unmarked **udAttam in vAkyam (SA or**

			ES depending on the position) unless it acquires Swaram as support
ES	**PU**	**PU**	ES does not influence PU. PU remains PU.
ES	**PA**	**PA**	ES does not influence PA. Remains PA unless there is exception depending on words or formation of Swaras.
ES	**PS**	**PS/AS**	Normally first letter of following padam cannot be Swaritam. If it is a Nitya Swaram it will be retained
PS	PS	Commonly Not Applicable	A Prime Swaritam may be followed by a Derived Swaritam from Sandhi or Vice Versa. Then **Kampa Swaram** is formed subject to conditions. **Section 6.15**
PS	**SA**	**PS**	As Rule. Support anudAttam does not influence nature of preceding or following Swaram.
PS	**PA**	PS/AA	Unless Swaritam is formed through Rules given in 6.1. The **PA becomes AA mainly to support following Swaritam**
PS	**PU**	**AU**	Exception special Sandhi of letters then becomes AA

6.3 Sandhi Samples of udAttam occurence

This gives combinations of udAttam with udAttam and udAttam with Swaritam. The udAttam examples will also include Support anudAttam and Ekasruti (ES) which are from technical perspective treated as Support anudAttams with rights to acquire swaram. **They do not influence a Prime UdAttam**.

The results for all these examples will be udAttam.

Padams involved in Sandhi	Resultant word/Padam
TS 1.8.22.4 (PU+PU) अभि । इत् । अयज्वनः அபி$_4$ । இத் । அயஜ்வன: । അഭി । ഇത് । അയജ്വനഃ 'Bi' of aBi (PU) udAttam comines with 'i' of 'it' will give 'BI'	(इयक्षत्य)भीदयज्वनो (இயக்ஷத்ய)பீ$_4$த$_3$யஜ்வனோ (ഇയക്ഷത്യ)ഭീദയജ്വനോ
TS 1.8.5.2 (PU+PU) मनः । नु । आ । हुवामहे । மன: । நு । ஆ । ஹுவாமஹே മനഃ । നു । ആ । ഹുവാമഹേ ।	मनो न्वा हुवामहे மனோ ந்வா ஹுவாமஹே മനോ ന്വാ ഹുവാമഹേ Note: Swaritam results only in a combination of PU+PA (or SA)

Here Sandhi results in a letter 'nva' with 'v'. No Swaritam will result. PU+PU is udAttam only.	which results in 'v' 'y' letters due to Vowel Sandhi.
TS 4.5.1.1 (ES+PU) गिरिश्च + अच्छ । கி3ரிஶ்ச + அச்ச2 । ഗിരിശ്ച + അച്ഛ ES (udAttam in PP) + udAttam results in udAttam letter 'SA" Sa is an EkaSruti considered as Support anudAttam (SA). Represented as udAttam in PP. 'a' of acCa is PU.	गिरिश्चाच्छा கி3ரிஶ்சாச்சா2 ഗിരിശ്ചാച്ഛാ Sandhi letter not influenced by any other Swaram rule. cCa becomes cCA due to rule for elongation of letter based on a special PS grammar rule.
बिभर्षि + अस्तवे பி3ப4ர்ஷி + அஸ்தவே ബിഭർഷി + അസ്തവേ । same like the example as above 'rShi' is udAttam in PP but in effect a Support anudAttam. 'a' is PU.	बिभर्ष्यस्तवे பி3ப4ர்ஷ்யஸ்தவே ബിഭർഷ്യസ്തവേ 'Shya' is udAttam. This Sandhi letter not influenced by any other Swaram rule.

TS 4.5.2.1 (PS+PU) वारिवस्कृताय + ओषधीनाम् वारिवस्क्रुताय + ओषधीनाम् वारिवस्क्रुताय + ओषधीनाम् वारिवस्क्रुताय + ओषधीनाम् Here Swaritam ya (PS) + 'O' udAttam (PU) gives 'yau' udAttam (AU) and is not influenced by Swaram rule.	वारिवस्कृता–यौषधीनां वारिवस्क्रुता- यौषधीनाम् वारिवस्क्रुता–यौषधीनाम् 'Sha' in OshadhInAm is prime swaritam PS. kRu anudAttam, tA udAttam, yau udAttam (AU) due to sandhi and then Swaritam (PS) retained.
TS 4.5.2.1 (ES+PU) (PS+PU) अनाततायेति अनाततायेत्यनाततायेत्यनाततायेत्य

ya (ES/SA) udAttam)+'e' (udAttam) produces 'yE' (udAttam). The 'ti' of iti with Swaritam combines with 'a' (udattam) to form 'tya' as udAttam.	Here the 'naa' has Swaritam which is the prime swaram it gains Dheerga swaritam being at the end of part1. 'a' becoming 'tya' retains udAttam. 'ti' PS combines with 'a' PU to give AU. 'tA' acquires anudAttam (since it is ES) to anudAttam 'yE'and Swaritam 'nA' follows.
TS 1.2.11.1 (PU+PA) रायः । प्र । इ॒षे । भगा॑य । ராய: । ப்ர । இ॒ஷே । ப4கா3ய ൠയഃ । പ്ര । ഇ॒ഷേ । ഭഗാ॑യ Pra is udAttam. 'e' of ishE is PA. 'a' plus 'e' sound gives prE which is udAttam only. PU+PA does not produce Swaritam as **'e' or 'u' is not** involved with (PU+PA/SA) in Sandhi resulting in 'v' or 'y'	रायः प्रेषे भगा॑य ராய: ப்ரேஷே ப4கா3ய ൠയ: പ്രേഷേ ഭഗാ॑യ 'gA' of BagAya is Swaritamv (PS). Since previous two Padams have produced pRE and ShE both udAttams. The 'ya' swaritam (PU) of rAya acquires anudAttam (AA) before prE and 'ga' Swaritam is formed after udAttam Ba.

TS 1.6.4.1 (PS+PU) (ES+PA) अनु । उत् । जेषम् । सोमस्य । अहम அனு । உத் । ஜேஷம் । ஸோமஸ்ய । அஹம் । അനു । ഉത് । ജേഷം । സോമസ്യ । അഹം । 'nu' (PS) combines with 'u' of 'ut' PU to give 'nU' derived udAttam only. Due to this 't'+'jE' (SA) becomes 'jjE' and acquires Swaritam (AS) after udAttam 'nU'. ShAm becomes Sha(gm) before sO it has SA and becomes AA to support 'sO' of sOmasya and 'ma' becomes swaritam.	मनूज्जेषꣳ सोमस्याह மனூஜ்ஜேஷꣳ ஸோமஸ்யாஹ മനൂജ്ജേഷꣳ സോമസ്യാഹ In this same example, sya marked in udAttam is ES with Support anudAttam this when combining with PA 'a' of aham retains its PA as 'syA' after Sandhi
TS 1.7.6.7 (PU+PA) सभा । इष्ट्वा । प्राङ् । उत्क्रम्य ।	सभेष्ट्वा प्राङुत्क्रम्य

ஸபா$_4$ । இஷ்ட்வா । ப்ராங் । உத்க்ரம்ய । ஸஃபா । இஷ்ட்வா । ப்ராங் । உத்க்ரமய । BA is PU. Combines with 'e' (PA) gives BE (UdAttam) as per vowel sandhi.	ஸபே$_4$ஷ்ட்வா ப்ராங்குத்க்ரம்ய ஸஃபேஷ்ட்வா ப்ராங்குத்க்ரமய 'ng' combines with 'u' to give 'gnu' (has no swaram influence) to support udAttam kra and swaritam 'mya'.
TS 1.8.1.1 (PU+PA) முञ्च । इमम् । अꣳहसः । முஞ்ச । இமம் । அꣳஹஸ: । முஞ்ச । இமம் । அꣳஹஸஃ । 'nja' (PU) combines with PA 'e' of imam to give njE ,udAttam	முञ्चेममꣳहसः முஞ்சேமமꣳ ஹஸ: முஞ்சேமமꣳஹஸஃ **njE, ma, ma(gm)** are all udAttams. The support for swaritam 'ha' (PS) comes after udAttam ma(gm) and PA 'mu' of munja supports nche which is udAttam
TS 2.1.3.1 (PU+PA) इव । हि । इमे । लोकाः । இவ । ஹி । இமே । லோகா: ।	इव हीमे लोकाः । இவ ஹீமே லோகா:

ഇവ । ഹി । ഇമേ । ലോകാഃ । 'hi' is PU, combines with 'e' of imE to give 'hl' (udAttam).	ഇവ ഹീമേ ലോകാഃ 'va' of iva has support anudAttam(SA) it acquires (AA) to support udAttam 'hl'
TS 1.5.7.6 (PU+SA) एव । इन्द्रिये । प्रति । ഏവ । ഇന്ദ്രിയേ । പ്രതി। ഏവ । ഇന്ദ്രിയേ । പ്രതി । 'va' PU combines with SA 'e' will result in udAttam 'vE'	एवेन्द्रिये प्रति ഏവേന്ദ്രിയേ പ്രതി ഏവേന്ദ്രിയേ പ്രതി

6.4 Sandhi Samples of anudAttam occurrence

In Pada Paatam, the last akshara/letter may be a Support anudAttam through marking and there will be no Prime anudAttam as last letter. Ekasruti letter can be the last akshara of a Padam. This is in effect Support anudAttam but left unmarked. They donot influence the nature of following Swarams.

Though the rule says, "that when udAttam enters the combination, the net result will be an udAttam". Practically, we observe if the first aksharam of the following Padam has anudAttam, normally it is the primary swarm of that Padam and most the sandhi results form an anudAttam only. Readers need to distinguish the

unmarked udAttam occurring after a Swaritam which is a part of Ekasruti, as Swarams which are influenced by other Swarams that combine.

Padams involved in Sandhi	Resultant word/Padam
TS 1.1.1.1 (SA+PA) इषे त्वा + ऊर्जे त्वा இஷே த்வா॑ + ஊர்ஜே த்வா॑ ஈஷே த்வா + ஊர்ஜே த்வா॑ 'tvA' is a Support anudAttam in Pada paatam. 'vA' in tvA combines with 'U' in Urje to produce 'O' as per Vowel Sandhi; but this will result in anudAttam 'tvO' since the Support anudAttam (SA) does note have influence like original Prime udAttam.	इषे त्वोर्जे त्वा॑ இஷே த்வோர்ஜே த்வா॑ ஈஷே த்வோர்ஜே த்வா॑ The 'U' in Urje is the prime anudAtta Swaram and its combination 'vO' shall retain anudAttam only as it precedes anudAttam 'rjE'. The 'tvA' (SA) acquires Swaritam (tvA) to support this prime udAttam 'rjE'.
TS 4.5.1.1 (ES+PA) गिरिशन्त + अभि – चाकशीहि கி$_3$ரிஶந்த + அபி$_4$ - சா॑கஶீஹி	गिरिशन्ताभि चाकशीहि கி$_3$ரிஶந்தாபி$_4$ சா॑கஶீஹி

ഗിരിശന്ത+അഭി – ചാകശീഹി 'inta' is a part of Ekasruti (ES) which is nothing but unmarked anudAttam not original udAttam. This combination will produce anudAttam only influenced by 'a' of aBi which is prime anudAttam.	ഗിരിശന്താഭി ചാകശീഹി inthA after Vowel Sandhi is anudAttam. Bi is udAttam; no change as per Rule. cA acquires Swaritam.
TS 4.5.1.3 (SA+PA) सहस्र + अक्षाय സഹസ്ര -- അക്ഷായ സഹസ്ര + അക്ഷായ 'sra' support anudAttam combines with prime anudAttam 'a' to give anudAttam 'srA'	सहस्राक्षाय സഹസ്രാക്ഷായ സഹസ്രാക്ഷായ 'srA' anudAttam, kShA udAttam and 'ya' Swaritam.

6.5 ***When Swaritam (circumflex) and anudAttam (grave) combine result is Swaritam***

The anudAttam referred here is anudAttam as per Pada Paatam.

It may be a Prime or Support anudAttam to the Padam.

If the first letter of the following Padam is prime anudAttam, the combination though as per rule results in Swaritam, but becomes an anudAttam to support following udAttam.

If the first letter is a support anudAttam, it still results in Swaritam.

But due to Swara rule it may acquire anudAttam in the middle of a mantra to Support following Swaritam.

Padams involved in Sandhi	Resultant word/Padam in vAkyam
TS 1.4.5.3 (PS+SA) सहस्रशो –अव + एषाम् ஸ்ஹஸ்ரஶோ- அவ் + ஏஷாம் സ്ഹസ്രശോ അവ് +ഏഷാം 'va' Swaritam (PS) plus 'ae' Support anudAttam (SA) gives 'vai' in Swaritam. Support anudAttam **though treated as** unmarked **udAttam in vAkyam**, gets treatment of anudAttam in Padam. 'sa' has acquired swaritam from previous letter ending udAttam.	सहस्रशो ऽवैषाꣳ ஸ்ஹஸ்ரஶோ ऽவைஷாꣳ സ്ഹസ്രശോ ऽവൈഷാꣳ Elision of 'a' (ऽ) does not have influence of flow of Swarams. ShO udAttam, 'a' udAttam which is elided results in UdAttam.
TS 4.5.2.1 (PS+SA) रुद्राय + आतताविने ருத்3ராய + ஆததாவினே	रुद्राया–तताविने ருத்3ராயா-ததாவினே

രുദ്രായ + ആതതാവിനേ ya (Swaritam PS) with 'A' as Support anudAttam results in Swaritam – 'yA'	രുദ്രായാ–തതാവിനേ Similar to the example above.
TS 1.1.12.1 (PS+PA) समारभ्य + उर्ध्वः + अध्वरः സമാരപ്4യ + ഉർത്4വഃ + അത്4വര: സമാരഭ്യ + ഉർധ്വഃ + അധ്വരഃ Bhya+u becomes bhyO but gets anudAttam since 'rdhvO' is a udAttam. Note this combination does not produce a new 'y','v' letter. Refer to Swaram Rules in 6.1 to result in special Swaritams mentioned there.	समारभ्योर्ध्वो अध्वरो സമാരപ്4യോർ-ത്4വോ അത്4വരോ സമാരഭ്യോർധ്വോ അധ്വരോ Flow – bhyO anudAttam, rdhvO udAttam and 'a' swaritam
TS 1.2.6.1 (PS+PA) ऊर्ध्वा + यस्य + अमतिः + भाः ഊർത്4വാ+യസ്യ+അമതി: + പാ4: ഊർത്4വായസ്യാമതിർപാ4	

ഊർധ്വാ+യസ്യ+അമതിഃ +ഭാഃ Here sya+a becomes 'syA' acquires anudAttam as 'ma' udAttam follows and the combination does not produce special Swartiam mentioned in 6.1	മൂർധ്വാ യസ്യാമതിർഭാ Flow – 'syA' anudAttam, 'ma' udAttam and 'ti' swaritam
TS 1.2.7.1 (PS+PA) चन्द्रेण + अमृतम् + अमृतेन சந்த்3ரேண + அம்ருதம் + அம்ருதேன ചന്ദ്രേണ + അമൃതം + അമൃതേന Similar to above example	चन्द्रेणा–मृतममृतेन சந்த்3ரேணா-ம்ருதமம்ருதேன ചന്ദ്രേണാ–മൃതമമൃതേന
TS 1.2.14.3 (PS+PA) द्युम्नानि + अर्यः + वि + दुरः + अभि + द्यौत् द्युम्नान्यर्यो विदुरो अभि द्यौत्	

த்3யும்னானி + அர்ய: + வி + து3ர: + அபி4 + த்3யெளத் த்3யும்னாந்யர்யோ வித்3ரோ அபி4 த்3யெளத் த்3யும்னாந்யர்யோ வித்3ரோ அபி4 த்3யெளத் த்3யும்னாநி + அர்யஃ + வி + து3ரஃ + அபி4 + த்3யெளத் த்3யும்னாந்யர்யோ வித்3ரோ அபி4 த்3யெளத் த்3யும்னாந்யர்யோ வித்3ரோ அபி4 த்3யெளத் த்3யும்னாநி + அர்யஃ + வி + து3ரஃ + அபி4 + த்3யெளத் ‘ni’ Swaritam and ‘a’ anudAttam has produced ‘nya’ anudAttam, precedes ‘ryO’ udAttam therefore acquires anudAttam to support ‘rO’ . ‘nya’ is a letter that forms a conjuct letter with ‘y’ but not formed through a combination of PU+PA	த்3யும்னாந்யர்யோ வித்3ரோ அபி4 த்3யெளத் த்3யும்னாந்யர்யோ வித்3ரோ அபி4 த்3யெளத் த்3யும்னாந்யர்யோ வித்3ரோ அபி4 த்3யெளத் த்3யும்னாந்யர்யோ வித்3ரோ அபி4 த்3யெளத் த்3யும்னாந்யர்யோ வித்3ரோ அபி4 த்3யெளத் த்3யும்னாந்யர்யோ வித்3ரோ அபி4 த்3யெளத் ‘**vi**’ and ‘**du**’ of duraH are udAttams and donot acquire Swaram. **PS+PA generally results in AA if followed by udAttam**.
TS 1.2.14.6 (PS+PA) दह + अशासः + रक्षसः + पाहि + अस्मान् द3ह + अஶாஸ: + ரக்ஷஸ: + பாஹி + அஸ்மான் दहाशासो रक्षसः पाह्यस्मान् द3ஹாஶாஸோ ரக்ஷஸ: பாஹ்யஸ்மான்	

ദഹ + അശസഃ + രക്ഷസഃ + പാഹി + അസ്മാൻ The Sandhi produces ‘ha’ (PS)+ ‘a’ (PU)=’hA’ is anudAttam formed before udAttam ‘Sa’	ദഹാശസോ രക്ഷസഃ പാഹ്യസ്മാൻ hi (PU) with ‘a’ (PA) produces swaritam with formation of ‘y’ letter. This hya is formed in a fixed word immediately after ‘pA’ (anudAttam) so it is Nitya Swaritam. Refer to Rule in 6.1
TS 1.3.1.1 (PS+PA) यवय + अस्मत् + द्वेषः യവയ + അസ്മത് + ത്3വേഷ്: യവയ + അസ്മത് + ദ്വേഷഃ very similar example to the above.	യവയാസ്മദ്ദ്വേഷോ യവയാസ്മത്3-ത്3വേഷ്ടാ യവയാസ്മദ് ദ്വേഷ്ടാ
TS 1.4.1.2 (PS+PA) अन्तरिक्षे+तेन+अस्मै + यजमाना	अन्तरिक्षे तेनास्मै यजमाना

அந்தரிக்ஷே + தேன + அஸ்மை யஜமானா அந்தரிக்ஷே + தேன் + அஸ்மை + யஜமானா 'na' Swaritam with 'a' Prime udAttam produces,'nA' (AA). No special conditions met.	அந்தரிக்ஷே தேனாஸ்மை யஜமானா வந்தரிக்ஷே தேனாஸ்மை யஜமானா So, 'kShE' acquiring anudAttam (AA) to support udAttam 'tE'

Note: We find that when a Prime Anudattam (PA) enters a combination, the net effect is Acquired AnudAttam (AA) before a following udAttam (PU) as per Sandhi as per Current Study. It acquires swaritam when followed by anudAttam/ES.

Note: The Sandhi rules are appled first but when a vAkyam is formed with Padams, finally rules for marking/adjusting the Swaras have the final authority or power as per current analysis.

Readers' inputs will be highly appreciated for any exceptions observed.

6.6 Examples of Swaritam formation for a combination of PU+AnudAttam

Note: Main Condition is that a Prime anudAttam must have Sandhi with Prime or Support anudAttam **and** this Sandhi must involve letters **'e' or 'u'** in the Prime anudAttam end and must produce letters with 'y' or 'v'.

Ekasruti reflected as anudAttam at the end of previous Padam is not Prime udAttam.

This Section **also** gives examples **where Swaritam is not formed** as the combination **does not involve letters with 'v', 'y'** due to vowel Sandhi of letters **'e' and 'u'**.

Padams involved in Sandhi	Resultant word/Padam
TS 1.1.3.1 (PU+SA) पृथिवि । असि । ப்ருதி$_2$வி । அஸி । പൃഥിവി । അസി । 'vi' PU combines with 'a' SA as per Rule should give Swaritam – 'vya'	पृथिव्यसि ப்ருதி$_2$வ்யஸி പൃഥിവ്യസി New letter is formed with 'y' on Sandhi. This will be KShairpra as per definition.
TS 4.7.14.1 (PU+SA) वर्चः । विहवेषु । अस्तु । வர்சः । விஹவேஷு । அஸ்து വർചഃ । വിഹവേഷു । അസ്തു । 'Shu' PS combines with 'a' SA. SA does not have special effect and on Sandhi acquires Swaritam only.	वर्चो विहवेष्वस्तु வர்சோ விஹவேஷ்வஸ்து വർചോ വിഹവേഷ്വസ്തു This is different from the Rule of PU+ anudAttam. But note Shva is formed through Sandhi will be KShaipra. PS remains AS after Sandhi.

TS 4.2.3.2 (PU+SA) अप्सु । अग्ने । अप्$_2$सू । अक्$_3$ने । അപ്സു । അഗ്നേ । Combination of PU Psu with PA 'a' of agnE	अप्स्वग्ने अप्$_2$स्वक्$_3$ने അപ്സ്വഗ്നേ Note 'sva', with sound 'v' is formed
TS 2.1.2.6 (PU+PA) ब्रह्मवर्चसी । एव । भवति । ब्$_3$रह्मवर्चसी । एव । प$_4$वति ബ്രഹ്മവർചസീ । ഏവ । ഭവതി	ब्रह्मवर्चस्येव भवति ब्$_3$रह्मवर्चस्येव प$_4$वति ബ്രഹ്മവർചസ്യേവ ഭവതി 'Ba' of Bavati acquires Swaritam after anudAttam va. Swaritams formed as per rule given in 6 'syE' remain as it is.
TS 2.1.3.2 (PU+PA) ग्रामी । एव । भवति	ग्राम्येव भवति

க்3ராமீ । ஏவ । ப4வதி । க்3ராமீ । ஏவ । ப4வதி ।	க்3ராம்யே'வ ப'4வதி க்3ராமே'வ ப'4வதி Similar to previous example
TS 2.1.10.3 (PS+SA) ப்ரதீசீ" । அஸ்மை । ப்ரதீசீ" । அஸ்மை । ப்ரதீசீ" । அஸ்மை ।	Here PS+SA =AS ப்ரதீச்ய'ஸ்மை ப்ரதீச்ய'ஸ்மை ப்ரதீச்ய'ஸ்மை
TS 5.1.7.3 (PU+PA) வாருணீ । உகா । அபீ4த்3தா' வாருணீ । உகா2 । அபீ4த்3தா'4 வாருணீ । உகா । அபீ4த்3தா' ।	PU+PA = AS வாருண்ய'காऽபீ4த்3தா' வாருண்ய'கா2 ऽபீ4த்3தா'4 வாருண்ய'காऽபீ4த்3தா'

6.8 Nitya

Where a syllable containing a '***y'*** or '***v'*** *acquires Swaritam* (circumflex) in a fixed word, being ***preceded by an anudAttam*** (grave) syllable, or ***not preceded by anything,*** that is to be known as ***nitya.*** 'nitya' swaram is supposed to be rendered firmly and holds its position with a following Swaritam or udAttam.

Padams involved in Sandhi	Resultant word/Padam
TS 1.4.10.1 Nitya सु + आग्रयणः ஸு + ஆக்3ரயணः സു + ആഗ്രയണഃ udAttam 'su' combines with 'A' anudAttam of following padam creating svA (v created in the process from 'u') thus svA gets formed as first letter swaritam – Nitya.	स्वाग्रयणो ஸ்வாக்3ரயணோ സ്വാഗ്രയണോ
TS 2.6.8.3 Nitya सु + इष्टम् ஸு + இஷ்டம் സു + ഇഷ്ടം Similar to example above	स्विष्टं ஸ்விஷ்டம் സ്വിഷ്ടം **su+e =svi**
TS 4.4.4.4 Nitya सु + आहुतः	स्वाहुतः

സൗ + ആഹൗത: സു + ആഹുതഃ Similar to example above	സ്വാഹൗത: സ്വാഹുതഃ **su+A = svA**
T.S.1.8.6.2 Nitya त्रि + अंबकं ത്രി + അംബകം **tri +a =trya (y formed)**	ത്ര്യംബകം ത്ര്യംബകം
TS 1.1.13.1 (PU+SA) Nitya वि । अस्यताम् । വി । അസ്യതാം । vi (PU)+ a (SA) = vya (Nitya)	व्यस्यतां । വ്യസ്യതാം । വ്യസ്യതാം ।
TS 1.2.8.2 Nitya विष्णु + अग्निम्	विष्वग्निं

വി॒ക്ഷൗ + അ॒ക്₃നിം വി॒ക്ഷു + അ॒ഗ്നിം Here the Swaritam if formed at the beginning of a word preceeded by anudAttam in 'vi'	വി॒ക്ഷ்வ॑க்₃னிந்் வி॒க்ஷ்வ॑க்₃னிந்் KShu (udAttam) + a (anudAttam) = KShva – nitya formed after one preceding anudAtta letter.

Note: The Swarams after the nitya swaritam becomes ekasruti.

6.9 prAtihatA

There is an udAttam (acute) standing in end of one padam, and there is an anudAttam standing as the first letter of following padam, this anudAttam acquires a Swaritam (circumflex) resulting from a rule of combination, it is ***prAtihata.*** This swaritam is rendered firmly during recital.

Padams involved in Sandhi	Resultant word/Padam
TS 2.3.14.3 क॒विम् । क॒वीनाम् । (उपमश्र॑–वस्तमं) ॥ க॒விம் । க॒வீனாம் । (உ॒பமஶ்ர॑வஸ்தமம்) ॥	க॒விं க॒வீனா–मु॒पमश्र॑–वस्तमं । க॒விங்க॒வீனா- மு॒பமஶ்ர॑வஸ்தமம் ।

കവിം । കവീനാം । ഉപമശ്രവസ്തമം ॥ There is a udAttam vim standing at the end of padam kavim, the 'ka' of next padam 'kavinAm'' acquires swaritam	കവിം കവീനാ- മുപമശ്രവസ്തമം ।
TS 1.1.1.1 ഇഷേ ത്വാ + ഊർജേ ത്വാ ഇഷേ ത്വാ + ഊർജേ ത്വാ ഇഷേ ത്വാ + ഉർജേ ത്വാ **This is an example of prAtihata tvA+U = tvO anudattams. rjE retains it udAttam.**	ഇഷേ ത്വോർജേ ത്വാ ഇഷേ ത്വോർജേ ത്വാ ഇഷേ ത്വോർജേ ത്വാ There is a udAttam rjE standing at the end of padam UrjE, the SA of next padam 'tvA' acquires swaritam
ശിവാ । ശാരവ്യാ ॥ ശിവാ । ശാരവ്യാ ॥ ശിവാ । ശാരവ്യാ ।	ശിവാ ശാരവ്യാ ശിവാ ശാരവ്യാ ശിവാ ശാരവ്യാ

ശിവാ । ശരവ്യാ । 'vA' of SivA stands at the end of first padam, Sa of SaravyA is support anudAttam	ശിവാ ശരവ്യാ It acquires Swaritam and this is prAtihata.
आ (एति)ˋ । प्यायध्वम् ആ (ഏതി) । പ്യായത്$_4$വം ആ (ഏതി) । പ്യായധ്വം	आ प्यायध्वम् ആ പ്യായത്$_4$വം ആ പ്യായധ്വമ
शिवतमेति शिव – तमा ശിവതമേതി ശിവ -- തമാ ശിവതമേതി ശിവ – തമാ In a Padam split, the first part has a last letter udAttam 'va' of Siva and the second part has anudAttam as first letter, 'ta' of tamA the Swaritam acquired by the first letter 'ta' shall be also known as PrAtihata swaritam in SivatamA.	शिवतमा ശിവതമാ ശിവതമാ

6.10 aBhinihatA

After formation of Swaritam, in case of the loss of '***a'***, that is elision of **'a'** resulting **in formation of avagraha,** it is ***abhinihata.*** There is a udAttam at the end of first padam, following padam has anudAttam 'a', its combination results in avagraha formation. AbinihitA is rendered firmly and it will hold its position with an immediately following Swaritam or udAttam.

Padams involved in Sandhi	Resultant word/Padam
मा अग्ने भागिनꣳ മാ അക്$_3$നേ ഭാ$_4$കി$_3$നꣳ മാ അഗ്നേ ഭാഗിനꣳ	മാऽग्ने भागिनꣳ മാഽക്$_3$നേ ഭാ$_4$കി$_3$നꣳ മാഽഗ്നേ ഭാഗിനꣳ
यः अपां पुष्पं वेद യഃ അപാം പുഷ്പം വേദ$_3$ യഃ അപാം പുഷ്പം വേദ	योऽपां पुष्पं वेद । യോഽപാം പുഷ്പം വേദ$_3$ യോഽപാം പുഷ്പം വേദ (yO gets Swaritam as it had udAttam, but does not become Dheega Swaritam since letter following'ऽ' is a normal consonant 'pAm' not conjunct consonant.
TS 1.5.1.2 सः । अग्निः । अब्रवीत् സഃ । അഗ്നിഃ । അബ്രവീത് । SaH becomes sO through Vowel Sandhi 'a' of agni elides to avagraha. Thus 'sO' is an aBinihatA swaritam. This is an AS. This retains its position.	सोऽग्निरब्रवीद् സോഽക്$_3$നിരബ്$_3$രവീത്$_3$ സോഽഗ്നിരബ്രവീദ് The 'a' of agni is a PA. following 'gni' is PU. The visargam for sound 'ni' is 'r'

This 'sO' shall not acquire anudAtttam and become AA in this example.	this 'r' combines with 'a' (SA) to become 'ra' and this acquires Swaritam since it follows 'gni' udAttam.
TS 1.5.2.1 यः । अग्निम् । उद्वासयते ய: । அக்3னிம் । உத்3வாஸய்தே യഃ । അഗ്നിം । ഉദ്വാസയതേ । **Example very similar to above**	यो ऽग्निमुद्वासयते யோ ஃக்3னிமுத்3வாஸய்தே യോ ഽഗ്നിമുദ്വാസയതേ
TS 2.6.2.1 ES+SA सोमेन । उत्तरार्धे । अग्नये । ஸோமேன । உத்தரார்தே4 । அக்3னயே । സോമേന । ഉത്തരാർധേ । അഗ്നയേ । 'rdhE' (PU) gets Swaritam on elision of 'a' to avagraha. Since this swaritam is special, 'gnE' retains its PS.	सोमेनोत्तरार्धे ऽग्नये ஸோமேனோத்தரார்தே4 ஃக்3னயே സോമേനോത്തരാർധേ ऽഗ്നയേ
TS 1.5.10.1	

नमः । अग्नये । अप्रतिविद्धाय நம: । அக்3னயே । அப்ரதிவித்3தா4ய । നമഃ । അഗ്നയേ । അപ്രതിവിദ്ധായ । Normally a formation like this would have produced namO$gnayE. In the next part, a which follows 'yE' elides, that is followed by 'pra' a PS. So the Swaritam of 'yE' shifts to 'pra' and 'yE' becomes udAttam (AU).	नमोऽग्नये ऽप्रतिविद्धाय நமோ ऽக்3னயே ऽப்ரதிவித்3தா4ய നമോऽഗ്നയേ ऽപ്രതിവിദ്ധായ The anudAttam support for 'pra' shall come from 'mO' only as it has Swaram. So in this flow, mO of maH acquires anudAttam. (AA) An aBinihatA swaritam is not formed in in this vAkyam since it is PS+PU

Note: aBhinihatA Swaritam retain its position before following udAttam/Swaritam.

6.11 PraSliShtA

Where an ***'uu'(U)*** results out of joining two **u+u/U**, it is ***praSliShtA*.**

The combination shall be first 'u' is udAttam and the following 'u' is anudAttam from two Padams.

PraSliShtA holds its position with a following UdAttam or Swaritam and does not acquire anudAttam.

Padams involved in Sandhi	Resultant word/Padam
TS 5.5.5.4 दिक्षु + उपदधाति தி3க்ஷு+ உப3த3தா4தி	दिक्षूपदधाति தி3க்ஷூப3த3தா4தி

6.13 Tairovya~jjana.

Where an udAttam (acute) precedes the resultant Swaritam, it is **tairovya~jjana**. Here we are taking the definition as per PS 20.7.

This Swaritam is formed through Sandhi or without Sandhi in the normal flow of a Padam, where the udAttam and Swaritam are a part of the same Padam. This swaram is milder or feebler in recital compared to others and it does not stand its ground like PraSliShtA, NityA, AbhinihitA and KShaipra before an upcoming udAttam or Swaritam.

Words/Padams	Explanation
नमः । ते । நமः । தே । നമഃ । തേ ।	नमस्ते. நமஸ்தே നമസ്തേ

ന॑മഃ । തേ । 'na' udAttam and maH swaritam	ന॑മസ്തേ Part of same padam and formed naturally 'ma' as Tairovya~jjana swaritam
മന്യ॑വേ മ॑ന്യവേ । മന്യ॑വേ ।	മന്യ॑വേ മ॑ന്യവേ മന്യ॑വേ । vE is a part of same padam and follows nya udAttam.
গিরিশ॑ । অচ্ছ । কী3রী॑ഗ । অ॑ച്ച2 । ഗിരി॑ശ । അ॑ച്ഛ । 'Sa' of giriSa and 'a' of acCa combine to give SA.	গিরিশা॑চ্ছ কী3রী॑ഗാച്ചാ2 ഗിരിശാ॑ച്ഛാ The ccA is part following 'a' sound which has become 'SA' due to sandhi no change in position of swaritam with respect to Padam.
উভয়ো॑ঃ । আর্ন্নি॑য়োঃ । —	মু॑ভയো—রার্ন্নি॑য়োর্ജ্যാ — — —

உப$_4$யோ$^{\shortparallel}$: । ஆர்த்நி$^{\shortmid}$யோ: । உ$_{_}$ப$_4$யோ$^{\shortparallel}$ஃ । ஆர்ன்நி$^{\shortmid}$யோஃ । 'A' of ArtniyO becomes 'RA' with merger of visargam 'r'	முப$_4$யோ-ரார்த்நி$^{\shortmid}$யோர் மு$_{_}$ப$_4$யோ$_{_}$–ரார்ன்நி$^{\shortmid}$யோர் **'itni'** retains its position without change and it is Tairovya~jjana

Note: When these Swaritams like KShaipra, AbhinihitA Nitya and PraSliShta are derived, they **can occur** immediately after an anudAttam without a need for udAttam as per normal flow of swarams.

It is also observed that words formed out of v,y, acquire Swaritam and they donot acquire anudAttam before th next word starting with an udAttam. (as seen in indicative examples above)

6.14 Special Swaritams

We have discussed Special Padams with **Swaritam following an anudAttam** in Section 4.6. These examples are given below. The Swaritam retains its position. These Swaritams are formed with the **conjuct consonants of v.y and l.**

These are referred to Nitya Swaritam in the explanation of Swaras in VarNa Krama Patam. In VarNa Kramam, occurrence of these **at the end/middle of Padam** is taken/described as **KShaipra**. Consult your Guru for usage of proper terms of per their paddhati.

vAkyam	Comments
T.S.1.6.9.1 താവാനുക്ഥ്യോ യാവത്യമാവാസ്യാ தாவா॑னுக்த்2யோ யாவ॑த்யமாவா॑ஸ்யா താവാ॑നുക്ഥ്യോ യാവ॑ത്യമാവാ॑സ്യാ	'kthyO' retains swaritam before 'yA' as similar to examples in nitya swaram 6.6.2 but these words are not formed due to sandhi but out of a full padam, ukthyaH.
T.S.1.7.2.2 മനുഷ്യാന് യാം പിതൃഭ്യോ மனுஷ்யான் யாம் பித்ரு4ப்4யோ மനுஷ്യാൻ യാം പിതൃഭ്യോ	yAn has swaritam occurs before udAttam yAm
T.S.3.4.8.2 ഹോതവ്യാ ഓജോ വൈ ஹோதவ்யா ஓஜோ வை ഹോതവ്യാ യാവന്തോऽസ്യ	'vyA' is Swaritam occurs before udAttam O of OjO, vyA retains Swartiam but jO of OjO which swaritam acquires anudAttam before udAttam vai in normal course.

ஹோதவ்யா ஓஜோ வை ஹோதவ்யா யாவந்தோஸ்ய ഹോതവ്യാ ഓജോ വൈ ഹോതവ്യാ യാവന്തോऽസ്യ	
T.S.4.5.1.1 शिवा शरव्या या ஶிவா ஶரவ்யா யா ശിവാ ശരവ്യാ യാ	'vyA' retains swaritam before udAttam 'yA'
T.S.6.1.1.1 मनुष्या उदीचीः रुद्रा மனுஷ்யா உதீ3சீ: ருத்3ரா മനുഷ്യാ ഉദീചീഃ രുദ്രാ	'ShyA' retains swaritam before udAttam 'u'

TS 1.2.13.2 बहुभिः । वसव्यैः । आ । प्र । यच्छ । ब॒हूभि॑4 । व॒सु॒व्यै॑: । आ* । प्र । य॒च्छ॒2 । ब॒हुभिः॑ । व॒सु॒वैय्यः॑ । आ* । प्र । य॒च्छ॒ । (ES + PU no change)	बहुभिर्वसव्यैरा प्र यच्छ ब॒हूभि॑4र् वसु॒व्यै॑रा प्र य॒च्छ॒2 ब॒हुभि॑र्वसु॒वैय्यरा प्र य॒च्छ॒

6.14.1 Kshaipra, Nitya, PraSliShta and AbhinihitA retain their position

These four swaritams formed are special such that they retain their position as Swaritam and **never give up the place** to become acquired anudAttam when a **Swaritam or udAttam follows them.**

Pratihata, Padavrutta and Tairovya~jjana shall acquire anudAttam when follwed immediately by Swaritam/UdAttam.

Padams involved in Sandhi	Resultant word/Padam
TS 1.1.2.2 உரு + அந்தரிக்ஷம் உ_ரு + அந்தரிக்ஷம் । உரு + அன்தரிக்ஷம் Here the Swaritam if formed at the beginning of a word preceeded by anudAttam in 'u'	உர்வந்தரிக்ஷம உர்வ்ந்தரிக்ஷம உர்வ்ன்தரிக்ஷம In all the other examples above, the first letter forms a Swaritam when 'v', y' sounds are formed with 'e' or 'u'. Note 'rva' retains KShaipra Swaritam (being a nitya) and does not become anudAttam to support 'ntha', which retains its Tairovya~jjana Swaritam.
T.S. 1.6.7.2 हि । एतयोः ஹி । ஏதயோ: । ஹி । ஏதயோஃ । 'hi' joins with 'ae' producing 'hyE' it retains it position as Nitya being on first letter. After following udAttam ta, 'yO' also retains its Swaritam.	ह्येतयो ஹ்யேதயோ ஹ்யேதயோ ஹ்யேதயோ

T.S.4.6.1.5	
नि । अ॒त्रि॑णम् நி । அ॒த்ரி॑ணம் । നി । അ॒ത്രി॑ണം । Example similar to previous one.	न्य॑त्रि॑णं ந்ய॑த்ரி॑ணம் ന്യ॑ത്രി॑ണം । 'nya' acquires its Nitya Swaritam through Sandhi but Nam also retains its position.
मा अ॒ग्ने भागिनꣳ॒ மா அ॒க்3னே பா4கி3னꣳ॒ മാ അ॒ഗ്നേ ഭാഗിനꣳ॒	मा॑ऽग्ने भागिनꣳ॒ மா॑ऽக்3னே பா4கி3னꣳ॒ മാ॑ऽഗ്നേ ഭാഗിനꣳ॒ The aBhinihitA swaritam 'mA' precedes following udAttam.

TS 7.5.2.2 दशा॑सु । मा॑सु । उ॒त्ति॒ष्ठ॒न् । द॒3ग्धा॑सो । मा॒सो । उ॒त्ति॒ष्ठ॒2न्ति॑ । द॒ग्धा॑सु । मा॒सु । उ॒त्ति॒ष्ठ॒न्ति॑ ।	दशा॑सु मा॑सूत्ति॑ष्ठन् द॒3ग्धा॑सो मा॒सॊ॑त्ति॑ष्ठ॒2न् द॒ग्धा॑सु मा॒सू॑त्ति॑ष्ठन् 'U' PraSliShta swaritam is followed by 'tti' which is udAttam.

6.14.2 Tairovya~jjana, Pratihata and Padavrutta give up their Swaritam position

We are directly get into examples below:

Padams involved in Sandhi	Resultant word/Padam
TS 4.5.2.1 नमः । हिर॑ण्यबाहवे । से॒नान्ये॑ । नम॑: । हिर॑ण्यबा॒3हवे । से॒नाந்யே॑ ।	नमो हिर॑ण्यबाहवे से॒नान्ये नमो॒ हिर॑ण्यबा॒3हवे से॒नान्यै

നമഃ । ഹിരണ്യബാഹവേ । സേനാന്യേ । 'maH' has Tairovya~jjana swaritam which follows 'na' udAttam. namaH can be seen giving up its swaritam on ma at many places for following udAttam specially in Rudram.	നമോ ഹിരണ്യബാഹവേ സേനാന്യേ maH becomes 'mO' but acquires anudAttam (AA) before upcoming udAttam 'hi' of hiraNyabAhavE
TS 4.5.1.3 അഥോ । യേ । അസ്യ । അഥോ2 । യേ । അസ്യ । അഥോ । യേ । അസ്യ । 'athO' has Dheerga Swaritam and is followed by udAttam padam 'yE'	അഥോ യേ അസ്യ അഥോ2 യേ അസ്യ അഥോ യേ അസ്യ 'thO' has acquired anudAttam (AA) before udAttam 'yE'
TS 5.4.10.2 (PV) തു । വൈ । അസ്യ । അതഃ । തു । വൈ । അസ്യ । അതഃ । തു । വൈ । അസ്യ । അതഃ । 'tu' +'vai' udAttam results in tvai (becomes tvA) being followed by a,	ത്വാ അസ്യാത ത്വാ അസ്യാത ത്വാ അസ്യാത So, 'a' gives its swaritam (padavrutta in normal course) and acquires anudAttam (AA) to support syA.

the anudAttam of next padam which should get swaritam as a Padavrutta. But sya+a of ataH combines to form a udAttam syA	
TS 2.6.4.4 (PV) धाः । असि । स्वधा । असि । इति । தா$_4$: । அஸி । ஸ்வதா$_4$ । அஸி । இதி । ധാഃ । അസി । സ്വധാ । അസി । ഇതി । Observe that the dhA and asi form a hiatus (vivrutti) vowel pause. The first anudAttam 'a' acquires swaritam. There is a similar hiatus between dhA and asi; so 'a' should have acquired Swaritam (Padavrutta) in normal course.	धा ऽसि स्वधा ऽसीति தா$_4$ ऽஸி ஸ்வதா$_4$ ऽஸீதி ധാ ऽസി സ്വധാ ऽസീതി Following the second 'a', an udAttam gets formed with the combination of 'si' of second asi and 'i' of iti as 'sI'. So 'a' gives up its intended swaritam and acquires anudAttam (AA)
TS 3.4.1.4 (PH) माꣳसम् । इव । अस्थि । इव । மாꣳஸம் । இவ । அஸ்தி$_2$ । இவ । മാꣳസം । ഇവ । അസ്തി$_2$ । ഇവ ।	माꣳसमिवास्थीव மாꣳஸமிவாஸ்தீ$_2$வ മാꣳസമിവാസ്തീ$_2$വ

മാഽ്സം । ഇവ । അസ്ഥി । ഇവ । 'i' of iva should acquire swaritam after sam (udAttam) as 'mi' as a pratihatA in miva. But 'va' of iva and 'a' of asthi combine to form udAttam 'vASthi'	മാഽ്സ-മിവാസ്ഥീവ So mi acquires anudAttam (AA) to support following udAttam vA. So PratihatA gives up its swaram position for an upcoming udAttam(or Swaritam)
TS 2.6.9.3 (PH) सः । माम् । पाहि । इति । आह । ஸ: । மாம் । பாஹி । இதி் । ஆஹ । സഃ । മാം । പാഹി । ഇതി് । ആഹ । 'pA' of pAhi should acquire pratihatA swaritam after udAttam mAm of previous padam. But hi of pAhi combines with 'i' of iti to form 'hI' (udAttam)	स मां पाहीत्याह ஸ மாம் பாஹீத்யா்ஹ സ മാം പാഹീത്യാ്ഹ Now, 'pA' acquires anudAttam (AA) before 'hI' the following udAttam. 'tyA' swaritam follows formed as KShaipra.

6.15 Kampa Swaram (Two Swaritams together)

There are instances that two Swaritams are formed next to each other with the rules we have studied about Swaritams. As per Rule, the first one does not give up its Swaritam because of its right to retain the Swaritam.

Table of Examples

Padams involved in Sandhi	Resultant vAkyam
TS 2.1.6.5 भवति । बहुदेवत्यः । हि । एषः പ4വതി । പ3ഹൂതേ3വത്യഃ । ഹി । ഏഷഃ । ഭവതി । ബഹുദേവത്യഃ । ഹി । ഏഷഃ । vatyaH is special swaritam as discussed above. It retains its Swaritam. 'hi' udAttam with 'e' creates a Swaritam 'hyE' Nitya Swaritam. 'yaH becomes yO and its followed by a conjunct consonant hyE and thereore yO acquires dheerga Swaritam. Note that both kshaipra and Nitya swaritams that don't give way for following swaritam or udAttam.	भवति बहुदेवत्यो(1) ह्येष പ4വതി പ3ഹൂതേ3വത്യോ(1) ഹ്യേഷ ഭവതി ബഹുദേവത്യോ (1) ഹ്യേഷ The 'tyO' is rendered in dheerga Swaritam towards the last part it is brought to udAttam in a slide and then the extension of 'O' in yO is rendered in anudAttam (for one matra) as marked in (1) and then 'hyE' would be rendered in Swaritam. Kindly learn the

	technique from your Guru for proper sliding.
T.S. 2.2.11.5 आसन्न् । ते । अन्यः । अन्यस्मै ॥ ஆஸன்ன் । தே । அன்யः । அன்யஸ்மை ॥ ആസന്ന് । തേ । അന്യഃ । അന്യസ്മൈ ॥ Example is very similar to the one above. 'a' elides, 'tE' acquires dheerga Swaritam as it precedes ''nyO". Two AbhinihitAs occurring continuously	आसन् ते॥(1) ऽन्योऽन्यस्मै ஆஸன் தே॥(1) ऽன்யோ॥ ऽன்யஸ்மை ആസൻ തേ॥ (1) ऽന്യോ॥ ऽന്യസ്മൈ Here second Swaritam 'nyO' also acquires dheerga Swaritam. After the slide to anudAttam, it will be rendered in dheerga Swaritam.

T.S.5.4.3.3 सः । अर्कः । अभवत् । സഃ । അർകഃ । അഭവത് । Example similar to first one. Here both the swaritams formed are abhinihitA which remains firm in its position.	सो॑(1)ऽर्को॑ऽभवत् സോ॑(1) ऽർകോ॑ऽപ4വത് സോ॑(1)ऽർകോ॑ऽഭവത്
T.S.6.1.1.7 सः । अपः । अभि । अम्रियत । സഃ । അപഃ । അപീ4തി । അമ്രിയത । സഃ । അപഃ । അഭീതി । അമ്രിയത In this part of vAkyam, three Swaritam gets formed. 'sO' and 'pO' in dheerga Swaritam and 'Bya' in Swaritam.	सो॑ऽ(1)पो॑ऽ(1)भ्यम्रियत സോ॑ऽ(1)പോ॑-ऽ(1)പ്4യമ്രിയത സോ॑ऽ(1)പോ॑ऽ(1)ഭ്യമ്രിയത The sliding to anudAttam shall occur twice after 'sO' and 'pO'.
T.S. 6.1.11.5 विश्वानि । हि । एषः । अभि ।	विश्वानि ह्यो॑(1) षो॑ऽभि

விஶ்வா॑னி । ஹி । ஏஷ: । அ॒பீ4॑தி । விஶ்வா॑நி । ஹி । ஏஷ॑: । அ॒பீ4॑தி । Similar to Other formations given for observation/understanding of readers.	விஶ்வா॑னி ஹ்யே॑(1) ஷோ॑ऽபி4 விஶ்வா॑நி ஹ்ய॑(1) ஷோ॑ऽபி **Here the first swaritam is a kshaipra or can be considered as nitya followed by an abhinihita both hold their positions.**
TS 1.1.2.2(33) Jatai 6 padams of Jatai 1.1.2.2(33)– उரु । अन्तरिक्षम् । अन्तरिक्षम । उ॒रु । उ॒रु । अन्तरिक्षम् । **1.1.2.2(33)**- உ॒ரு । அந்தரிக்ஷம் । அந்தரிக்ஷம் । உ॒ரு । உ॒ரு । அந்தரிக்ஷம் । 1.1.2.2(33)– உரு । அன்தரிக்ஷம் । அன்தரிக்ஷம் । உ॒ரு । உ॒ரு । அன்தரிக்ஷம் । When ru which is udAttam in first uru combines with anudAttam u of second uru, 'U' is formed.	உர்வ॑ன்தரிக்ஷ மன்தரிக்ஷ மு॒रू॑(1)र्வ॑ன்தரிக்ஷம் உர்வ॑ன்தரிக்ஷ மன்தரிக்ஷ மு॒ரூ॑(1)ர்வ॑ன்தரிக்ஷம் । PraSliShta 'U' stands its position with 'rva' which is following KShaipra.

7 Examples with the 'iti' impact in Pada Paatam

7.1 Examples of joining 'iti' and its impact on vAkyam - Pada Paatam derivation

In this Section we provide examples of how the Pada Paata words get derived based on the joining of 'iti'. This 'iti' is a vikruti addition that is used to explain how the Padams combine into a final derived word in vAkyam as a classical teaching method.

In the earlier Section 3 we have given some rules to explain some basics. This is more a detailed set of examples. The steps which a reader shall remember are:

1. The word in vAkyam is taken and if any Swara that has been derived or acquired shall be removed.
2. Add the two parts with **iti** as given in the left side of the table.
3. Apply Vowel, Visarga and Consonant Sandhi Rules
4. Apply the Swaram rules. Please mark Support anudAttam appearing before Prime anudAttam.
5. Then balance the Swarams for their support derivation and acquisition.
6. Please note that some advanced grammar rules may be involved which have not been deliberated.
7. **Note: The left-side Padams are as per vAkyam. Please note that some of the unmarked letters are either Support AnudAttams (SA) or Ekasruti. (ES)**

Vakkaym plus “iti” as it is	Derived words in Pada Paatam
हिरण्यबाहवे इति हिरण्य बाहवे ஹிரண்யபா3ஹவே இதி ഹിരണ്യബാഹവേ ഇതി ಹಿರಣ್ಯಬಾಹವೇ ‘vE’ becomes ‘va’ before vowel ‘e’ in Pada Paatam. The ‘va’ acquires anudAttam to support udAttam ‘e’ following ‘ti’ is Swaritam. The Swaram derivation for ‘va’ is vikruti with respect to vAkyam.	हिरण्यबाहव इति हिरण्य – बाहवे ஹிரண்யபா3ஹவ இதி ഹിരണ്യ -- പാ3ഹവേ ಹಿರಣ್ಯ – ಬಾಹವೇ ‘ti’ with Swaritam acquires anudAttam to support ‘hi’ the prime udAttam of hiraNya. bAhaVE has no swaram in vAkyam so acquires complete anudAttam (SA) in Pada Paatam. ‘iti’ has tairovya~jjana swaritam, it gives way before ;hi’ udAttam. This can be observed with namO in various places.
हरिकेशाय इति हरिकेशाय	हरिकेशायेति हरि – केशाय

ஹரிகேஶாய இதி ஹரிகேஶாய ഹരികേശായ ഇതി ഹരികേശായ here ‘ya’ combines with ‘e’ of iti to form ‘yE’ which is a derived udAttam. SA of keSAya acquires anudAttam to support ‘yE’,	ஹரிகேஶாயேதி ஹரி -- கேஶாய ഹരികേശായേതി ഹരി – കേശായ ‘ti’ which has Swaritam has acquired anudAttam to support udAttam ‘ha and swaritam is derived for ‘ri’ of hari. kESAya has acquired anudAttam (SA) in Pada Paatam since there is no swarm in vAkyam.
उपवीतिने इति उपवीतिने உபவீதினே இதி உபவீதினே ഉപവീതിനേ ഇതി ഉപവീതിനേ ‘nE’ becomes ‘na’ before vowel ‘e’. ‘ti’ combines with ‘u’ to create a Swaritam ‘tyu’ (see Swarm rules ti is	उपवीतिन इत्युप – वीतिने உபவீதின இத்யுப -- வீதினே ഉപവീതിന ഇത്യുപ–വീതിനേ ‘nE’ at the end of the Padam being a Dheerga letter with Swaritam acquires Dheerga Swaritam in Pada Paatam.

PS and ‘u’ is SA) so ‘na’ acquires anudAttam.	
आततावि॑ने॑ इति॑ आततावि॑ने॑ आददा॒वि॑ने॑ इति॑ आददा॒वि॑ने॑ आततावि॑ने॑ इति॑ आततावि॑ने॑ ‘nE’ in vAkyam is anudAttam to support kSheE udAttam and trA in kShEtrAnam. So restored to Swaritam. ‘nE’ becomes ‘na’ in Padam before ‘i’. ‘ti’ (PS) combines with ‘A’ (SA) to gives ‘tyA’ which is dheergam and gets Dheerga Swaritam since it is end of a Padam.	आततावि॒न॒ इ॒त्या॑ – ततावि॒ने॑ आददा॒वि॒न॒ इ॒त्या॑ -- ददा॒वि॒ने॑ आततावि॒न॒ इ॒त्या॑ – ततावि॒ने॑ ‘nE’ gets Dheerga Swaritam in second part since it is dheerga letter with Swaritam in the end of the Padam. Comes after udAttam ‘vi’. ‘ta’ in tatAvinE get anudAttam since unmarked at the beginning in vAkyam.
विशल्यः इति॑ विशल्यः	विशल्य इति॑ वि – शल्यः

விஶ்ல்ய: இதி விஶ்ல்ய: விஶல்ய: இதி விஶல்ய: lyO is anudAttam in vAkyam to support banAvA(gm). The base word is lyaH (ES). In Pada Paatam, visargam gets dropped before vowel ‘i’. lyaH acquires anudAttam to support ‘i’ in iti which is Swaritam.	விஶ்ல்ய இதி வி-- ஶ்ல்ய: விஶல்ய இதி வி – ஶல்ய: iti which is Swaritam in itself acquires anudAttam to support ‘vi’ which is udAttam. But in Pada Paatam Sa is marked in anudAttam since the first letter Sa is Swaritam as per vAkyam. Following ilyaH also acquires anudAttam (SA).
विज्यं॑ इति विज्यं॑ விஜ்யம்॑ இதி விஜ்யம்॑ விஜ்யம்॑ இதி விஜ்யம்॑ This is an interesting example. First the word in vAkyam in needs to be restored to the right padam by removing rules that have been applied. ‘jyam’ has anudAttam to support dhanuH. So, when it is restored to Swaritam, it acquires Dheerga Swaritam, because it is at	विज्यमिति वि – ज्यम् விஜ்யமிதி வி -- ஜ்யம் விஜ்யமிதி வி – ஜ்யம் While converting to Pada Paatam, ‘jya’ acquires anudAttam to support ‘mi’ in ‘miti’, the original Swaritam. But ‘ti’ acquires anudAttam to support udAttam ‘vi’. But this jya is marked as anudAttam as per convention since it is single akshara hrasva letter.

the end of the Padam and it is an Anuswaram. If readers get a doubt why it cannot be an anudAttam. the answer is as per Padam or vAkyam, the last letter alone cannot acquire an independent anudAttam. But applying Swara Rule, the last letters of vAkyam acquire anudAttam to support a following udAttam/ Swaritam.	'vi' in vijyam is udAttam, so the following letter 'jyam' will acquire Swaritam in vAkyam.(acquires anudAttam ahead of udAttam dha)
सेनान्ये इति सेनान्ये सेनान्यो इति सेनान्यो सेनान्यै इति सेनान्यै The first 'nyE' becomes 'nya' before vowel 'i'. Swaram for 'ti' does not get influenced by the need to support another letter. This is a special Padam where Swaritam gets formed after anudAttam with conjunct consonant and has letter 'y'	सेनान्य इति सेना – न्ये सेनान्य इति सेना -- न्यो सेनान्यै इति सेना–न्यै sE gets anudAttam in Pada Paatam since the following 'nA' is Prime anudAttam. In the second part therefore, it is not marked with Swaram. But 'nyE' is marked with Dheerga Swaritam distinctly, since it is a dheerga letter. If not marked may be taken as udAttam. 'sEnAnyE' is a special padam where the Swaritam comes after anudAttam.

उच्चैर्घोषाय इति उच्चैर्घोषाय உச்சைர்கோ4ஷாய இதி உச்சைர் கோ4ஷாய உச்சைர்கோ4ஷாய இதி உச்சைர்கோ4ஷாய GoShAyA in vAkyam has become dheergam in Sandhi with following 'A'. Hence it becomes GoShAya. This 'ya' with 'i' of iti gives 'yE'. GOShAya assumes all anudAttam in Pada Paatam.	उच्चैर्घोषायेत्युच्चैः – घोषाय உச்சைர்கோ4ஷாயேத்யுச்சை: -- கோ4ஷாய உச்சைர்கோ4ஷாயேத்யுச்சைः – கோ4ஷாய 'ti'Swaritam (PS) combines with u anudAttam (PA) gives AA 'ityu'as per rule and supports udAttam cChai. ShA which has no swaram assumes anudAttam to support Prime Swaritam 'ti' of 'iti'.
धन्वाविभ्यः इति धन्वाविभ्यः த4ன்வாவிப்4ய: இதி த4ன்வாவிப்4யः	धन्वाविभ्य इति धन्वावि–भ्यः த4ன்வாவிப்4ய இதி த4ன்வாவி -- ப்4ய:

ധന്യാവിഭ്യഃ ഇതി ധന്യാവിഭ്യഃ BhyaH loses visargam before vowel ‘i’.It assumes anudAttam to support udAttam ‘i’ and followed by Swaritam ‘ti’. BhyaH retains Swaritam since it is at the end. It is marked in anudAttam as a single letter short akshara in Padam.	ധന്യാവിഭ്യ ഇതി ധന്യാവി – ഭ്യഃ This will become Swaritam when converted to vAkyam to after udAttam ‘vi’.
ഗണപതിഭ്യഃ ഇതി ഗണപതിഭ്യഃ ക3ണപതിപ്4യഃ ഇതി ക3ണപതിപ്4യഃ ഗണപതിഭ്യഃ ഇതി ഗണപതിഭ്യഃ This example very similar to the one above.	ഗണപതിഭ്യ ഇതി ഗണപതി – ഭ്യഃ ക3ണപതിപ്4യ ഇതി ക3ണപതി -- പ്4യഃ ഗണപതിഭ്യ ഇതി ഗണപതി – ഭ്യഃ BhyaH (ES) has no swaram in vAkyam. It is marked in anudAttam as per Rule. But when it is combined to derive vAkyam. BhayH will not assume any Swaram as it follows a Swaritam of ‘pa’ after ‘ti’ and tiBhyaH is Ekasruti.

श्वभ्यः इति श्वभ्यः ஶ்வப்$_4$ய: இதி ஶ்வப்$_4$ய: ශ්වභ්‍යඃ ඉති ශ්වභ්‍යඃ In vAkyam, BhyaH gets anudAttam to support following udAttam 'Sva' and followed by Swaritam 'pa' in SvapatibhyaH. This BhyaH gets anudAttam in Pada Paatam to support 'i'' in iti.	श्वभ्य इति श्व – भ्यः ஶ்வப்$_4$ய இதி ஶ்வ -- ப்$_4$ய: ශ්වභ්‍ය ඉති ශ්ව – භ්‍යඃ BhyaH is marked as anudAttam as a single hrava akshara. It will assume Swaritam in vAkyam after joining with Sva which is udAttam, BhyaH will get Swaritam.
मीढुष्टमाय इति मीढुष्टमाय மீடு$_4$ஷ்டமாய இதி மீடு$_4$ஷ்டமாய මීඩුෂ්ටමාය ඉති මීඩුෂ්ටමාය 'ya' with 'i' of iti makes yE (AU). mA acquires anudAttam to support yE'. The Vowel 's' gets 'Sh' sound after	मीढुष्टमायेति मीढुः – तमाय மீடு$_4$ஷ்டமாயேதி மீடு$_4$:-- தமாய මීඩුෂ්ටමායේති මීඩුඃ – තමාය As mIdhUH (Sh becomes Visargam) 'Ta' normalizes to 'ta'. On separation 'ta' acquires Swaritam which is first

vowel sound ‘u’.’ta’ cannot follow ‘Sh’ the ‘ta’ changes to ‘Ta’. This is broken up in the Pada Paatam.	aksharam. Marked as anudAttam in Pada Paatam. On joining the ‘ShTa’ that if formed will take Swaritam since ml is anudAttam and Dhu is udAttam.
गोष्ठ्याय इति गोष्ठ्याय கோ3ஷ்ட2யாய இதி கோ3ஷ்ட2யாய ഗോഷ്ഠ്യായ ഇതി ഗോഷ്ഠ്യായ Similar to example above. Kindly refer to Rules for ‘n’ becoming ‘N’ and ‘s’ becoming ‘Sh’ in consonant Sandhi Rules and Vowel Sandhi Rules in respective articles.	गोष्ठ्यायेति गो – स्थ्याय கோ3ஷ்ட2யாயேதி கோ3 -- ஸ்த்2யாய ഗോഷ്ഠ്യായേതി ഗോ–സ്ഥ്യായ After Vowel sound ‘O’, ‘s’ becomes ‘Sh’ with change of ‘stha’ to ShTha’. This is restored in Pada Paatam.
निषङ्गिणे इति निषङ्गिणे நிஷங்கி3ணே இதி நிஷங்கி3ணே	निषङ्गिण इति नि – सङ्गिने நிஷங்கி3ண இதி நி -- ஸங்கி3னே

നിഷങ്ഗിണേ ഇതി നിഷങ്ഗിണേ NE becomes Na before vowel ‘i’ and also acquires anudAttam to support ‘i’ of iti.	നിഷങ്ഗിണ ഇതി നി – സങ്ഗിനേ In vAkyam, ‘sa’ of sangine follows vowel sound ‘i’ of ni, so becomes ‘Sh’. This is restored in Pada Paatam
ആലാദ്യായ ഇതി ആലാദ്യായ ആലാത്$_3$യായ ഇതി ആലാത്$_3$യായ ആലാദ്യായ ഇതി ആലാദ്യായ ‘ya’ with ‘e’ becomes yE. ‘ti’ with ‘A’ gives tyA (KShaipra). This gets KShaipra Swaritam as per Swara Rule in the previous Section (PS+SA). It is Dheerga letter therefore Dheerga Swaritam at the end of the Padam. ‘tyA’ will not be marked udAttam to support following dyA.	ആലാദ്യായേത്യാ – ലാദ്യായ ആലാത്$_3$യായേത്യാ -- ലാത്$_3$യായ ആലാദ്യായേത്യാ – ലാദ്യായ lAdyAya is a spcial Padam with dheerga letter with anudAttam followed by a Swaritam with conjunct Consonant of ‘y’ like in yatudhAnya, vIrya. Refer to Section 4.6.

द्विपदे इति द्विपदे द்3விபதே3 இதி த்3விபதே3 ദ്വിപദേ ഇതി ദ്വിപദേ the ‘dE’ in dvipadE gets anudAttam to support ‘tu’ in catuShpadE in vAkyam. So, when restored, it becomes a Swaritam and acquires Dheerga Swaritam since it is at the end of the Padam	द्विपद इति द्वि – पदे த்3விபத3 இதி த்3வி -- பதே3 ദ്വിപദ ഇതി ദ്വി – പദേ First part, dE becomes da before vowel ‘i’. In the second part it is independent and retains its Dheerga Swaritam.
चतुष्पदे इति चतुष्पदे சதுஷ்பதே3 இதி சதுஷ்பதே3 ചതുഷ്പദേ ഇതി ചതുഷ്പദേ dE had acquired anudAttam to support ‘Shva’ in following viShvam. It is restored. Becomes ‘da’ before vowel ‘i’	चतुष्पद इति चतुः – पदे சதுஷ்பத3 இதி சது: -- பதே3 ചതുഷ്പദ ഇതി ചതുഃ – പദേ ‘ti’ acquires anudAttam to support udAttam ca and swaritam ‘tu’. padE has no Swaram in vAkyam as Ekasruti and marked in all anudAttam in Pada Paatam.
प्रणीतौ इति प्रणीतौ	प्रणीताविति प्र – नीतौ

ப்ரண்ீதெள இதி ப்ரண்ீதெள ப்ரணீீதൗ இதி ப்ரணீீதൗ After ‘ra’ –‘nI’ becomes NI. Refer Article on Consonant Sandhi. ‘Thou’ becomes ‘thA’+v as per Vowel Sandhi. ‘v’+’i’ gives vi	ப்ரண்ீதாவிதி ப்ர -- நீதெள ப்ரணீீதாவிதி ப்ர – நீீதൗ thA acquires anudAttam to support ‘vi’, following ti acquires anudAttam to support ‘pra’ udAttam. ‘nI’ will become ‘NI’ on joining pra.’nI’ with Swaritam marked as anudAttam in Pada Paatam since first letter.
பூரூஷக்4னே இதி பூரூஷக்4னே பூருஷ2க்4னே இதி பூருஷ2க்4னே பூருஷஷ்ணு இதி பூருஷஷே ‘pU’ which acquired Swaritam to support previous ‘uta’ restored.’GnE’ becomes ‘Gna’ before vowel ‘e’.	பூரூஷக்4ன இதி பூருஷ--க்4னே பூருஷஷ்ணு இதி பூருஷ–ஷ்ணு ‘puruSha’ is marked all in anudAttam in part 1 as ‘Sha’ is the prime swaram. ‘GnE’ is marked as uDAttam as it does not acquire Swara. It is left unmarked as it follows anudAttam and on joining it will be udAttam only. Please Note.
सहस्रयोजने इति सहस्रयोजने	सहस्रयोजन इति सहस्र – योजने

സഹസ്രയോജനേ ഇതി സഹസ്രയോജനേ സഹസ്രയോജനേ ഇതി സഹസ്രയോജനേ 'nE' becomes 'na' before vowel 'i'.	സഹസ്രയോജന ഇതി സഹസ്ര -- യോജനേ സഹസ്രയോജന ഇതി സഹസ്ര–യോജനേ 'sahasrayoja' marked as anudAttam in Pata Paatam in part 1 as it has no Swaram till yo. Second Part 'Sahasra' not marked as per convention. But in yojanE only yoja is marked anudAttam. nE with Prime udAttam is unmarked since it follows anudAttam ja.
उतो इति उतो ഉതോ ഇതി ഉതോ ഉതോ ഇതി ഉതോ 'utO' is a pragraha/pragrihya and will not combine with vowel 'e'. But first part 'u' will combine with 'ti' to give 'tyu'. acquires 'anudAttam' to	उतो इति, ഉതോ ഇതി , ഉതോ ഇതി (in Pada Padam) Explanation of kramam formation उतो इत्युतो ഉതോ ഇത്യുതോ

represent the presence of ‘u’ which is prime anudAtta Swaram. (PS+PA = AA) due to thO which is udAttam.	ഉതോ ഇത്യുതോ while derivation. ‘ti’ Swaritam + u anudAttam produces Swaritam as a Swaram Rule. Marking it anudAttam indicates that ‘u’ is a prime anudAttam and shall derive support anudAttam.
अथो॑ इति अथो॑ अथो॒ इति , अथो॒ इति , अथो॒ इति अथो॒ इति (Pada Paatam) ‘thO’ Swaritam acquires anudAttam to support ‘i’ and swaritam ‘ti” Explanation of Krama Padam: athO iti is the Padam word. This thO gets anudAttam to support ‘i’ when normalised, it is athO with Swaritam which gets dheerga Swaritam at the end of the Padam. When second part is added, ti of iti with ‘a’ gives tya (PS+PU = PU) udAttam.	Explanation of Kram Paatam अथो॑ इत्यथो॑ अथो॒ इत्यथो॑ अथो॒ इत्यथो॑
TS 1.2.10.2 तनूनप्त्रे॑ इति तनूनप्त्रे॑	तनूनप्त्र इति तनू॑ – नप्त्रे॑ ।

தனூனப்த்ரே॥ இதி தனூனப்த்ரே॥ தனூநப்த்ரே॥ இதி தனூநப்த்ரே॥ ‘trE’ (PS) acquires anudAttam (AA) to support ‘i’ of ‘iti’. ‘trE’ becomes ‘tra’ before vowel ‘e’. ‘tanU’ after split, nU acquires swaritam as it comes after udAttam ‘ta’, so ‘ti’ swaritam becomes AA. ‘nU’ acquires dheerga Swaritam as it is at end of the Padam.	தனூனப்த்ர இதி தனூ॥ -- நப்த்ரே॥ தனூநப்த்ர இதி தனூ॥ – நப்த்ரே॥ It is through Pada Paatam, the Padam of tanU is explained. ‘naptrE’ remains unchanged. Kindly note this is a padam with udAttam start followed by an anudAttam and udAttam again.
TS 1.6.12.3 शतक्रतो इति शतक्रतो ஶதக்ரதோ இதி ஶதக்ரதோ ශතක්‍රතෝ ඉති ශතක්‍රතෝ ‘SatakratO’ is all udAttam in vAkyam. Shall acquire support anudAttam. ‘tO’ comines with ‘e’ to give ta +vi .	शतक्रतविति शत–क्रतो ஶதக்ரதவிதி ஶத -- க்ரதோ ශතක්‍රතවිති ශත – ක්‍රතෝ First part ‘Sata’ is marked without anudAttam as per Pada Paatam Rule. Second Part ‘kratO’ is marked with anudAttam. On joining, all will be with

So, in Padam, all letters retain their SA till udAttam 'vi'.	SA and unmarked udAttam (ES) in vAkyam.
TS 2.4.2.1 வீர்யாவதீ: இதி வீர்யாவதீ: வீர்யாவதீரிதி வீர்ய -- வதீ: வீரியாவதீ: இதி வீரியாவதீரிதி வீரிய – வதீ: । vathIH is ekasruti. Visargam becomes 'r' and with 'i' of iti becomes 'ri'. 'tl' acquires SA to support 'i'	Note: vIrya is a special padam with swaritam 'rya' after anudAttam 'vI' . It acquires dheergam due to special grammar rule to 'yA' before 'va' letter. vathIH (ES) marked in AA. By PS definition this swaritam is Nitya.

7.2 Examples of common end-words in vAkyam to Padam:

In this section we give examples of commonly occurring ending-words in a Ruk and how it is converted in Pada Paatam. The **Padam as in Pada Paatam** is **given in a bracket** in each of these examples for better understanding.

This Padam split is common to Krama, Jatai and Ghana Paatams when a Ruk ends. Many of ending words are single Padams only. Then they are represented as Padam1 iti Padam to explain the word. They have a single part which is treated as one statement and not as two parts as in Padam Split (PS) or

Pragraha with Split (PGS). All Sandhis and Swaram rules are applied. Please revise the Swaram rules with results and examples given in Section 6.

Vakkaym plus “iti” as it is	Derived words in Pada Paatam
TS 4.5.1.1 नमः इति नमः (नमः) நம: இதி நம: (நம:) നമഃ ഇതി നമഃ (നമഃ) Note: There is **no change** in conversion to Padam. The visargam of namaH drops before vowel ‘i’ of iti. The ‘ma’ (PS) acquires AnudAttam ma to support PS ‘i’ of iti.	नम इति नमः நம இதி நம: നമ ഇതി നമഃ The PS ‘ti’ of iti acquires anudAttam ‘ti’ to support na of namaH. Note: There is **no change in conversion to Padam**.The swaritam of maH is formed after a udAttam in normal flow and called tairrovyanjana. The swaritam gives up its position before an upcoming udAttam ‘i’ of iti
TS 4.5.1.3 नः इति नः (नः) ந: இதி ந: (ந:)	न इति नः ந இதி ந:

നഃ ഇതീ നഃ (ന॒ഃ) 'naH' has anudAttam in vAkyam. So acquires SA. Visargam gets dropped before vowel 'i' of iti.	ന॒ ഇതീ നഃ na acquires anudAttam to support udAttam 'i' and followed by PS 'ti'. In Second Part naH is represented without swaram as it is Ekasruti.
TS 4.5.1.1 मृडय ऽइति मृडय (मृ॒डय॒) ம்ருட3ய இதீ ம்ருட3ய (ம்ரு॒ட3॒ய॒) മൃഡയ ഇതീ മൃഡയ (മൃ॒ഡയ॒ mRuDaya is all udAttam in vAkyam. So, mark then with Support udAttam. 'ya' (SA) combines with 'i' udAttam of 'iti to give 'yE'	मृ॒ड॒येति मृडय ம்ரு॒ட3॒யேதீ ம்ருட3ய മൃ॒ഡ॒യേതീ മൃഡയ The Second part is represented without any support Swarams. Since it is all EkaSruti (ES).
TS 4.5.1.4 भव ऽइति भव (भ॒व॒) ப4வ இதீ ப4வ (ப॒4வ॒) ഭവ ഇതീ ഭവ (ഭ॒വ॒)	भ॒वेति भव ப॒4வேதீ ப4வ ഭ॒വേതീ ഭവ

ஃவ இதி ஃவ (ஃவ) Bava is all udAttam in vAkyam. So, mark then with Support udAttam. 'va' (SA) combines with 'i' udAttam of 'iti to give 'vE'	ஃவேதி ஃவ The Second part is represented without any support Swarams. Since it is EkaSruti.
TS 4.5.8.2 च इति च (च) श इति श (श) ऽ इति ऽ (ऽ) 'ca' is unmarked udAttam in vAkyam. It will first get support anudAttam. It combines with 'i' of iti (PU) to give cE in udAttam.	चेति च शेति श ऽेति ऽ 'ti' remains as it is. 'ca' is represented as EkaSruti.
TS 4.7.3.2 मे इति मे (मे) ꣳमे इति ꣳमे (ꣳमे) ꣳमे इति ꣳमे (ꣳमे)	म् इति मे म् इति ꣳमे म् इति ꣳमे

‘mE’ is unmarked udAttam in vAkyam. It will first get support anudAttam. It becomes ‘ma’ before ‘i’ of iti . ‘ma’ supports udAttam ‘i’ followed by swaritam ‘ti’.	ti’ remains as it is. ‘mE’ is represented as EkaSruti.
TS 4.5.10.3 ते इ॑ति ते (ते॒) दे इ॑दी दे (दे॒) ते इ॑ती ते (ते॒) ‘tE’ is unmarked in vAkyam. It will first get support anudAttam. It becomes ‘ta’ before ‘i’ and supports udAttam ‘i’ of‘iti’.	त॒ इ॑ति ते द॒ इ॑दी दे त॒ इ॑ती ते
TS 1.1.2.2 असि इ॑ति असि (असि॒) असी इ॑दी असी (अ॑सी॒) असी इ॑ती असी (अ॑सी॒) ‘asi’ is all anudAttam in vAkyam. It will first get support anudAttam. ‘si’ (SA) in	असी॒त्यसि अ॒सी॑त्यसी असी॒त्यसी

Sandhi with ‘i’ (PU) of iti becomes ‘sI’ , udAttam.	‘ti’ (PS) swaritam in sandhi with ‘a’ (SA) gives ‘tya’ as KShaipra Swaritam. ‘si’ is ekasruti.
TS 4.5.10.3 अस्तु इ॑ति अस्तु (अस्तु) அஸ்து இ॑தி அஸ்து (அஸ்து) അസ്തു ഇ॑തി അസ്തു (അസ്തു) ‘tu’ (SA) of astu combines with ‘i’ of iti (PU) to give ‘stvi’ udAttam. ‘ti’ (PS) Swaritam combines with SA ‘a’ to give ‘tya’ in Swaritam.	अस्त्वि॑त्यस्तु அஸ்த்வி॑த்யஸ்து അസ്ത്വി॑ത്യസ്തു Stvi is udAttam. ‘a’ retains its anudAttam to support ‘tya’ Swaritam. (KShaipra)
TS 1.1.8.1 स्वाहा॑ इ॑ति स्वाहा॑ ஸ்வாஹா॑ இ॑தி ஸ்வாஹா॑ സ്വാഹാ॑ ഇ॑തി സ്വാഹാ॑ ‘svAhA’ does not change in Padam as it consists of udAttam followed by	स्वाहे॑ति स्वाहा॑ ஸ்வாஹே॑தி ஸ்வாஹா॑ സ്വാഹേ॑തി സ്വാഹാ॑ ‘ti’ PS of iti, acquires anudAttam (ti) to support ‘sva’ and followed by ‘hA’ Swaritam in Second part.

Swaritam. First 'hA' in Swaritam combines with udAttam 'i' to give udAttam 'hE'.	
TS 1.2.13.3 त्वा इ॑ति त्वा (त्वा) त्वा इ॑ति त्वा (त्वा) ത്വാ ഇ॑തി ത്വാ (ത്വാ) 'tvA' acquires support anudAttam in Padam. SA 'tvA' combines with 'i' of iti (udAttam) to give 'tvE' udAttam.	त्वे॑ति त्वा त्वे॑ति त्वा ത്വേ॑തി ത്വാ There is no other Sandhi. 'tvA' represented as EkaSruti in the end of statement.
TS 1.5.8.5 दधाति इ॑ति दधाति (दधाति) द३धा४ति इ॑ति द३धा४ति (द३धा४ति) ദധാതി ഇ॑തി ദധാതി(ദധാതി)	दधा॑तीति दधाति द३धा४ती॑ति द३धा४ति ദധാ॑തീതി ദധാതി 'ti' (SA) of dadhAti combines with 'i' of 'iti' (PU) to give udAttam 'tI'

'dadhAti' is all udAttam and acquires Support anudAttam as Padam.	
TS 1.5.9.7 एति इ॑ति एति (एति) ஏதி இ॑தி ஏதி (ஏதி) ഏതി ഇ॑തി ഏതി (ഏതി) 'Eti' is all udAttam and acquires Support anudAttam as Padam. 'ti' Support anudAttam combines with udAttam 'e' to give 'tI' udAttam.	एतीत्येति ஏதீத்யே॑தி ഏതീത്യേ॑തി 'ti' of iti Swaritam combines with SA 'ae' to give 'tyE' in KShaipra Swaritam. No other Sandhi or Swaram influence involved.
TS 1.7.4.6 वेद॑ इ॑ति वेद வேத॑$_3$ இ॑தி வேத$_3$ വേദ॑ ഇ॑തി വേദ vEda with anudAttam and Swaritam does not undergo change in Padam. 'da' swaritam with 'i' udAttam gives 'dE' udAttam.	वेदेति वेद॑ வேதே$_3$தி வேத॑$_3$ വേദേതി വേദ॑ The 'ti' of iti, (PS)swaritam acquires anudAttam (AA) to support udAttam ve followed by swaritam 'da'

TS 4.5.10.5 कृधि इति कृधि (कृधि) क्रुधि$_4$ इति क्रुधि$_4$ (क्रुधि$_4$) कृधी इति कृधी (कृधी) kRudhi gets anudAttam in Pada Paatam. 'dhi' support anudAttam in sandhi with 'i' gives 'dhI' in udAttam.	कृधीति कृधि क्रुधी$_4$ति क्रुधि$_4$ कृधीति कृधी No other Sandhi. dhI udAttam followed by 'ti' is swaritam and supported by kRu as anudAttam. Second part is ES.
TS 2.1.5.7 एनम् इति एनम् (एनम्) एनम इति एनम (एनम) ഏനം ഇതി ഏനം (ഏനം) 'Enam' is udAttam in vAkyam and acquires anudAttam in Padam. 'mi' udAttam is formed by 'm' with 'i' udAttam	एनमित्येनम् ഏനമിത്യേനം ഏനമിത്യേനം 'ti' swaritam combines with 'ae' support anudAttam to give KShaipra swaritam 'tyE'.

TS 2.2.8.6 ऍव ऽइति ऍव ऍव ऽइति ऍव ऍव ऽइति ऍव ‘Eva’ retains status in Pada Paatam. ‘va’ udAttam plus ‘i’ udAttam gives ‘vE’. ‘ti’ Swaritam combines with Prime anudAttam ‘ae’ the combination produces ‘tyE’ in anudAttam.	ऍवेत्येव ऍवेत्येव ऍवेत्येव ‘Note the combination is not PU+PA that produces Swaritam due to following udAttam ‘va’. Also recall examples of PU+PA from Section 6.
TS 2.5.3.7 ऽइति ऽइति ऽइति ऽइति ऽइति ऽइति ऽइति ऽइति ऽइति ‘iti’ does not change in Pada Paatam. Note the middle ‘iti’ is the ‘iti’ of Pada Paatam. First and third ‘iti’s are the Original Padam taken for explanation.	ऽइतीतीति ऽइतीतीति ऽइतीतीति ‘ti’ Swaritam with ‘i’ udAttam gives first ‘tI’ udAttam. ‘ti’ again with ‘i’ udAttam with second ‘tI’. ‘ti’ will retain Swaritam all previous three letters udAttam.

	Note any number of udAttams can be formed continuously.
TS 4.3.10.3 आसीत् इति आसीत् (आसीत्) ആസീത് ഇതി ആസീത് (ആസീത്) ആസീത് ഇതി ആസീത് (ആസീത്) 'AsIt' is Ekasruti in vAkyam so will acquire anudAttam.	आसीदित्यासीत् ആസീദിത്യാസീത് ആസീദിത്യാസീത് 't' of AsIt' becomes 'd' in Sandhi with udAttam 'i' to give 'di'. 'ti' Swaritam combines with SA 'A' to give 'tyA' KShaipra Swaritam. 'sI' di and followed by swaritam tyA, so first 'A' becomes SA.
TS 4.4.3.3 अस्ति इति अस्ति (अस्ति) അസ്തി ഇതി അസ്തി (അസ്തി) അസ്തി ഇതി അസ്തി (അസ്തി) 'asti' is unmarked udAttam in vAkyam acquires anudAttam in Padam. 'sti'	अस्तीत्यस्ति അസ്തീത്യസ്തി അസ്തീത്യസ്തി 'ti' Swaritam combines with 'a' support anudAttam to support istI udAttam and 'tya' which is KShaipra Swaritam.

(SA) combines with 'i' udAttam to give 'stI' in udAttam.	
TS 4.6.7.5 വാര്യാണി ഇതി വാര്യാണി വാർയാണി ഇതി വാര്യാണി വാര്യാണി ഇതി വാര്യാണി The Padam "vAryANi' does not change in Padam. 'Ni' ekasruti combines with 'i' udAttam to give 'NI' in udAttam.	വാര്യാണീതി വാര്യാണി വാർയാണീതി വാർയാണി വാര്യാണീതി വാര്യാണി There is no other Sandhi. But 'ryA' acquires anudAttam for initial Swaritam 'ti'which also acquires anudAttam 'ti' to support udAttam 'vA' followed by Swaritam 'ryA'
TS 4.6.8.1 വീര്യാണി ഇതി വീര്യാണി വീർയാണി ഇതി വീർയാണി വീര്യാണി ഇതി വീര്യാണി 'vIryANi' is a Padam with special Swaritam (ref Section 4.6) formation after 'vI' anudAttam, so it will retain its position. This example is specifically	വീര്യാണീതി വീര്യാണി വീർയാണീതി വീർയാണി വീര്യാണീതി വീര്യാണി 'Ni' (ekasruti) combines with 'e' of iti to give 'NI' in udAttam. 'ti' is a Prime Swaritam , 'ryA' in vIryAni will retain its position and not acquire anudAttam.

given for the readers understanding and comparing with previous example .	So, two swaritams are retained. Please refer to similar examples in Sec 6.
TS 1.6.12.5 इन्द्रः इति इन्द्रः இந்த்3ர: இதி இந்த்3ர: இந்த்3ரஇதி இந்த்3ர: இந்த்3ர இதீந்த்3ர: இந்த்3ரஇதீந்த்3ர: இந்த்3ர இதீந்த்3ர: இந்த்3ர இதீந்த்3ர: இந்த்3ர இ

When ‘u’ as a vowel comes in ‘v’ is added to following vowel sound.	with ‘u’ support udAttam vi followed by ‘tyu’ in Swaritam.

7.3 Examples of conversion from Pada Paatam with ‘iti’ words to vAkyam

In this Section we shall see some examples of how vAkyam shall be derived from the Pata Paatam with two padams with a join of ‘iti’.

Main steps to take care are:

1. First remove the ‘iti from the statement.
2. Check the impact this ‘iti’ had on Vowel, Visarga, Consonant Sandhi and other special grammar rules; restore them back.
3. Check the impact of Swaram of ‘iti’ and remove acquired Swarams. If ‘ti’ retains its swaritam, hint is its followed by anudAttam and if ti has acquired support anudAttam hint is that it is followed by udAttam.
4. Remove all Swarams introduced as per Pada Paatam rules viz Support anudAttams and Acquired Swaritams and anudAttams.
5. Restore Swarams which should be marked on joining of these Padams.
6. Check the Consistency of the first and second part of the split.

In this Section we will have more examples from other areas as Rudram based Padams have been covered in the earlier Section.

Pada Paatam with “iti”	Derived word in vAkyam
गिरित्रेति गिरि – त्र	गिरित्र
कि$_3$रित्रेति कि$_3$रि -- त्र	कि$_3$रित्र

ഗിരിത്രേതി ഗിരി – ത്ര 'tra' is the end of the second padam, before 'ti', the 'trE' indicates that there is a sandhi of 'tra' +'i'. remove this iti. 'giri' is marked in anudAttam in first part and not marked in second part indicates the 'giri' does not have swaram in vAkyam. 'ie' Pracaya or EkaSruti. So first part gives giritra	ഗിരിത്ര Take second part, add giri+tra, both gi and ri are unmarked udAttam so it derives giritra as tra is also udAttam. Why it is not Swaritam?? If it were Swaritam, the 'gi' would have acquired anudAttam in vAkyam which would have also got reflected in Second part. Since there is no swaram influence on tra, tra is udAttam only. But if you read together it will be a pracaya or EkaSruti depending on where this word appears in vAkyam.
യാതുധാന്യ ഇതി യാതു – ധാന്യഃ യാതുതാ$_4$ന്യ ഇതി യാതു-- താ$_4$ന്യഃ യാതുധാന്യ ഇതി യാതു– ധാന്യഃ ~~'iti'~~ indicates it is dropped.	യാതുധാന്യഃ യാതുതാ$_4$ന്യഃ യാതുധാന്യഃ yaH in second part and ya without visargam indicates, that it is visargam dropped before 'i'. yAtu marked with anudAttam indicates no Swaram. So they are Pracaya. 'dhAnyAH' swaram is same as it is not influenced by any

Note: yAthudhAnyAH is a special padam that has swaritam after anudAttam.	dependency on both sides. So, we derive yAthudhAnyAH for both sides. Clearly Swaritam after anudAttam.
इषुधिमत इतीषुधि – मते இஷுதி$_4$மத இதீஷுதி$_4$ -- மதே இஷுധിമത ഇതീഷുധി – മതേ mathE ending in second part and matha in first part indicates, 'thE' has become tha before 'i'. itI dheergam is formed by 'ti' of iti and 'i' of ishu.	इषुधिमते இஷுதி$_4$மதே ഇഷുധിമതേ 'ishu' has anudAttam in Pada Paatam indicating no Swaram in vAkyam. Retain for third letter 'dhi' Check mathE marked with dheerga Swaritam indicates that dhi before 'ma' should be an anudAttam to support ''ma' which is udAttam followed by thE' as swaritam.
पशुपतय इति पशु–पतये பஶுபதய இதி பஶு -- பதயே പശുപത'യ ഇതി പശു – പത'യേ	पशुपतये பஶுபதயே പശുപത'യേ 'paSu' marked in anudAttam is followed by pa as udAttam and then

'ya' before 'e' indicates 'yE' as confirmed from second part. Drop the swarm for 'ya' which is acquired to support ~~'i' of iti~~	Swaritam 'ta' in Pada Paatam indicates the 'Su' is an anudAttam to support swaritm 'ta'. In second part joing paSu+pathayE , the 'Su' will acquire anudAttam to support udAttam pa and Swaritam 'ta'.
ग॒ह्वरेष्ठायेति॑ ग॒ह्वरे – स्थाय॑ क॒ह्वव॒रेव॒ष्टा॒२यैति॑ क॒ह्वव॒रे -- स्ता॒२य॑ ग॒ह्वरेष्ठायेति॑ ग॒ह्वरे – स्थाय॑ 'yE' read together with 'ya' indicates that it is 'ya' with 'i' that has become 'yE'. Gahva marked in yellow restored to udAttam(Pracaya); because of this 'rE' anudAttam 'ya' gets Swaritam.	ग॒ह्वरेष्ठाय॑ क॒ह्वव॒रेव॒ष्टा॒२य॑ ग॒ह्वरेष्ठाय॑ When second padam is joined, rE sound converts following 's' to Sh and the sthA would become ShTHA following Sh. (Both udAttam) Matches with first part. 'ya' indicated as Swaritam and on joining 'rE' gets anudAttam.
TS 1.1.12.1 अग्नाविष्णू इत्यग्नौ – विष्णू	अग्नाविष्णू

അക്3നാവിഷ്ണൂ ഇത്യക്3നാ -- വിഷ്ണൂ അഗ്നാവിഷ്ണൂ ഇത്യഗ്നാ – വിഷ്ണൂ agnAviShnU is dual noun so it does not combine with 'i' of 'iti'. 'NU' acquires Swaritam to support 'gnA' which is original Swaritam. Please note in these kind of cases, swaram does not shift to 'i' as it does not have swaram..'tya' will is udAttam formed through a combination 'ti' (PS) and 'a' (PU) gives PU since next letter rightly the Swaritam. Remove anudAttam of 'NU'.	അക്3നാവിഷ്ണൂ അഗ്നാവിഷ്ണൂ In Second part, join agnA+vishNU and remove the anudAttam it has acquired and it is udAttam in vAkyam. As per rule, viShNU is ekasruti after Swaritam 'nA'.
TS 2.3.9.3 ആഹുതീരിത്യാ – ഹുതീഃ ആഹൂതീരിത്യാ -- ഹൂതീഃ ആഹുതീരിത്യാ – ഹുതീഃ	ആഹുതീഃ ആഹൂതീഃ ആഹുതീഃ

Visargam sound after 'tl' is 'r'; and is indicated through this ~~'ri'~~ and the visargam is distinct at the end of second part. The 'tl' is dheergam in AhutI as indicated in second part. The first part tl has come out of tl of AhutI and 'i' of iti. 'I'+'i' ='I' (vowel sandhi). This 'tl' has acquired anudAttam to support 'tyA'. Remove this anudAttam.	This 'tyA' (AnudAttam) is formed by 'ti; swaritam and 'A' PU be dropped to indicate that there is no Swaram and 'A' is udAttam; By joining second part, 'A' with hutIH, hu following udAttam becomes Swaritam and that of tI will be dropped.
TS 1.8.1.2 ऐन्द्राग्नमित्यैन्द्र – अग्नम् ஐந்த்3ராக்3னமித்யைந்த்3ர -- அக்3னம் ஐந்த்3ராக்3னம் ஐந்த்3ராக்3னமித்யைந்த்3ர –அக்3னம் drA is derived out of dra+a. 'ti' + 'ai' derives tyai. The Swaritam derived is a dheerga letter followed by a conjunct consonant 'ndra' so acquires Dheerga Swaritam.	ऐन्द्राग्नं ஐந்த்3ராக்3னம் ஐந்த்3ராக்3னம் 'ai' the first (SA) anudAttam dropped introduced for Pada Paatam. drA first part supports 'tyai'. It is confirmed in the second part that 'a' is prime swaram with anudAttam, dra+a

	combination will produce an anudAttam before udAttam ‘gnam’
TS 1.3.14.5 अ॒ग्निꣳ॑ स्वि॒त्यप्॑ – सु अ॒प्2स्वि॑त्यप् - सू आ॒स्नि॒त्यै॒प् – सु Psu + ‘i’ produces Psvi for vowel sound combination ‘u’ with ‘i’ udAttam after anudAttam ‘a’. ‘ti’ and ‘a’ produces ‘tya’.	अ॒ग्नꣳ॑सु अ॒प्2सू आ॒स्नु ‘tya’ acquires Swaritam by rule (PU+PA =AS) and retained as it is. Removing ‘ti’ Swaritam will give anudAttam ‘a’. Now ‘su’ distinctly not marked to indicate that is an udAttam only.
TS 1.6.7.1 आ॒यत॑न॒मि॒त्या – यत॑नम् आ॒यत॑न॒मि॒त्या -- यत॑नम् आ॒यत॑न॒मि॒त्यै॒ – यत॑नं The first three letters are in right formation of anudAttam, udAttam and Swaritam. ‘na’ has acquired	आ॒यत॑नम् आ॒यत॑नम् आ॒यत॑नं ‘ti’ with Swaritam and following ‘A’ anudAttam has produced the ‘tyA’ with Dheerga Swaritam being a dheerga

anudAttam to support ‘tyA’. Remove ‘e’ from ‘~~mi~~’.	letter at end. Removing ti will result in ‘A’ with anudAttam. Join this A with yatanam. ‘A’ will acquire anudAttam to support ‘ya’ so confirmation is made.
TS 1.7.1.4 ब्रह्मवादिन इ॑ति ब्रह्म – वादिनः ப்3ரஹ்மவாதி3ன இ॑தி ப்3ரஹ்ம -- வாதி3ன: ബ്രഹ്മവാദിന ഇ॑തി ബ്രഹ്മ – വാദിനഃ When ‘iti’ is removed, the support ‘na’ will lose its anudAttam, the dropped visargam gets added. Remove the first two anudAttams for bra and hma	ब्रह्मवादिनः ப்3ரஹ்மவாதி3ன: ബ്രഹ്മവാദിനഃ Here just add brahma (Pracaya)+vAdinaH. No swaram adjustments or support required in second part.
TS 1.5.1.1 देवासुरा इ॑ति देव – असुराः	देवासुराः

தே3வாஸ்ரா இதி தே3வ -- அஸ்ரா: ദേ3വാസ്രാ ഇതി ദേ3വ അസ്രാഃ The ‘dheergam’ of ‘vA’ is explained through the combination of ‘va’ +’a’. dEvA is marked with anudAttam in Pada Paatam (Pracaya) indicating no swaram in vAkyam. ‘su’ only retains its Swaram.	தே2வாஸ்ரா: ദേ3വാസ്രാഃ On the Second part, applying swaram principle in Padam, ‘su’ retains anudAttam (PA). rA is the prime udAttam.
TS 1.1.14.1 இன்த்3ராக்3னீ இதீன்த்3ர – அக்3னீ இந்த்3ராக்3னீ இதீந்த்3ர-- அக்3னீ ഇന്ദ്രാഗ്നീ ഇതീന്ദ്ര – അഗ്നീ ‘gnI’ being a dual noun does not combine with ‘i’ of ‘iti; but ‘ti’ of iti combined with ‘i’ to give ‘tI’ when ‘iti’ removed, ‘nI’ loses support swaram	இன்த்3ராக்3னீ இந்த்3ராக்3னீ ഇന്ദ്രാഗ്നീ Based on all anudAttam marking restored to pracaya (unmarked). Please see the following example where the same word is represented

but it will be retained as unmarked udAttam which is Pracaya or EkaSruti depending on where the word appears in vAkyam.	differently in vAkyam and how Pada Paatam is different.
TS 1.1.14.1 इन्द्रा॑गनी इतीन्द्र – अ॑गनी इ॑न्द्रागनी इन्द्रा॑ग्नी इतीन्द्र – अ॑ग्नी इ॑न्द्राग्नी इन्द्रा॑ग्नी इतीन्द्र – अ॑ग्नी ‘drA’ is distinctly marked as Swaritam after udAttam ‘i’. The ‘gnI’ has support anudAttam which will be removed with ‘iti’. Directly word is derived. drA has dheerga Swaritam since it is a long letter with a conjunct consonant following it.	इ॑न्द्रागनी इ॑न्द्राग्नी इ॑न्द्राग्नी If second part is taken, ‘dra’ Swaritam and ‘a’ anudattam produces ‘drA’ Swaritam which acquires dheerga Swaritam.’gnI’ as Ekasruti represented without swaram.
TS 1.4.20.1 महे॑न्द्रायेति महा – इ॑न्द्राय	महे॑न्द्राय

മ॒ഹേ॒ന്ദ്ര॓₃രാ॒യേതി॑ മഹാ -- ഇ॒ന്ദ്ര॓₃രാ॑യ॑ മഹേന്ദ്രാ॒യേതി॑ മഹാ– ഇന്ദ്രാ॑യ॑ 'hE' is a sandhi of 'A' and 'i'. Whether it is 'a' or 'A' is explained in second part.'yE' is a sandhi of ya + 'i' of iti (AU)	മ॒ഹേ॒ന്ദ്ര॓₃രാ॑യ॑ മഹേന്ദ്രാ॑യ॑ ma will be restored as Pracaya. 'hE' has distinct anudAttam; on joining it supports drA udAttam and followed by Swaritam of 'ya'
TS 1.2.2.3 ഓ॑ഷധീ॒ഭ്യ ഇ॒ത്യോ॑ഷധി – ഭ്യഃ ഓ॑ഷ്ഠീ₄പ്₄യ॒ ഇ॒ത്യോ॑ഷ്ഠി₄ -- പ്₄യ॒: ഓ॑ഷധീ॒ഭ്യ ഇ॒ത്യോ॑ഷധി – ഭ്യഃ BhyaH loses visargam before vowel 'i' 'Bhya' loses support anudAttam on removal of 'i'. 'ityO' on removal of 'iti' becomes 'O', reversal of Sandhi.	ഓ॑ഷധീ॒ഭ്യഃ ഓ॑ഷ്ഠീ₄പ്₄യഃ ഓ॑ഷധീ॒ഭ്യഃ Both sides indicate Swaritam for 'Sha' after udAttam 'O', So dhIBya shall not acquire swaram as EkaSruti. Note: dhi + bhya becomes dhIByaH as per grammar rule.
TS 1.1.7.1 പ്ര॒ജാമിതി॑ പ്ര – ജാമ് പ്ര॒ജാമിതി॑ പ്ര – ജാമ്	പ്ര॒ജാം

ப்ர॒ஜாமி॑தி ப்ர - ஜாம் ப்ர॒ஜாமி॑தி ப்ர॒ ஜாம் ‘iti’ is removed in first part, it becomes prajAm with pra as anudAttam. Its ES in first part after swaritam ti.	ப்ர॒ஜாம் ப்ர॒ஜாம் In Second Part, restore the anudAttam for pra as indicated in first part. jAm in both parts as clearly visible as udAttam.
TS 1.2.7.1 प्र॒जाप॑तेरिति प्रजा – पतेः ப்ர॒ஜாப॑தேரிதி ப்ரஜா -- ப॒தே॒: ப்ர॒ஜாப॑தேரிதி ப்ர॒ஜா –ப॒தே॒ஃ ‘iti’ indicates existence of ‘r’ for visargam sound vowel sound ‘ae’. When iti is removed, the support anudAttam of ‘tE’ is removed. Then visargam is restored.	प्र॒जाप॑तेः ப்ர॒ஜாப॑தே: ப்ர॒ஜாப॑தே: In Second Part, join prajA+patEH, pa acquires Swaritam following udAttam ‘jA’ The ‘tE’ will be EkaSruti.

TS 1.3.8.1 प्राण इति प्र – अनः ப்ராண இதி ப்ர -- அன: ப்ராண இதி ப்ர -- அன: ప్రాణ ఇతి ప్ర – అనః prA derived from pra+a; when iti is removed, prA will be retained as it is.	प्राणः ப்ராண: ప్రాణః Second part indicates, pra+anaH should give prANaH, prA acquiring anudAttam which is prime to anaH . 'n' becomes 'N' after 'ra'.
TS 1.5.1.3 संवथ्सर इति सं – वथ्सरः ஸம்வத்2ஸர இதி ஸம் -- வத்2ஸர: സംവഥ്സര ഇതി സം -- വഥ്സരഃ Sam+va marked in anudAttam (SA) shall be restored to Pracaya. 'iti" is	संवथ्सरः ஸம்வத்2ஸர: സംവഥ്സരഃ Sam will have Pracaya. 'va' as the first letter will be restored to Pracaya and thsa retained. The Second part indicates anudAttam and shall be retained. Visaragam lost before 'i' restored.

taken out. 'thSa' will not lose its Swaram Prime anudAttam (PA).	
TS 1.5.2.2 ஶாயுரிதி ஶத – அயுः ஶதாயுரிதி ஶத -- ஆயுः ஶதாயுரிதி ஶத – ஆயுः Presence of 'riti' indicates visargam becoming 'r'. remove 'iti'. Restore 'yu' which has acquired anudAttam to support udAttam 'ri in 'riti; now it acquires Swaritam to 'rA' udAttam. Restores visargam dropped.	ஶாயுः ஶதாயுः ஶதாயுः join Sata+AyuH. 'yu' shall acquire Swaritam after udAttam 'tA'.
TS 1.5.2.2 ஶாதேன்த்3ரிய இதி ஶத – இன்த்3ரியः ஶதேந்த்3ரிய இதி ஶத -- இந்த்3ரிய இதி ஶத – இன்த்3ரியः ஶதேன்த்3ரிய இதி ஶத – இன்த்3ரியः	ஶாதேன்த்3ரியः ஶதேந்த்3ரியः ஶதேன்த்3ரியः

‘tE’ is a sandhi of ‘ta’ and ‘i’ of indriya. ‘yaH’ visargam dropped to be restored. ‘ya’ which acquired anudAttam to support ‘iti’ restored to ES after Swaritam.	Second part, join ta+e becomes ‘tE’. ‘ndri’ acquires Swaritam to support ‘tE’ which is udAttam.
TS 1.2.14.5 विश्ववे॑दा इ॒ति॑ विश्व – वे॑दाः விஶ்வவே॑தா இ॒தி॑ விஶ்வ -- வே॑தாः വിശ്വവേ॑ദാ ഇ॒തി॑ വിശ്വ – വേ॑ദാഃ ‘dAH’ loses visaragam before ‘i’. Restore. dA acquires anudAttam to support ‘ti’ so restore and remove ‘iti’	विश्ववे॑दाः விஶ்வவே॑தாः വിശ്വവേ॑ദാഃ just join viSva+vEdAH, vE acquires Swaritam since it follows anudAttam ‘vi’ and udAttam Sva.’dA’ is now ES.
TS 1.3.2.1 विराड॒ति॑ वि – राट् விராட்॒தி॑ வி - ராட் വിരാഡ്॒ഇതി വി – രാട്ട്	विराट् விராட் വിരാട്ട്

presence of Di indicates sandhi of 'T' with vowel vi (consonant Sandhi rule) Restore to "T"	Second part, vi acquires anudAttam as indicated in first part. 'rAt' is clearly noted as udAttam
TS 1.8.13.2 एकविꣳश इत्येक–विꣳशः ஏகவிꣳஶ இத்யேக-- விꣳஶ: ഏകവിꣳശ ഇത്യേക– വിꣳശഃ 'Eka' is Pracaya and vi(gm) has anudAttam. Sa is udAttam. 'tyE' is a sandhi of 'E' and 'ti; of iti.	एकविꣳशः ஏகவிꣳஶ: ഏകവിꣳശഃ Second Part remove iti, to get 'E'. it is clearly indicated that vi(gm) has anudAttam; retained. As per swarm marking, vi and gm will be marked as Prime anudAttam.
TS 1.2.8.2 जातवेदसमिति जात – वेदसम् ஜாதவேத3ஸமிதி ஜாத -- வேத3ஸம் ജാതവേദസമിതി ജാത വേദസം	जातवेदसं ஜாதவேத3ஸம் ജാതവേദസം

'sa' has acquired anudAttam to support 'mi' remove 'iti' and restore udAttam to sam. 'ta' is udAttam after jA.	Joining second part, 'vE' acquires Swaritam support 'ta'. 'dasam' will be Ekasruti.
TS 1.1.4.1 ह॒विर्धान॑मिति॑ हविः – धा॒नम् ह॒विर्தா॒ன॑மிதி॑ ஹவி: -- தா॒ன॑ம் ഹ॒വിർധാന॑മിതി॑ ഹവിഃ – ധാ॒ന॑ം 'na' acquires anudAttam to support 'mi; (of miti) will be restored to Swaritam to support 'vi'. 'rdhA' is clearly udAttam.	ह॒विर्धा॒नम् ह॒विर्தா॒னம் ഹ॒വിർധാ॒ന॑ം 'vi' is Prime anudAttam as indicated in part 1. 'nam' acquires Swaritam after 'rdhA' and since it is an anuswaram at the end, acquires dheerga Swaritam. (Not compulsory it depends on placement in vAkyam)
TS 1.1.11.2 मि॒त्रावरु॑णा॒विति॑ मि॒त्रा – वरु॑णौ	मि॒त्रावरु॑णौ

மித்ராவருணாவிதி மித்ரா -- வருணௌ மித்ராவருணாவிதி மித்ரா – வருணௌ 'Nau' with 'e' becomes NA vi. This 'NA' acquires anudAttam to support 'vi;. When iti is removed, it is restored to udAttam and nau.	மித்ராவருணௌ மித்ராவருணௌ mitrA has mi as prime anudAttam and 'trA' udAttam. Next padam varunau va as udAttam and ru as prime swaritam,Nau is ES.
TS 1.3.10.1 अपान इत्यप – अनः அபான இத்யப -- அன: അപാന ഇത്യപ – അനഃ 'pA' is a sandhi of 'pa' and 'a'. 'iti' gets dropped. No impact on 'pA' indicated through 'a' as prime anudAttam in second part. Restore visargam.	अपानः அபான: അപാനഃ Join apa+ana to get get apAnaH. It is clear na and naH are udAttam following anudAttam 'pA'

TS 4.2.9.1 उदानायेत्युत् – अनाय उदा॒नायेत्यु॑त् – अना॑य उदा॒3नायेत्यु॑त् -- अना॑य उदा॒നായേത്യു॑ത് – അനാ॑യ Similar to previous example. Note that 't' becomes 'd' to join vowel 'a' to give 'dA'	उदानाय उदा॒नाय उदा॒3नाय उദാ॒നായ 'dA' retains anudAttam, nA is udAttam. 'a' being prime swarm of anAya. 'ya' acquires Swaritam. Swaram of second part is very direct.
TS 1.5.11.3 उत्तमित्युत् – तमम् उ॒त्त॒मित्यु॑त् – त॒मम् उ॒त्त॒मित्यु॑त् -- त॒मम् ഉ॒ത്ത॒മിത്യു॑ത് – ത॒മം 'tyu' is a sandhi of 'ti' and 'u'. When iti is removed. 'u' will retain udAttam based on first part.'t' and 'ta' being of same class of hard consonant no change in letters.	उत्तमम् उ॒त्त॒मम् ഉ॒ത്ത॒മം 'ta' in second part is indicative like first part that it is anudAttam only. 'ma' udAttam in part one becomes mam completing the word

8 Padam joining without ‘iti’

In this Section, we shall provide illustrative examples of how Padams combine and how the resultant word is formed in vAkyam and also the impact of the Swaram on the derived words/Padams from the source Padams. The resultant words given in the right side of the table are not single Padams as per Pada Paatam, but combined words, that gives an idea of how Sandhi, if any, of words occur and how the final effect we see in vAkyam. The Swaras that result in the final or combined word (as a flow) will not be just one Prime Swaram but more than one intended Prime Swaram and support/acquired Swarams.

Please note that prefix/prepositions are given without ‘iti’ wherever used. This would help understand formation of words and its Swaram in common Mantras.

Readers shall remember to remove the additional anudAttams marked in the initial part of the Padam on left side.

The examples given are illustrative only.

Source Padams or Words	Resultant vAkyam
TS 1.1.5.1	
प्र + उक्षिताः	प्रोक्षिताः
ப்ர + உக்ஷிதா:	ப்ரோக்ஷிதா:
പ്ര + ഉക്ഷിതാഃ	പ്രോക്ഷിതാഃ
	‘pra’(udAttam) + u (udAttam/shown as SA) gives ‘prO. The kShi which

ukshitAH are all marked in udAttam in Pada Paatam. ‘pra’ is udAttam in vAkyam from which it is derived.	has Support anudAttam which follows prO (udAttam) becomes Swaritam. ‘tAH’ loses Swaram as Ekasruti. One single swaram in one full word.
TS 5.6.1.1 गर्भम्॑ + दधिरे க3ர்ப4ம்॑ + த3தி4ரே ഗർഭം॑ + ദധിരേ ‘rBaM’ has dheerga Swaritam in Padam since it is at the end of a Padam and is anuswaram. ‘dhi’ has prime anudhAttam.	गर्भम्॑ दधिरे க3ர்ப4ந் த3தி4ரே ഗർഭം ദധിരേ These are two padams represented separately or together in vAkyam if ‘m’ is joined with an ‘n’. ‘rBam’ shall have Swaritam at the middle of a statement, the dhi in dadhire retains its anudAttam. No influene of Swarams. Two padams with two prime Swarams.
TS 1.2.5.2 रायः + पोषे॑ण ராய: + போஷே॑ண	रायस्पोषे॑ण ராயஸ்போஷே॑ண

രാ യഃ + പോഷ്ണ ‘yaH’+’pO’ gives ‘spO’- vowel sandhi. rA is anudAttam, followed by yaH udAttam.	രാ യസ്പോഷ്ണ This will not make ‘spO’ acquire Swaritam since PO is udAttam. The Pada Paatam indicates clearly that ‘ShE’ is the prime Swaritam. Two Padams with two prime swarams and Swaritam comes after anudAttam and no other influences.
TS 2.5.12.3 ഹേ ഡഃ + അവ ഹേഡ3: + അഽവ ഹേഡഃ + അവ hE is the start udAttam,’daH’ has Swaritam. It is followed by ‘a’ which elides and becomes ‘avagraha –ऽ’ ‘hE’ being unmarked udAttam does not acquire swaram even by reverse support to Swaritam ‘va’.	ഹേ ഡോഽവ ഹേഡോ3ഽവ ഹേഡോടവ ‘dAH’ or converted ‘dO’ will pass on its Swaritam to va which is prime. Another way the Scholar explains is that the ‘daH’ Swaritam and ‘a’ udAttam by rule produces, dO as udAttam only; ‘va’ will retain swaritam Same Padam with combination of letters/prefix or suffix can have different Padams.

TS 4.3.10.1 (see next example also) सप्त + ऋषयः ஸப்த + ருஷய: സപ്ത + ഋഷയഃ 'Sapta' has no swaram hence all marked as Pracaya. RuShaya is a set word with swaram combination of anudAttam, udAttam and Swaritam.	सप्तर्.षयः ஸப்தர்.ஷய: സപ്തർ.ഷയഃ 'ta' with 'a' sound combines with 'Ru' (prime anudAttam) to give r. (swarabhakti). Since this 'r' is joined to 'pta' and ptar,shall acquire anudAttam before udAttam 'Sha'. No other influence on Swaram or rules.
TS 4.6.5.5 (variation of same words above) सप्त + ऋषयः ஸப்த + ருஷய: സപ്ത + ഋഷയഃ Here 's' has anudAttam and 'Sha' has Swaritam. One follows the other.	सप्तर्.षयः ஸப்தர்.ஷய: സപ്തർ.ഷയഃ 'ptar.' formed is an udAttam and it does not influence swaram. Following 'Sha' retains its Swaritam in the regular flow.

TS 3.1.5.2 स्वाहा॑ + इ॒ति + अ॒भि॒तः സ്വാഹാ॑ + ഇ॒തി + അ॒ഭി॒തഃ സ്വാ॒ഹാ॑ + ഇ॒തി + അ॒ഭി॒തഃ ‘A’ Swaritam plus ‘e’ (udAttam) becomes ‘hE’ (udAttam).. ‘ti’ Swaritam with ‘a’ PA anudAttam, produces ‘tya’ (PA) as per Swaram rule.	स्वाहे॒त्य॒भि॒तः സ്വാഹേ॒ത്യ॒ഭി॒തഃ സ്വാ॒ഹേ॒ത്യ॒ഭി॒തഃ ‘tya’ is followed by ‘Bi’ udAttam and ‘taH’ Swaritam, so acquires anudAttam as support. There were three Padams with three swarams, now in the combined word we have only two, due to Sandhi and swaram rules.
TS 4.1.7.4 प्रति॑ + औ॒ह॒ताम् + अ॒श्वि॒ना॑ പ്രതി॑+ഔ॒ഹ॒താം + അ॒ശ്വി॒നാ॑ പ്ര॒തി॑+ഒൗ॒ഹ॒താ॑ം+ അ॒ശ്വി॒നാ॑ ‘ti’ and ‘au’ combination produces a Swaritam ‘tyau’ (PS+SA) following udAttam ‘pra’. There is ekasruti of ha and tA.	प्र॒त्यौ॒ह॒ताम॒श्वि॒ना॑ പ്ര॒ത്യൌ॒ഹ॒താ-മ॒ശ്വി॒നാ॑ പ്ര॒ത്യൗ॒ഹ॒താ–മ॒ശ്വി॒നാ॑ ‘m’ and ‘a’ produces prime anudAttam ‘ma’ status, Svi udAttam and ‘nA’ being the following Swaritam.

	'nA' loses dheerga Swaritam not being at the end of the resultant word, 'nA' in vAkyam.
TS 1.4.45.1 प्र + मुमुग्धि + अस्मत् ப்ர + முமுக்3தி4 + அஸ்மத் ப்ர +முமுக்3தி4 + அஸ்மத் pra is udAttam, first mu acquires Swaritam. Second 'mu' retains EkaSruti. 'gdhi' is (EA)+ a (PA) = AA	प्र मुमुग्ध्यस्मत् ப்ர மு'முக்3த்4யஸ்மத் ப்ர மு'முக்3த்4யஸ்மத் this 'gdhi' combines with 'a' (prime anudAttam of that word) to give 'dhya'. 'sma't udAttam Pra udAttam (no Swaram). Next two padams produce two prime swarams in vAkyam one acquired and the other prime.
MEdha Suktham & 3.2.5.4 अश्विनौ॑ + उभौ + आ + धत्ताम् அஶ்வினௌ॑ + உபௌ4 + ஆ । த4த்தாம் த4த்தாம்	अश्विना' वुभा–वाधत्तां' அஶ்வினா'-வுபா4வாத4த்தாம்'

അശ്വിനൗ+ ഉഭൗ + ആ + ധത്താം 'nau' +'u' vowel gives Swaritam 'nA' rightly supporting 'a' of aSvinau. 'nA' at the middle of the statement will not have dheerga Swaritam as in the end of the Padam.the'v' plus 'u' prime swaram of ubau gives 'vu' anudAttam.	അശ്വിനാ വുഭാ–വാധത്താം Similary 'bau'+ 'A' gives bA+vA (v+A) This vA will not acquire Swaritam as it represents 'A' of Eti. (AdhattAm) which is udAttam. So, the following 'dha' of dhattAm acquires Swaritam.
Bhagya Suktham ब्रह्मणः + पतिं പ്ര്ഹ്മണ: +പതിം ബ്രഹ്മണഃ + സ്പതിം 'hma' is the prime swaritam for brahmaNaH after udAttam 'bra' and 'ti' for patim with a dheerga Swaritam at the end of the Padam being anuswaram.	ब्रह्मणस्पतिं പ്ര്ഹ്മണസ്പതിം ബ്രഹ്മണസ്പതിം 'Na:' joining 'pa' results in 'spa' as per Vowel Sandhi and it is an udAttam, the following ti is Swaritam, so 'Na' acquires anudAttam to support 'spa' and swaritam ti. It will be Swaritam as it occurs at the middle of a statement.

Bhagya Sukthamदेवाः + तेन தே3வாः + தேன ദേവാഃ + തേന dEvAH does not have swaram and marked in SA (pracaya) in Pada Paatam. vAH joining with 'ta' varga gives 's' for Visargam	देवास्तेन தே3வாஸ்தேன ദേവാസ്തേന 'na' of tEna is prime Swaritam, hence the vA acquires anudAttam to support 'stE' udAttam.
From Nakshatra Sukthamदेवि + अदितिः தே3வி + அதி3தி: ദേവി + അദിതിഃ dEvi has no swaram in vAkyam and hence marked with Support anudAttam (SA). 'vi' +'a' (udAttam) results in 'vya' being udAttam.	देव्यदितिः தே3வ்யதி3தி: ദേവ്യദിതിഃ but 'di' of aditiH has prime Swaritam. Hence 'vya' remains udAttam and 'dE' acquires anudAttam.

देवः+सवितः தே3வ: + ஸவித: தே3வஃ + ஸவிதஃ ‘dE’ is the prime anudAttam for dEvaH and ‘vi’ for savitaH. The visaragam becomes ‘s’ before ‘sa’.	देवस्सवितः தே3வஸ்ஸவித: தே3வஸ்ஸவிதஃ This ‘sa’ acquires Swaritam as it follows ‘va’ after ‘dE’. There are two padams and both the padams retain their prime anudAttams and ‘sa’ is derived/acquired swaritam.
नमस + उप + सद्य நம॑ஸ + உப + ஸத்3ய நமஸ + உப + ஸத்3ய ‘ma’ of namasa and ‘dya’ are prime swarams in the padams.’sa’ combines with ‘u’ to give ‘sO’.	नमसोप–सद्य நம॑ஸோப-ஸத்3ய நமஸோப–ஸத்3ய ‘dya’ is intended Swaritam afer udAttam ‘sa’, so ‘pa’ acquires support anudAttam.
भूः + भुवः + सुवः	भूर्भुवस्सुवः

ഭൂ4: + പു4വ: + സ്വ: ഭൂഃ + ഭുവഃ + സുവഃ BUH has udAttam, the Swaritam shall be not 'Bu' of BuvaH which is udAttam but the next intended 'vaH' is swaritam. This vaH shall acquire anudAttam to support 'su' of SuvaH	ഭൂ4ർപു4വസ്സ്വ: ഭൂർഭുവസ്സുവഃ Note: when this Mantra is repeated thrice during vedic recital, the suvaH becomes suvO due to visargam, but vO will acquire anudAttam to support following vaH in BuvaH in the first two repetitions and at the end retain its Swaritam.
TS 1.8.6.1 പ്രതിപൂരുഷം് + ഏക+കപാലാന് പ്രതിപൂരുഷം + ഏക + കപാലാൻ പ്രതിപൂരുഷം + ഏക + കപാലാൻ 'pra,ti, and 'PU' Support anudAttam (SA), 'ru' has Prime anudAttam, Sha udAttam. Note : kapalAn without swaram all marked in anudAttam in Padam will be ekasruti after Swaritam.	പ്രതിപൂരുഷമേകകപാലാന് പ്രതിപൂരുഷമേകകപാലാൻ പ്രതിപൂരുഷമേകകപാലാൻ The following Swaritam is 'ka' of eka. entire first part acquires pracaya at the beginning of the statement. 'Sham' and 'e' which becomes 'mE', shall be udAttam. (PU+PU)

षट् + होतारं ஷட்+ஹோ$_4$தாரம் ஷட் + ஹொதாரம 'T' precedes 'hO' as per Consonant Sandhi it becomes 'DDhO'	ष॒ड्होतारं ஷட்$_3$டோ$_4$தாரம் ஷட்³டோ⁴தாரம This DDho acquires Swaritam as it follows 'Sha' udAttam. This Swaram takes precedence. Sha of ShaT is always udAttam (rule given and referred in PS.)
T.S.1.4.43.1 उत् + उ॒ + त्यम உத் । உ॒ । த்யம் உத் । உ॒ । ത്യം । 'ut' is udAttam and so is 'tyam'.	उ॒द्वं त्यं உது$_3$ த்யம் உദു॒ ത്യം 't' becomes 'd' joins with 'u' (SA) to give 'du' it acquires only anudAttam and tyam (udAttam)

T.S.1.4.43.2 (एति)॑ आ । एति । (ऐति)॑ आ । ऐति । (ऐती)॑ आ । ऐती । (एती)॑ आ । एती । 'A' with anudAttam joins following 'ae' of aeti which is udAttam marked in anudAttam (SA) in PP.	ऐति ऐती एती 'A'+ 'e' gives 'ai; will be udAttam ; 'ti' is Support anudAttam, but acquires Swaritam.
T.S.1.5.7.1 ँलोकं + उप । एति । अस्य लोकम् । उप । ऐति । अस्य । लोकं । उप । ऐति ।अस्य । There are three sandhis marked. 'm' +u being udAttam gives mu as udAttam. 'pa' which is prime swaritam, combines with 'ae' (SA) to give pai, which retains its Swaritam.	ँलोकमुपैत्यस्य ँलोकमुपैत्यस्य ँलोकमुपैत्यस्य 'ti' udAttam marked as Support anudAttam in PP combines with 'a' (PA) of asya (as itya) as (SA) anudAttam before 'sya' udAttam.
T.S.1.5.7.1 युनक्ति । उप । इति । आह । युनक्ति । उप । इति । आह । युनक्ति । उप । इती । आह । युनक्ति । उप । ईति । आह ।	युनक्त्युपैत्याह युनक्त्युपैत्याह युनक्त्युपैत्याह

യുനക്തി । ഉപ । ഇതി । ആഹ 'kti' of unakti Support anudAttam combines with 'u' to give ktyu which retains udAttam. 'pa' with 'I' (PU) gives pE udAttam and 'tyA' follows as Swaritam.	യുനക്ത്യുപേത്യാഹ 'ti' (PS) with 'A' (SA) gives tyA which retains swaritam. If you look for possible anudAttam support it comes from 'na' of unakti as it is marked in Support anudAttam in PP which can acquire swarm.
T.S.1.5.9.5 സർവ്വം॥ ആയുഃ । ഏതി । അഭി । വൈ സർ്വമ് । ആയുഃ । ഏതി । അപി$_4$ । വൈ । സർവം । ആയുഃ । ഏതി । അഭി । വൈ । 'm' +'A' udAttam gives 'mA' as udAttam. 'u' retains its Swaritam to support 'irva. 'visargam 'r' with 'ae' retains udAttam.	സർവമായുരേത്യഭി വാ സർ്വമായുരേത്യപി$_4$ വാ സർവമായുരേത്യഭി വാ 'ti' (PS) with 'a' (PA) gives 'tya' this becomes anudAttam to support following udAttam 'Bi'. 'vai' in pada paatam becomes 'vA' due to following vowel.
T.S.1.7.1.6 മാ । ക്ഷായി । ഇതി । ആഹ । അക്ഷിതിമ് । ഏവ । ഉപ । ഏതി ।	മാ ക്ഷായീത്യാഹാക്ഷിതിമേവോപൈതി

மா । க்ஷாயி । இதி । ஆஹ । அக்ஷிதிம் । ஏவ । உப । ஏதி மா । க்ஷாயி । இதி । ஆஹ । அக்ஷிதிம । ஏவ । உப । ஏதி 'mA' is udAttam following kShA marked in anudAttam in PP does not acquire Swaritam. 'iti' (PS) + aha (SA) produces ityAha with ityA with Swaritam but gets anudAttam so support 'a' udAttam followed by 'kShi' of akShitam which is prime swaritam. Please note 'tyA' would have been a firm Swaritam if formed through PU+SA	மா க்ஷாயீத்யாஹா-க்ஷிதிமேவோபைதி மா க்ஷாயீத்யாஹா–க்ஷிதிமே வோபைதி m+eva retains its 'mE' as anudAttam. So the 'pa'(PS) + 'e' (SA) of eti , pai gets Swaritam. 'va'+u bother in udAttam give vO in udAttam.
T.S.1.7.10.1 परि । एति பரி । ஏதி । பரி । ஏதி । 'ri'' (PS) joins 'ae' (SA) to give 'iryE'. retains swaritam after anudAttam pa.	पर्येति பர்யேதி பரேயதி Note: this swaritam is not KShaipra as it is PS+SA though ya is formed
T.S.1.8.14.2 क्षत्रपतिः । असि । अति । க்ஷத்ரபதி: । அஸி । அதி ।	क्षत्रपतिरस्यति க்ஷத்ரபதிரஸ்யதி

க்ஷத்ரபதி:+ அஸி । அதி க்ஷத்ரபதிஃ । அஸி । அதி । No change till kShatrapati. Visaragam ‘r’ joins a to become ‘ra’ Support anudAttam to support ‘sya’ udAttam and following swaritam ti of ati.	க்ஷத்ரபதிரஸ்யதி க்ஷத்ரபதிரஸ்யதி ‘si’ (SA) with a (PU) becomes sya is again udAttam combination.
T.S.1.2.11.1 ப்र । इषे । ப்ர । இஷே ப்ர । இஷே ‘pra’ is udAttam joining with ‘e’ gives prE which will be udAttam.	ப்रेषे ப்ரேஷே ப்ரேஷே
T.S.1.3.5.1 अति । अन्यान् । अगाम् । न । अन्यान् । उप அதி । அன்யான் । அகா3ம் । ந । அன்யான் । உப அதி । அன்யான் । அகாம் । ந । அன்யான் । உப । All sandhis marked in Blue create udAttams. ‘ti’ with ‘a’ will generate ‘tya’ in Swaritam.Thes acquires anudAttam to support ‘nyA’ udAttam	अत्यन्यानगां नान्यानुप அத்யன்யானகா3ந் நான்யானுப அத்யன்யானகாம் நான்யானுப ‘gA’ in itself to support ‘nnA’ udAttam since all letters following it are all udAttam ‘pa’ can acquire swaritam.

T.S.1.6.4.1 अनु॑ । उत् । अनु॑ । उत् അനു॑ । ഉത് । The anudAttam ut joins with ‘u’ of anu to give udAttam anUt.	आनूत् अनूत् അനൂത്
T.S.1.6.3.1 नि । उ । नि॒ । उ॒ । നി । ഉ । ‘ni’ with ‘u; sound a combination of u sound will produce swaritam ‘nyu’. PU+SA = AS (KShaipra) at the beginning of the statement it will be Nitya.	न्यु॑ न्यु॑ ന്യു॑
TS 1.6.7.2 एतत् । हि । एतयो॑ः एतत् । हि । एतयो॑ः । ഏതത് । ഹി । ഏതയോ॑ഃ ।	तद्ध्येतयो॑ तत्3त्4येतयो॑ തദ്ധ്യേതയോ॑

‘t’ of ‘etat’ in sandhi with ‘hi’ becomes ‘ddhi’(udAttam) and again in sandhi with ‘ae’ of ‘etayOH, becomes ddhyE in Swaritam. (PU+PA = AS)	Since this is a special derived swaritam (KShaipra) ‘y’ derived due to Sandhi of ‘e’ sound) it retains its position; tayOH as PS retains its position.
TS 1.2.7.1 कृशानो । एते க்ருஶானோ । ஏதே । കൃശാനോ । ഏതേ । ‘nO’ of kRuSAnO becomes nav during vowel sandhi with pA ‘ae’ of etE. Note ES+PA = AA	कृशानवेते க்ருஶானவேதே കൃശാനവേതേ ‘na’ retains udAttam. ‘v’ with ‘e’ (PA) will be vE in anudAttam before udAttam ‘tE’.
TS 2.1.3.1 हि । इमे । लोकाः ஹி । இமே । லோகா: । ഹി । ഇമേ । ലോകാഃ ‘hi’ PU combines with ‘e’ of imE (PA) produces hI in udAttam.	हीमे लोकाः ஹீமே லோகா: ഹീമേ ലോകാഃ Note: No special swaritam with ‘y’ of ‘v’ formed.

TS 2.4.5.1 एतु । आ (एति) । वसु ஏது । ஆ (ஏதி) । வஸு । ഏതു । ആ (ഏതി) । വസു । 'tu' of 'etu' (SA) combines with A (PU) (padam eti) to give tvA udAttam only.	एत्वा वसु ஏத்வா வஸு ഏത്വാ വസു
TS 1.3.7.1 त्वष्टः । वसु த்வஷ்டः । வஸு । ത്വഷ്ടഃ । വസു । 'tvaShTaH' is a special word with visargam sound aH but visargam becomes 'r'. (PrAtiShAkyam ref.PS 8.8)	त्वष्टर्वसु த்வஷ்டர் வஸு ത്വഷ്ടർവസു
TS 1.7.6.2 सः । तु । वै ஸ: । து । வை । സഃ । തു । വൈ 'tu' (PU) combines with 'vai' again another PU to give PU 'tvai'	सत्वै ஸத்வை സത്വൈ
TS 1.7.9.1 आ (एति) । इहि ।	एहि

ஆ (ஏதி) । இஹி । ஆ (ஏதி) । ஈஹி । (A (padam ‘eti’) Prime udAttam combines with ‘e’ of ihi (Support anudAttam) to give ‘ae’ in udAttam. Now, hi is a support anudAttam acquires Swaritam as it follows anudAttam ‘ae’.	ஏஹி ஏஹி
TS 1.8.5.2 நு । आ (एति) ந்வ । ஆ (ஏதி) ந்வ । ஆ (ஏதி) ‘nu’ PU combines with ‘A’ (eti in Pada Paatam to given ‘nvA’ in udAttam.	न्वा न्वा न्वा
TS 1.8.5.2 நு । இந்த்³ர । ந்வ । இந்த்³ர ந்வ । ஈந்த்³ர ‘nu’ (PU) combines with ‘e’ (SA) to create Swaritam with ‘v’ sound, ‘nvi’ It will be Nitya Swaram.	न्वि न्द्र न्विन्द्र न्वीन्द्र
TS 2.1.1.2 एव । अस्मै	एवास्मै

ஏவ । அஸ்மை । ஏவ । அஸ்மை ‘va’ (PU) combines with ‘a’ (SA) to give ‘vA’ in udAttam. ‘ae’ of eva is PA , vA is udAttam and therefore ‘smai’ (SA) acquires swaritam.	ஏவாஸ்மை॥ ஏவாஸ்மை॥ ‘mai’ being dheerga letter at the end of the Padam acquires dheerga swaritam.
TS 2.1.1.2 नि (नीति)॑ । यच्छति । நி (நீதி)॑ । யச்ச2தி । നി (നീതി)॑ । യച്ഛതി ‘ni’ is udAttam, There is no Sandhi. But as per Swara formation rule, ‘ya’ which follows as support anudAttam (SA) acquires Swaritam	नि॑यच्छति நி॑யச்ச2தி നി॑യച്ഛതി This kind of formation is formed quite often in SamhitA when a preposition like **ni, vi, pra**, (which are Prime udAttams) are joined with next word/padam.
TS 3.3.7.2 तत् । एभ्यः । தத் । ஏப்4ய: 	तदे॥भ्यः தத3ே॥ப்4ய:

തത് । ഏഭ്യഃ Example very similar to the one above. 't' halant becomes 'd' and forms 'dE' with 'ae'.	തദ്ഏഭ്യഃ 'ta' is udAttam, 'dE' acquires Swaritam, Bya EkaSruti
TS 4.1.1.1 अधि । आ (एति) । अभरत् । അധി4 । ആ (ഏതി) । അഭ4രത് । അധ്യാ ऽഭരത് । 'dhi' (PS) combines with 'A' (PU) gives 'dhyA' in udAttam.	अध्या ऽभरत् അത്4യാ ऽഭ4രത് അധ്യാ ऽഭരത് । 'a' elides to avagraha (ऽ)so the next letter 'Ba' acquires swaritam since it is a SA.
TS 4.3.3.2 सः । उ । एकविꣳशर्वर्तनिः । സഃ । ഉ । ഏകവിꣳശർവർതനിഃ । സ ഉ വേകവിꣳ ശർവർതനിഃ	സ उ वेकविꣳ शर्वर्तनिः സ ഉ വേകവിꣳ ശർവർതനിഃ

സഃ । ഉ । ഏകവിꣳ ശ്വർതനിഃ SaH is udAttam. It drops visargam and becomes sa. ‘u’ support anudAttam acquires Swaritam.	സ ഉ വേകവിꣳ ശ്വർതനിഃ When ‘u’ precedes ‘ae’, ‘v’ is added so it becomes vE. vE and ka are support anudAttams and acquire pracaya in vAkyam. vi(gm), PA of the padam is retained.
TS 4.3.13.5 वेः । त्वम् । हि । வேः । த்வம் । ஹி വേഃ । ത്വം । ഹി The Visargam of VE before ‘ta’ becomes Sh. (note ‘ae’ sound) then the ta becomes ‘Ta’ to give vEShtam	वेष्ट्वꣳ हि வேஷ்ட்வꣳ ஹி വേഷ്ട്വꣳ ഹി ‘m’ becomes (gm) before ‘hi’. All three padams are Prime udAttams. No Swaram derivation.
TS 4.6.1.5 नि (नीति) । अत्रिणम् । நி (நீதி) । அத்ரிணம் നി (നീതി) । അത്രിണം	न्यत्रिणं ந்யத்ரிணம் ന്യത്രിണം

‘ni’ udAttam combines with ‘a’ PA to give Swaritam ‘nya’ a Nitya swaritam which retains its position.	The Swaritam of Nam is also retained.
TS 4.6.6.5 परि॑ (परीति) । ओ॑जः । പരി॑ (പരീതി) । ഓ॑ജഃ പരി॑ (പരീതി) । ഓ॑ജഃ ‘ri’ PS of pari combines with ‘O’ (PU) of OjaH, to give ‘ryO’ udAttam.	पर्यो॑जः പർയോ॑ജഃ പര്യോ॑ജഃ

9 Rudram example for conversion to vAkyam

9.1 *Conversion from Pada Paatam to vAkyam*

Padam as per Rudra Pada Paatam	Rudra Samhita/Vaakya Paatam
नमः । ते । रुद्र । நமः । தே । ருத்3ர । നമഃ । തേ । രുദ്ര । visargam(:) becomes ‘s’ before ‘ta’ vargam. remove full anudAttam marking in Pada Paatam for ‘tE and ‘rudra’)	नमस्ते रुद्र நமஸ்தே ருத்3ர നമസ്തേ രുദ്ര No impact on swaram of ‘ma’ on following words which is EkaSruti.
मन्यवे । उतो इति । மன்யவே । உதோ இதி । മന്യവേ । ഉതോ ഇതി । ‘vE’ with ‘ae’ sound shall becomes ‘va’ with ‘a’ sound before vowel ‘u’. It will lose its dheerga Swaritam since it is in the middle of the statement in vAkyam	मन्यव उतो மன்யவ உதோ മന്യവ ഉതോ ‘utO iti indicates that utO is a pragraha and it is retained as it is; indicator ‘~~iti~~’ dropped.

ते । इषवे । नमः ।	त इषवे नमः ॥
தே । இஷ்வே । நம: ॥	த இஷ்வே நம: ॥
തേ । ഇഷവേ । നമഃ ।	ത ഇഷവേ നമഃ ॥
But 'tE' becomes 'ta' before vowel 'i' (iShavE) which is udAttam and acquires anudAttam.	'Similarly, 'vE' acquires anudAttam to support prime udAttam 'na' in namaH.
नमः । ते । अस्तु	नमस्ते अस्तु
நம: । தே । அஸ்து ।	நமஸ்தே அஸ்து
നമഃ । തേ । അസ്തു	നമസ്തേ അസ്തു
'tE' and 'astu' will drop its anudAttam marked in Pata Paatam. Visargam becomes 's' as in the first statement.	stE astu is EkaSruti but 'tu' in astu acquires anudAttam to support 'dha' in dhanvanE. See next set of Padams.
धन्वने । बाहुभ्यामिति बाहु –	धन्वने बाहुभ्यामुत
भ्याम् । उत	

த4ன்வனே । பா3ஹுப்4யாமிதி பா3ஹு -- ப்4யாம் । உத । ய்னவனே । பாஹுப்4யாமிதி பாஹு – ப்4யாம் । உத '~~iti~~' removed from bAhubhyAmiti leaves bhyAm with anudAttam. This bhyAm will acquire Swaritam to support –hu which is udAttam.	த4ன்வனே பா3ஹுப்4யாமுத. ய்னவனே பாஹுப்4யாமுத 'm' halant of bhyAm combines with 'u' to give 'mu' since 'u' is anudAttam which is prime to uta, mu will retain anudAttam.
தே । நமः ॥ தே । நம: ॥ தே । நமஃ ॥	தே நமः ॥ தே நம: ॥ தே நமஃ ॥ 'tE' will acquire anudAttam in vAkyam to support 'na' udAttam and prime swaritam of 'maH' in namaH.
யா । தே । இஷு: । யா । தே । இஷ்: ।	யா த இஷு: யா த இஷ்:

യാ । തേ । ഇഷ്ടുഃ ।	യാ ത ഇഷ്ടുഃ
'tE' will drop its anudAttam. 'tE' should have acquired Swaritam as it comes after udAttam 'yA".	But 'tE' becomes 'ta' before vowel 'e' but acquires anudAttam to support anudAttam 'i' of 'iShuH'
ശിവതമേതി ശിവ – തമാ । ശിവമ് ശിവതമേതി ശിവ -- തമാ । ശിവം ശിവതമേതി ശിവ – തമാ । ശിവം 'mE' indicates it is a sandhi of 'mA' +'i' of iti. Remove iti. 'ta' has acquired anudAttam to support 'mE in 'mEti'	ശിവതമാ ശിവം ശിവതമാ ശിവം ശിവതമാ ശിവം Now 'ta' will acquire Swaritam after udAttam 'va'. 'mA' is EkaSruti part. Sivam the next padam does not undergo any change.
ബഭൂവ । തേ । ധനുഃ । പ3പൂ4വ । തേ । ത4നുഃ । ബഭൂവ । തേ । ധനുഃ ।	ബഭൂവ തേ ധനുഃ പ3പൂ4വ തേ ത4നുഃ ബഭൂവ തേ ധനുഃ

babUva is a formed padam with a combination of anudAttam, udAttam and Swaritam. No Change. 'tE' will drop anudAttam as in Pada Paatam.	But 'tE' will now acquire anudAttam to support udAttam 'dha in 'dhanuH'.
शिवा । शरव्या ॥ ശിവാ । ശരവ്യാ ॥ । ശിവാ । ശരവ്യാ ॥ । No change in SivA. SaravyA is a special Swaritam with Swaritam after anudAttam. Sa drops anudAttam given in the Pata Paatam.'ra' will retain its anudAttam.	शिवा शरव्या ശിവാ ശരവ്യാ ശിവാ ശരവ്യാ 'Sa' acquires swaritam to support duAttam 'vA' of Siva on joining. 'vyA' will retain it Swaritam as per Pada Paatam but drop its dheerga Swaritam being in the middle of the statement.
या । तव । तया ॥ யா । தவ । தயா ॥ । യാ । തവ । തയാ ॥ 'va' of tava will acquire anudAttam to support 'ta' udAttam of tayA.	या तव तया யா தவ தயா യാ തവ തയാ 'yA' not being at the end has only Swaritam and not dheerga Swaritam.
नः । रुद्र । मृडय നഃ । രുദ്ര । മൃഡയ	नो रुद्र मृडय ॥ നോ രുദ്ര മൃഡയ ॥

ந: । ரூத்3ர । ம்ருட3ய ॥ நः । രുദ്ര । മൃഡയ । All three padams are marked fully in anudAttam.	நோ ரூத்3ர ம்ருட3ய ॥ നോ രുദ്ര മൃഡയ ॥ They all are restored to EkaSruti.

Note:

Readers interested in an interesting exercise can try converting the Pada Paatam TS 4.5– Rudram into vAkyam. The TS 4.5 Pada Paatam is provided along with vAkyam in our compilation and can be easily verified.
Any inadvertent error will also be brought to the notice.

10 Pragrihya (or Pragraha)

This Section is being provided for users interested to learn this concept.
Examples from Samhita Pada Paatam have been provided in this Version.
In Pada Paatam, all Pragrihyas (term used in PrAti Sakhyam (PS) will be distinctly represented with an 'iti'. In vAkyam, these words will not combine with the following words or Padams for vowel sandhi.

(Panini AshtAdhyAyi) PA 1.1.10: Dual affix ending in **ee, U or ae**
is called Pragrihya and are excepted vowels (sounds) which do not admit any Sandhi rules or conjunction.
The following are the rules (verses) are provided with the respective verse numbers from PrAtisAkhyam **Chapter 4**.
The term used by the Scholar in the reference book is **Pragraha.**

1 Now the pragrahas.
2 No former member of a compound is pragraha.
3 Only a final is pragraha.
4 It is followed by 'iti' (in Pada Paatam)

अथो॑ + इति । அதோ॑ + இதி । അഥോ॑ + ഇതി । represented as

अथो॒ इति । அதோ॒ இதி । അഥോ॒ ഇതി ।

Let us take an example when a combination occurs from Pada Paatam exaplanation of the word 'indrAgnI'

इन्द्राग्नी इतीन्द्र – अग्नी

இந்த்3ராக்3னீ இதீந்த்3ர-- அக்3னீ

ഇന്ദ്രാഗ്നീ ഇതീന്ദ്ര – അഗ്നീ

During Krama Padam when Padam is explained, 'nI' in the end will not combine with following 'e', of 'iti' since it is the last part - Pragraha. But 'i' of indrAgnI combines with 'ti' to give 'tI' ; 'i' of indrAgnI, is in the first part, which is not to be considered as pragraha.

5 A long 'U' is pragraha.

6 Also which is not the product of grammatical rules (euphonic - combination which improves pleasantness of sound), if followed by '**a**' or a consonant.

7 As also, when preceded by स्, म्, ह्, द्, थ्, पित्, ஸ், ம், ஹ்ன, த்3,

த்2,பித் ஸ், ம், ஹ், ந், ம்,பித்.

8. (Now follow cases of) ए & ई , ऐ & ऊ, ഏ & ഈ

9. अस्मे, அஸ்மே, അസ്മേ is pragraha.

10. त्वे, த்வே, തേ (when not the final member of a separable compound)

11. (also) देवते, उभे, भागधे, ऊर्ध्वे, विशाखे, शृङ्गे, एने, मेध्ये, तृण्णे, तृद्ये, कनीनिके, पार्श्वे, शिवे, चोत्तमे, एवोत्तरे, शिप्रे, रथन्तरे, वत्सरस्य रूपे, विरूपे, विशुरूपे, सदोहविर्धाने, अधिशवणे, अहोरात्रे, धृतव्रते, तुतशस्त्रे, ऋख्सामे, अक्ते अर्पिते, रैवते, पूर्ते, प्रत्ते, विधृते, अनृते, अचिद्रे, बहुले, पूर्वजे, कृणुध्वं सदने.

தே3வதே, உபே4, பா4க3தே, ஊர்த்4வே, விஶாகே2, ஶ்ருங்கே3, ஏனே, மேத்4யே, த்ருண்ணே, த்ருத்3யே, கனீனிகே, பார்ஶ்வே, ஶிவே, சோத்தமே, ஏவோத்தரே, ஶிப்ரே, ரத2ந்தரே, வத்ஸரஸ்ய ரூபே, விரூபே, விஶ்வரூபே, ஸதோ3ஹவிர்தானே, அதி4ஶவணே, அஹோராத்ரே, த்4ருதவ்ரதே, ஸ்துதஶஸ்த்ரே, ருக்2ஸாமே, அக்தே அர்பிதே, ரைவதே, பூர்தே, ப்ரத்தே, வித்4ருதே, அன்ருதே, அசித்3ரே, ப3ஹ்வலே, பூர்வஜே, க்ருணுத்4வம் ஸத3னே.

ദേവതേ, ഉഭേ, ഭാഗധേ, ഊർധ്വേ, വിശാഖേ, ശൃങ്ഗേ, ഏനേ,

മേധ്യേ, തൃണ്ണേ, തൃദ്യേ, കനീനികേ, പാര്ശ്വേ, ശിവേ, ചൊത്തമേ, ഏവോത്തരേ, ശിപ്രേ, രഥന്തരേ, വത്സരസ്യ രൂപേ, വിരൂപേ, വിശ്വരൂപേ, സദൊഹവിര്ധാനേ, അധിശവണേ, അഹൊരാത്രേ, ധൃതവ്രതേ, സ്തുതശസ്ത്രേ, ഋഖ്സാമേ, അക്തേ അര്പിതേ, രൈവതേ, പൂര്തേ, പ്രത്തേ, വിധൃതേ,

അനൃതേ, അചിദ്രേ, ബഹുലേ, പൂരവജേ, കൃണുധ്വം സദനേ.

12.&13 अमी, चक्षुशी, कार्ष्णी, देवता फल्गुनी, मुष्टी, धी, नाभी, वप आश्रपणी, अहनी, जन्मनी, सुम्निनी, सामनी, वैष्णवी, ऐख्शवी, दर्वी, द्यावापृथिवी **அமீ, சக்ஷுஶீ, கார்ஷ்ணீ, தே3வதா பல்கு3னீ, முஷ்டீ, தீ4, நாபீ4, வப ஆஶ்ரபணீ, அஹனீ, ஜன்மனீ, ஸும்னினீ, ஸாமனீ, வைஷ்ணவீ, ஐக்ஷவீ, த3ர்வீ, த்3யாவாப்ருதி2வீ** அமீ, சக்ஷுஶீ, கார்ஷ்ணீ, தேவதா ஃபல்குனீ, முஷ்டீ, தீ, நாபீ, வப ஆஶ்ரபணீ, அஹனீ, ஜன்மனீ, சும்னினீ, சாமனீ, வைஷ்ணவீ, ஐக்ஷவீ, தர்வீ, த்யாவாபृதிவீ. As also, the preceding word.

14 But **not** रुन्धे,, ருந்தே$_4$, രുന്ധേ, in any case.

15.& 16. हरी, सहुरी, सहूती, कल्पयन्ती, आ पृशती, आहुती

ஹரீ, ஸஹுரீ, ஸஹூதீ, கல்பயந்தீ, ஆ ப்ருஶதீ, ஆஹுதீ

ഹരീ, സഹുരീ, സഹൂതീ, കല്പയന്തീ, ആ പൃശതീ, ആഹുതീ

(As also, the preceding word.)

17/18 वाससी, तपसी & रेदसी, வாஸஸீ, தபஸீ & ரோத$_3$ஸீ

വാസസീ, തപസീ & രൊദസീ, As also, the following word.

19. व्यचस्वती, भरिष्यन्ती, & नः पृथिवी, வ்யசஸ்வதீ, ப$_4$ரிஷ்யந்தீ, &

ந: ப்ருதி$_2$வீ. വ്യചസ്വതീ, ഭരിഷ്യന്തീ, & നഃ പൃഥിവീ.

20. Also in the verses beginning ये अप्रथेताम्, उर्वी, ते अस्य, यं क्रन्दसी,

चन्दस्वती, ते आचरन्ती, & अन्तरा. யே அப்ரதே$_2$தாம், உர்வீ, தே

அஸ்ய, யம் க்ரந்த$_3$ஸீ, சந்த$_3$ஸ்வதீ, தே ஆசரந்தீ, அந்தரா.

യേ അപ്രഥേതാമ്, ഉര്വീ, തേ അസ്യ, യം ക്രന്ദസീ, ചന്ദസ്വതീ,

തേ ആചരന്തീ, & അന്തരാ.

21. But not उपस्थे. உபஸ்தே$_2$ ഉപസ്ഥേ

22. (Also in the passage beginning with) इरावती, இராவதீ , ഇരാവതീ (and ending with) दाधार, தா$_3$தா$_4$ர, ദാധാര

23. And in the passage beginning with पूर्वजे, பூர்வஜே, പൂരജേ and ending with ayam. अयम्. அயம். അയമ്.

24. इमे, இமே , ഇമേ, when followed by गर्भम्, उप, & एव रसेन. க$_3$ர்ப$_4$ம், உப, & ஏவ ரஸேன, ഗർഭമ്, ഉപ, & ഏവ രസേന.

25. (As also, in the sections beginning with) क्रूरम्, आपः, सजूः & ब्रह्मज. க்ரூரம், ஆப:, ஸஜூ: & ப்$_3$ரஹ்மஜ. ക്രൂരമ്, ആപഃ, സജൂഃ, & ബ്രഹ്മജ.

26. As also pUrNE पूर्ने. பூர்ணே, പൂർണേ.

27. dRudhE दृधे, த்3ருதே4 , ദ്യുധേ is pragraha.

28. घ्नी & चक्रे, க்4னீ & சக்ரே, ഘ്നീ & ചക്രേ,

(when followed by p, प्, ப், പ്)

29/30 न्वती, ந்வதீ ന്വതീ; but not when followed by प्. ப், പ്

31/32 समीची ,ஸமீசீ, സമീചീ is pragraha;

but not when followed by न्, ந்,ന്.

33. ची, சீ, ചീ is pragraha, when followed by यत् or प्र. யத் or ப்ர, യത് or പ്ര.

34. Also आन् मही, ஆன் மஹீ, ആന് മഹീ.

35. (Also the combination of sounds) पती, பதீ, പതീ.

36. and 37 ग्नी, க்3னீ. ഗ്നീ; (But not when followed by हि, ஹி. ഹി.

38. (Also an) ई or ए , ஈ & ஏ ,ஐ or ஏ (followed by) वीड्, द्वारौ, कृष्णः , चरावः, & यदा. வீட்$_3$, த்$_3$வாரௌ, க்ருஷ்ணஃ சராவஃ, & யதா$_3$. വീഡ്, ദ്വാരൌ, കൃഷ്ണഃ, ചരാവഃ, & യദാ.

39. (But not) ज्ञे & अह्ने, ஜ்ஞே & அஹ்னே ஜ்ஞே & அஹ்னே,

40. (ते , थे), (தே , தே$_2$) (തേ , ഥേ), (however, are pragraha in a word of more than two syllables, if preceded by आ or ए, ஆ or ஏ , ആ or ഏ

41. (But not) शार्यते. ஶார்யாதே, ശാര്യാതേ.

42. ते, தே, തേ (is pragraha when followed by) मा पातम्, नमः, एनम् अभि, वायुः, गर्भम्, उप, अहस्, and तु.
மா பாதம், நமஃ, ஏனம் அபி$_4$, வாயுஃ, க$_3$ர்ப$_4$ம், உப, அஹஸ், and து മാ പാതമ്, നമഃ, ഏനമ് അഭി, വായുഃ, ഗര്ഭമ്, ഉപ, അഹസ്, and തു.

43. But not when unaccented (has no Swaram) under any circumstances

44. etE, ஏதே, ഏതേ is pragraha when followed by तनुवौ, वै सम्, एव हि, यज्ञ, पद्, and इष्टक्. தனுவௌ, வை ஸம், ஏவ, ஹி, யஜ்ஞ, பத்$_3$, and இஷ்டக், തനുവൌ, വൈ സമ്, ഏവ, ഹി, യജ്ഞ, പദ്, and ഇഷ്ടക്.

45. As also, the letter following the two last mentioned.

46. Also one followed by स्थः, ஸ்த$_2$:, സ്ഥഃ.

47. As also, one following them both.

48. Also in the section beginning) सोमाय स्व,. ஸோமாய ஸ்வ, സോമായ സ്വ.

49. Also द्वे, த்$_3$வே, ദ്വേ

50. As also, the following word.

51. Likewise the next but one.

52. Before, and within six words of गमयतः, भवतः க$_3$மயத:, ப$_4$வத:
ഗമയതഃ, ഭവതഃ (except when it follows U), तनू यात्, अकरोत्, कुर्यात्
தனூ யாத், அகரோத், குர்யாத்
തനൂ യാത്, അകരോത്, കുര്യാത് (in) इष्टि, இஷ்டி (passages), अब्रूताम्, प्र वर्त, आस्ताम्, स्तभ्नीताम्, वाचयति, बिभृतस् त, अग्निं गायत्रम्, ताभ्याम् ऐव, उभाभ्याम्, अन्दवान्तरम् அப்$_3$ரூதாம், ப்ர வர்த, ஆஸ்தாம், ஸ்தப்$_4$னீதாம், வாசயதி, பி$_3$ப்$_4$ருதஸ் த, அக்$_3$னிம் கா$_3$யத்ரம், தாப்$_4$யாம் ஏவ, உபா$_4$ப்$_4$யாம்,

53. அந்த$_3$வாந்தரம் അബ്രൂതാമ്, പ്ര വര്ത, ആസ്താമ്, സ്തഭ്നീതാമ്, വാചയതി, ബിഭൃതസ് ത, അഗ്നിം ഗായത്രമ്, താഭ്യാമ് ഏവ, ഉഭാഭ്യാമ്, അന്ദവാന്തരമ്.

54. But not ग्रामी, वर्चसी, मिथुनी, मासे, लोके, धत्ते

க்3ராமீ, வர்சஸீ, மிது2னீ, மாஸே, லோகே, த4த்தே.

ഗ്രാമീ, വര്ചസീ, മിഥുനീ, മാസേ, ലോകേ, ധത്തേ.

55. (Nor) अते, அதே, അതേ, **(in a single word)** nor अवे, அவே, അവേ, **under any circumstances.**

10.1 Examples from Samhita Vaakya Paatam

Padam from SamhitA	vAkyam from SamhitA
TS 1.5.2.3 पशवः । एते इति । आहुती பஶவ: । ஏதே இதி । ஆஹு॑தீ । പശവഃ । ഏതേ ഇതി । ആഹു॑തീ ।	पशव एते आहुती பஶவ ஏதே ஆஹு॑தீ പശവ ഏതേ ആഹു॑തീ 'EtE is a Pragraha and there is no sandhi with 'A' Ahutl.
TS 1.3.8.1 विशत । उरो इति । अन्तरिक्ष । விஶத । உரோ இதி । அந்தரிக்ஷ । വിശത । ഉരോ ഇതി । അന്തരിക്ഷ ।	विशतोरो अन्तरिक्ष விஶதோரோ அந்தரிக்ஷ വിശതോരോ അന്തരിക്ഷ

The first part of a Pragraha Padam can have Sandhi, ie 'u' has Sandhi with 'ta' of previous Padam to give 'tO'	The Second part 'rO' will not be subject to Sandhi at all with 'a'.
TS 1.4.27.1 ते । इन्दो इति । इन्द्रियावतः । തേ । ഇന്ദോ ഇതി । ഇന്ദ്രിയാവതഃ । തേ । ഇന്ദോ ഇതി । ഇന്ദ്രിയാവതഃ	ത ഇന്ദോ ഇന്ദ്രിയാവതഃ ത ഇന്ദോ ഇന്ദ്രിയാവതഃ ത ഇന്ദോ ഇന്ദ്രിയാവതഃ
TS 1.7.13.2 यस्य । शुष्मात् । रोदसी इति । अभ्यसेताम् । യസ്യ । ശുഷ്മാത് । രോദസീ ഇതി । അഭ്യസേതാം ।	യസ്യ ശുഷ്മാദ്രോദസീ അഭ്യസേതാം യസ്യ ശുഷ്മാത്3രോദ3സീ അപ്4യസേതാന് യസ്യ ശുഷ്മാദ്രോദസീ അഭ്യസേതാം Here first word 'rO' of rOdasI joins with 't' fo SuShmAt to from drO. But not the SI the final part with 'a'

TS 4.1.3.2 समीची इति । उरसा । त्मना ஸமீசீ இதி । உரஸா । த்மனா । സമീചീ ഇതി । ഉരസാ । ത്മനാ	समीची उरसा त्मना । ஸமீசீ உரஸா த்மனா സമീചീ ഉരസാ ത്മനാ
TS 4.1.4.3 मा । द्यावापृथिवी इति द्यावा – पृथिवी । अभीति । மா । த்3யாவாப்ருதி2வீ இதி த்3யாவா -- ப்ருதி2வீ മാ । ദ്യാവാപൃഥിവീ ഇതി ദ്യാവാ – പൃഥിവീ । അഭീതി ।	मा द्यावापृथिवी अभि மா த்3யாவாப்ருதி2வீ அபி4 മാ ദ്യാവാപൃഥിവീ അഭി Here the Padam split (PGS) of dyAvApRuthivI is also given. It does not have Sandhi with iti. In vAkyam it does not have Sandhi with 'a' of aBi.
TS 5.7.15.1 इन्द्राबृहस्पती इतीन्द्रा – बृहस्पती । ऊरुभ्यामित्यूरु – भ्याम् । इन्द्राविष्णू इतीन्द्रा – विष्णू ।	मिन्द्राबृहस्पती ऊरुभ्यामिन्द्राविष्णू अष्ठीवद्भ्याꣳ

अष्ठीवद्भ्यामित्यष्ठीवत् – भ्याम् । இந்த்3ரா ப்3ருஹஸ்பதீ இதீந்த்3ரா -- ப்3ருஹஸ்பதீ । ஊருப்4யாமித்யூரு -- ப்4யாம் । இந்த்3ராவிஷ்ணூ இதீந்த்3ரா -- விஷ்ணூ । அஷ்டா2வத்3ப்4யாமித்யஷ்டா2வத் -- ப்4யாம் । இந்த்3ராபர்யஹஸ்பதீ இதீந்த்3ரா-பர்யஹஸ்பதீ । ஊருப்4யாமிதி ஊரு – ப்4யாம் । இந்த்3ராவிஷ்ணூ இதீந்த்3ரா – விஷ்ணூ । அஷ்டீவத்3ப்4யாமித்யஷ்டீவத் – ப்4யாம் ।	மிந்த்3ரா ப்3ருஹஸ்பதீ ஊருப்4யா-மிந்த்3ரா-விஷ்ணூ அஷ்டா2வத்3ப்4யாம் மிந்த்3ராபர்யஹஸ்பதீ ஊருப்4யா மிந்த்3ராவிஷ்ணூ அஷ்டீவத்3ப்4யாம் indrAbRuhaspatI and indrAviShNU are both dual nouns so there is no Sandhi with ‘U’ and ‘a’ respectively. Note the Padam split ‘iti’ does not have sandhi with end of the Pragraha.

In Pada Paatam, when a word can appear in duality as well as in Singular or Plural sense, the ‘iti’ is added in Padam to indicate the usage in duality. When a Padam split into two Padams, it is explained through the split of

that Padam without Sandhi of that duality word (noun/verb) indicating the presence of Pragraha/Pragrihya.
